when, in DOE's judgment, such action is warranted on the basis of the circumstances of an individual case.

PART 830—NUCLEAR SAFETY MANAGEMENT

Sec.
830.1 Scope.
830.2 Exclusions.
830.3 Definitions.
830.4 General requirements.
830.5 Enforcement.
830.6 Recordkeeping.
830.7 Graded approach.

Subpart A—Quality Assurance Requirements

830.120 Scope.
830.121 Quality Assurance Program (QAP).
830.122 Quality assurance criteria.

Subpart B—Safety Basis Requirements

830.200 Scope.
830.201 Performance of work.
830.202 Safety basis.
830.203 Unreviewed safety question process.
830.204 Documented safety analysis.
830.205 Technical safety requirements.
830.206 Preliminary documented safety analysis.
830.207 DOE approval of safety basis.

APPENDIX A TO SUBPART B OF PART 830—GENERAL STATEMENT OF SAFETY BASIS POLICY

SOURCE: 66 FR 1818, Jan. 10, 2001, unless otherwise noted.

§ 830.3 Definitions.

(a) The following definitions apply to this part:

Administrative controls means the provisions relating to organization and management, procedures, recordkeeping, assessment, and reporting necessary to ensure safe operation of a facility.

Bases appendix means an appendix that describes the basis of the limits and other requirements in technical safety requirements.

Critical assembly means special nuclear devices designed and used to sustain nuclear reactions, which may be subject to frequent core and lattice configuration change and which frequently may be used as mockups of reactor configurations.

Criticality means the condition in which a nuclear fission chain reaction becomes self-sustaining.

Design features means the design features of a nuclear facility specified in the technical safety requirements that, if altered or modified, would have a significant effect on safe operation.

Document means recorded information that describes, specifies, reports, certifies, requires, or provides data or results.

Documented safety analysis means a documented analysis of the extent to which a nuclear facility can be operated safely with respect to workers, the public, and the environment, including a description of the conditions, safe boundaries, and hazard controls that provide the basis for ensuring safety.
