physical inventories of nuclear material for IAEA accounting purposes;
(4) Establishment of the records and reports requirements and records evaluation procedures;
(5) Establishment of requirements and procedures for verification of the quantity and location of nuclear material;
(6) Selection of appropriate combinations of containment and surveillance methods and techniques at the strategic points at which they are to be applied; and
(7) Information on organizational responsibility for material accounting and control.

(e) Information specified in paragraph (b)(5) of this section must be submitted as specified by instructions for DOC/NRC Form AP–A and associated forms and shall contain a site map drawn to scale as an attachment.

(f) The applicant’s, licensee’s, or certificate holder’s security rules for physical protection that will impact the IAEA inspectors at the facility must be included in the facility information only when and to the extent specifically requested by the Commission.

(g) Health and safety rules that are to be observed by the IAEA inspectors at the facility must be included in the facility information.

(h) Information must be provided on the need to manage IAEA access to the facility to protect health and safety or to protect classified, proprietary, or other sensitive information, and on other protective measures that should be implemented should an IAEA access be requested.

§ 75.11 Location information.

(a) As required by the Additional Protocol, each applicant, licensee, or certificate holder shall submit location information to the Commission as specified in the instructions for DOC/NRC Form AP–1 and associated forms.

(b) Location information includes:
(1) Nuclear fuel cycle-related research and development information including a general description of the activity and information specifying the location of the activity.
(2) Nuclear fuel cycle-related manufacturing or construction information including a description of the scale of operations for the activity.
(3) Uranium and thorium mine and concentration plant information including information on the location, operational status, and the estimated annual production capacity and current annual production of the activity.
(4) Impure source material possession information including the quantities, the chemical composition, and the use or intended use of the material (e.g., nuclear or non-nuclear use).
(5) Imports and exports of source material for non-nuclear end uses including the location, quantities, chemical compositions, and use of the imported or exported material.
(6) IAEA-exempted and -terminated nuclear material information including information regarding the quantities, uses, and location of the nuclear material.
(7) Imports and exports of non-nuclear material and equipment including the location, quantity and description of the materials and equipment.

(c) Information specified in paragraphs (b)(1) through (b)(7) of this section must be supplied as specified in the instructions for DOC/NRC Form AP–1 and associated forms. The information provided on DOC/NRC Form AP–1 and associated forms must be submitted annually. If the information has not changed, a “No change” report must be provided. NRC should also be notified when the activity is no longer performed. The annual report must be submitted by January 31 of each succeeding year after the initial report. The initial report must be submitted no later than 30 calendar days following the date of publication of this rule.

(d) Information must be provided on the need to manage IAEA access to the location to protect health and safety or to protect classified, proprietary, or other sensitive information, and on other protective measures that should be implemented should an IAEA access be requested.
