§ 980.212 Import regulations; tomatoes.

(a) Findings and determinations with respect to fresh tomatoes. (1) Under Section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), it is hereby found that:

(i) Grade, size, quality and maturity regulations have been issued from time to time;

(ii) The marketing of fresh tomatoes from Florida covered by Marketing Order No. 966 can reasonably be expected to occur during the months of October through June;

(2) Therefore, it is hereby determined that imports of fresh tomatoes during the months of October through June are in most direct competition with the marketing of fresh tomatoes produced in Florida covered by Marketing Order No. 966, as amended.

(b) Grade, size, quality and maturity requirements. On and after the effective date hereof no person may import fresh tomatoes except pear shaped, cherry, hydroponic and greenhouse tomatoes as defined herein, or tomatoes to be used in noncommercial outlets for experimental purposes, unless they are cultural practices that limit growth to 2 inches in diameter or less.

(i) Exemptions. The grade, size, quality and maturity requirements of this section shall not be applicable to onions imported for processing, livestock feed, charity, or relief, and pearl onions, onion sets (plantings), braided red onions, and minimum quantity shipments of 110 pounds, but such onions shall be subject to the safeguard provisions in §980.501. Processing includes canning, freezing, dehydration, extraction (juice) and pickling in brine. Processing does not include fresh chop, fresh cut, convenience food or other pre-packaged salad operations. Pearl onions must be inspected for size prior to entry into the United States.
