SUBCHAPTER A—GENERAL

PART 600—ORGANIZATION

Sec. 600.1 General.
600.2 National headquarters.
600.3 Regional offices.
600.4 State offices.
600.5 Area offices.
600.6 Field offices.
600.7 Specialized field offices.
600.8 Plant materials centers.
600.9 Major land resource area soil survey offices.

SOURCE: 65 FR 14781, Mar. 20, 2000, unless otherwise noted.

§ 600.1 General.

(a) The Natural Resources Conservation Service (NRCS) was authorized by the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 7 U.S.C. 6901 note) and established by Secretary’s Memorandum 1010–1 (2.b.6), Reorganization of the Department of Agriculture, to provide national leadership in the conservation, development, and productive use of the Nation’s natural resources. Such leadership encompasses the conservation of soil, water, air, plant, and animal resources with consideration of the many human (economic and sociological) interactions. NRCS is the Federal agency that works with landowners on private lands to help them conserve their natural resources. NRCS employees are highly skilled in many scientific and technical specialties, including soil science, soil conservation, agronomy, biology, agroecology, range conservation, forestry, engineering, geology, hydrology, wetlands science, cultural resources, and economics. NRCS was formerly the Soil Conservation Service (SCS) which was established by the Soil Conservation Act of 1935 (Pub. L. 74–46, 49 Stat. 163 (16 U.S.C. 590 (a-f))). NRCS has responsibility for three major areas:

(1) Soil and water conservation;
(2) Natural resource surveys including soil surveys, resources inventory, snow surveys, and water supply forecasting; and

(3) Community resource protection and management including watershed projects, river basin studies and investigations, resource conservation and development areas, land evaluation and site assessment, and emergency watershed protection. In addition, NRCS has leadership for the Wetlands Reserve Program, Environmental Quality Incentives Program, Grazing Lands Conservation Initiative, Farmland Protection Program, Wildlife Habitat Incentives Program, Forestry Incentives Program, and Conservation Farm Option. NRCS provides technical support for the Conservation Reserve Program.

(b) The NRCS organization consists of a National Headquarters located in Washington, DC; six regional offices; 50 state offices and two equivalent offices in the Caribbean Area and the U.S. Trust Territories of the Pacific Basin Area; approximately 2,500 field offices and 300 specialized offices; 26 plant materials centers; 17 major land resource area soil survey offices; nine national centers; and seven national institutes. A Chief who reports to the USDA Under Secretary for Natural Resources and Environment heads NRCS.

§ 600.2 National headquarters.

(a) Chief. The Chief, with assistance of the Associate Chief, is responsible for administering a coordinated national program of natural resource conservation; planning, directing, and coordinating all program, technical, and administrative activities of NRCS; developing policies and procedures; correlating NRCS conservation programs with other agencies; accepting departmental leadership for programs for other activities assigned by the Secretary of Agriculture; and serving as Equal Employment Opportunity Officer for NRCS.

(b) Deputy chiefs. Five deputy chiefs assist the Chief as follows:

(1) Deputy Chief for Management. The Deputy Chief for Management is responsible for policies, guidelines, and standards for management services,
human resources management, financial management, information technology, administrative support (providing a coordinated administrative management program for National Headquarters activities), NRCS outreach, training, and correspondence management. This deputy chief also is responsible for the activities of three national centers: business management, information technology, and employee development.

(2) Deputy Chief for Strategic Planning and Accountability. The Deputy Chief for Strategic Planning and Accountability is responsible for policies, guidelines, and standards for strategic and performance planning, budget planning and analysis, and operations management and oversight.

(3) Deputy Chief for Programs. The Deputy Chief for Programs is responsible for policies, guidelines, and standards for conservation operations, resource conservation and community development, watersheds and wetlands, international programs, conservation compliance activities, conservation programs funded by the Commodity Credit Corporation, and animal husbandry and clean water programs.

(4) Deputy Chief for Soil Survey and Resource Assessment. The Deputy Chief for Soil Survey and Resource Assessment is responsible for policies, guidelines, and standards for NRCS technical activities, and provides leadership for soils, resource inventory, and resource assessment. This deputy chief also is responsible for the activities of two national centers (soil survey and cartography and geospatial) and two national institutes (soil quality and natural resources inventory and analysis).

(5) Deputy Chief for Science and Technology. The Deputy Chief for Science and Technology is responsible for policies, guidelines, and standards for the agency, and provides leadership for resource economics and social sciences, conservation engineering, and ecological sciences. This deputy chief also is responsible for the activities of four national centers (water and climate, water management, soil mechanics, and plant data) and five national institutes (grazing lands technology, social sciences, watershed science, wetlands science, and wildlife habitat management). This deputy chief, working closely with the deputy chiefs for Management and Soil Survey and Resource Assessment, provides overall direction for the National Science and Technology Consortium.

(c) National Science and Technology Consortium. The consortium consists of three divisions, four centers, five technical institutes, and several cooperating scientists under the Deputy Chief for Science and Technology; two divisions, two centers, and two technical institutes under the Deputy Chief for Soil Survey and Resource Assessment; and one division and three centers under the Deputy Chief for Management.

(1) Centers. The nine centers provide specific products and services that maintain and enhance the technical quality of the agency. The centers are: water and climate, water management, soil mechanics, plant data, soil survey, cartography and geospatial, information technology, business management, and employee development.

(2) Institutes. The seven institutes are: soil quality, natural resources inventory and analysis, grazing lands technology, social sciences, watershed science, wetlands science, and wildlife habitat management. The institutes provide training; develop technical materials; and acquire, develop, and transfer needed technology in special emphasis areas so field employees can better serve their customers. The institutes often establish partnerships with other Federal agencies, universities, and public and private organizations.

(3) Cooperating Scientists. Cooperating scientists work in the areas of soil erosion and sedimentation, air quality, and agroforestry. These scientists are located at various universities and research centers.

(d) Civil Rights. The Civil Rights staffs provide coordination, assistance, and recommendations to the Chief on civil rights employment and program compliance issues.

(e) Legislative Affairs. The Legislative Affairs Staff provides coordination and assistance to the Chief on legislative affairs issues and activities.

(f) Conservation Communications. The Conservation Communications Staff is
§ 600.9 Major land resource area soil survey offices.

The United States is divided into 17 major land resource areas (MLRA) for the purpose of soil survey production. Major land resource area soil survey offices (MO) provide the technical leadership, coordination, and quality assurance for all soil survey project activities within the respective MLRA. Each MO serves two or more States (except for the MO in Alaska), and is under the jurisdiction of the State conservationist where the office is located. Each MO is directed and supervised by
