Agricultural Marketing Service, USDA

§ 1030.60 Handler’s value of milk.

For the purpose of computing a handler’s obligation for producer milk, the market administrator shall determine for each month the value of milk eligible for transportation and assembly credits pursuant to paragraphs (a) and (b) of this section:

(1) At each pool distributing plant, determine the aggregate quantity of Class I milk, excluding beginning inventory of packaged fluid milk products;

(2) Subtract the quantity of packaged fluid milk products received at the pool distributing plant from other pool plants and from nonpool plants if such receipts are assigned to Class I;

(3) Subtract the quantity of bulk milk shipped from the pool distributing plant to other plants to the extent that such milk is classified as Class I milk;

(4) Subtract the quantity of bulk milk received at the pool distributing plant from other order plants and unregulated supply plants that is assigned to Class I pursuant to §§1000.43(d) and 1000.44; and

(5) Assign the remaining quantity proportionate to physical receipts during the month from:

(i) Producers;

(ii) Handlers described in §1000.9(c); and

(iii) Other pool plants.

(d) For purposes of this section, the distances to be computed shall be determined by the market administrator using the shortest available state and/or Federal highway mileage. Mileage determinations are subject to redetermination at all times. In the event a handler requests a redetermination of the mileage pertaining to any plant, the market administrator shall notify the handler of such redetermination within 30 days after the receipt of such request. Any financial obligations resulting from a change in mileage shall not be retroactive for any periods prior to the redetermination by the market administrator.
