§ 110.22 General license for the export of source material.

(a) Except as provided in paragraph (e) of this section, a general license is issued to any person to export the following to any country not listed in § 110.28:

(1) Uranium or thorium, other than uranium–230, uranium–232, thorium–227, and thorium–228, in any substance in concentrations of less than 0.05 percent by weight.

(2) Thorium, other than thorium–227 and thorium–228, in incandescent gas mantles or in alloys in concentrations of 5 percent or less.

(3) Thorium–227, thorium–228, uranium–230, and uranium–232 when contained in a device, or a source for use in a device, in quantities of less than 3.7 × 10⁻³ TBq (100 millicuries) of alpha activity (3.12 micrograms thorium-227, 122 micrograms thorium-228, 3.7 micrograms uranium-230, 4.7 milligrams uranium-232) per device or source.

(b) Except as provided in paragraph (f) of this section, a general license is issued to any person to export uranium or thorium, other than uranium–230, uranium–232, thorium–227, or thorium–228, in individual shipments of 10 kilograms or less to any country listed in § 110.29, not to exceed 1,000 kilograms per calendar year to any one country when the uranium or thorium is Canadian-obligated.

§ 110.23 General license for the export of byproduct material.

(a) A general license is issued to any person to export byproduct material (see Appendix L to this part) to any country not listed in § 110.28 and subject to the following limitations:

(1) The general license in this section does not authorize the export of byproduct material in the form of radioactive waste.

(2) The general license in this section does not authorize the export of the following radionuclides:

- Americium–242m
- Californium–249
- Californium–251
- Curium–245
- Curium–247

(3) For byproduct materials listed in Table 1 of Appendix P to this part, individual shipments under a general license for export must be less than the terabecqueral (TBq) values specified in Category 2 of Table 1 unless a more restrictive requirement applies.

(4) The general license authorizes exports of the following radionuclides when contained in a device, or a source...
for use in a device, in quantities less than \(3.7 \times 10^{-3}\) TBq (100 millicuries) of alpha activity per device or source, unless the export is to a country listed in §110.30:

- Actinium–225
- Actinium–227
- Californium–248
- Californium–250
- Californium–252
- Californium–253
- Californium–254
- Curium–240
- Curium–241
- Curium–242
- Curium–243
- Curium–244
- Einsteinium–252
- Einsteinium–253
- Einsteinium–254
- Einsteinium–255
- Fermium–257
- Gadolinium–148
- Mendelevium–258
- Neptunium–235
- Polonium–208
- Polonium–209
- Polonium–210
- Radium–223

(5)(i) For americium–241, exports under the general license to a country listed in §110.29 must not exceed \(3.7 \times 10^{-2}\) TBq (one curie) per shipment.

(ii) For americium–241, exports under the general license to a country listed in §110.29 that exceed \(3.7 \times 10^{-2}\) TBq (one curie) per shipment, must be contained in industrial process control equipment or petroleum exploration equipment in quantities not exceeding 7.4 TBq/calendar year (200 curies/calendar year) to any one country.

(iii) All exports of americium are subject to the reporting requirements listed in §110.54(b).

(6) For neptunium–235 and –237, exports under the general license must not exceed one gram for individual shipment and must not exceed a cumulative total of 10 grams per calendar year to any one country. All exports of neptunium are subject to the reporting requirements listed in §110.54(b).

(7) For polonium–210, exports under the general license, when contained in static eliminators, must not exceed 3.7 TBq (100 curies) per individual shipment.

(8)(i) For tritium in any dispersed form (e.g., luminescent light sources and paint, accelerator targets, calibration standards, labeled compounds), exports under the general license must not exceed 0.37 TBq (10 curies) per item, not to exceed 37 TBq (1,000 curies) per shipment, or 370 TBq (10,000 curies) per calendar year to any one country.

(ii) For tritium in any dispersed form (e.g., luminescent light sources and paint, accelerator targets, calibration standards, labeled compounds), exports under the general license to the countries listed in §110.30 must not exceed the quantity of 1.48 TBq per item, not to exceed 37 TBq (1,000 curies) per shipment or 370 TBq (10,000 curies) per calendar year to any one country.

(iii) For tritium in luminescent safety devices installed in an aircraft, exports under the general license must not exceed 1.48 TBq per light source.

(iv) The general license in this section does not authorize the export of tritium for recovery or recycle purposes.

(b) [Reserved]

[75 FR 44088, July 28, 2010]

§110.24 General license for the export of deuterium.

(a) A general license is issued to any person to export to any country not listed in §110.29 or §110.29 deuterium in individual shipments of 10 kilograms or less (50 kilograms of heavy water). No person may export more than 200 kilograms (1,000 kilograms of heavy water) per calendar year to any one country.

(b) A general license is issued to any person to export to any country listed in §110.29 deuterium in individual shipments of 1 kilogram or less (5 kilograms of heavy water). No person may export more than 5 kilograms (25 kilograms of heavy water) per calendar year to any one country.
