Federal Aviation Administration, DOT

PART 187—FEES

§ 187.1 Scope.

This part prescribes fees only for FAA services for which fees are not prescribed in other parts of this chapter or in 49 CFR part 7. The fees for services furnished in connection with making information available to the public are prescribed exclusively in 49 CFR part 7. Appendix A to this part prescribes the methodology for computation of fees for certification services performed outside the United States. Appendix B to this part prescribes the methodology for computation of fees for certification services performed outside the United States.

APPENDIX A TO PART 187—METHODOLOGY FOR COMPUTATION OF FEES FOR CERTIFICATION SERVICES PERFORMED OUTSIDE THE UNITED STATES

APPENDIX B TO PART 187—FEES FOR FAA SERVICES FOR CERTAIN FLIGHTS

APPENDIX C TO PART 187—FEES FOR PRODUCTION CERTIFICATION-RELATED SERVICES PERFORMED OUTSIDE THE UNITED STATES

Source: Docket No. 8347, 32 FR 12051, Aug. 22, 1967, unless otherwise noted.

§ 187.5 Duplicates of licenses.

The fee for furnishing to a person entitled thereto a replacement, duplicate, or facsimile of a certificate or other document evidencing a license, for which a fee is not specifically provided elsewhere in this chapter, is $2.

§ 187.7 Copies; seal.

The fees for furnishing photostatic or similar copies of documents and for affixation of the seal for a certification or validation are the same as those provided in subpart H of 49 CFR part 7.

§ 187.15 Payment of fees.

(a) The fees of this part are payable to the Federal Aviation Administration by check, money order, wire transfers, draft, payable in U.S. currency and drawn on a U.S. bank, or by credit card payable in U.S. currency, prior to the provision of any service under this part.

(b) Applicants for the FAA services provided under this part shall pay any bank processing charges on fees collected under this part, when such charges are assessed on U.S. Government.

(c) Applicants for the FAA services described in Appendix A of this part shall pay bank processing charges, when such charges are assessed by banks on U.S. Government deposits.

(d) The fees described in appendix B of this part are payable to the Federal Aviation Administration in U.S. currency. Remittance of fees of $1,000 or more are to be paid by electronic funds transfer. Remittance of amounts less than $1,000 may be paid by electronic funds transfer, check, money order, credit card, or draft.

§ 187.17 Failure by applicant to pay prescribed fees.

If an applicant fails to pay fees agreed to under appendix C of this part, the FAA may suspend or deny any application for service and may suspend or revoke any production certification-related approval granted.

APPENDIX A TO PART 187—METHODOLOGY FOR COMPUTATION OF FEES FOR CERTIFICATION SERVICES PERFORMED OUTSIDE THE UNITED STATES

(a) Fixed fees and hourly rates have been derived using the methodology described
below to ensure full cost recovery for certification actions or approvals provided by the FAA for persons outside the United States.

(b) These rates are based on aviation safety inspector time rather than calculating a separate rate for managerial or clerical time because the inspector is the individual performing the actual service. Charging for inspector time, while building in all costs into the rate base, provides for efficient cost recovery and time management.

(c) The hourly billing rate has been determined by using the annual operations budget of the Flight Standards Service. The budget is comprised of the following:

1. Personnel compensation and benefits, budget code series 1100 (excluding codes 1151 and 1152—overtime, Sunday and holiday pay), 1200, and 1300.
2. Travel and transportation of persons, budget code series 2100 (excluding code 2100—site visit travel).
3. Transportation of things, budget code series 2200.
4. Rental, communications, utilities, budget code series 2300.
5. Printing and reproduction, budget code series 2400.
6. Contractual services, budget code series 2500.
7. Supplies and materials, budget code series 2600.
10. Insurance claims and indemnities, budget code series 4200.

(d) In order to recover overhead costs attributable to the budget, all costs other than direct inspector transportation and subsistence, overtime, and Sunday/holiday costs, are assigned to the number of inspector positions. An hourly cost per inspector is developed by dividing the annual Flight Standards Operations Budget, excluding the items enumerated above, by the number of aviation safety inspections (OMB position series 1825) on board at the beginning of the fiscal year, to determine the annual cost of an aviation safety inspector. This annual cost of an aviation safety inspector is divided by 2,087 hours, which is the annual paid hours of a U.S. Federal Government employee. This result in the hourly government paid cost of an aviation safety inspector.

(e) To ensure that the hourly inspector cost represents a billing rate that ensures full recovery of costs, the hourly cost per inspector must be multiplied by an indirect work factor to determine the hourly inspector billing rate. This is necessary for the following reasons:

1. Inspectors spend a significant amount of time in indirect work to support their inspection activities, much of which cannot be allocated to any one client.
2. Not all 2,087 annual paid hours are available as work hours because training, providing technical assistance, leave, and other indirect work activities reduce the work time that may be directly billed. Consequently, the hourly cost per inspector must be adjusted upwards by an indirect work factor. The calculation of an indirect work factor is discussed in paragraph (f) of this appendix.

(f) The indirect work factor is determined using the following formula:

\[
\left(1 + \sum_{i=1}^{k} a_i\right)(1 + b) = \text{indirect work factor}
\]

where:

\(a\) = indirect work rate, and

\(b\) = leave usage (total leave hours divided by total hours available for work).

(2) The components of the formula are derived as follows:

1. **Indirect work rate**. Indirect work rate is taken from the Flight Standards Staffing Standard Order and is used to project the amount of time an aviation safety inspector spends in indirect activities, as opposed to certification and surveillance work. The indirect work activities are:
   - Development of master minimum equipment lists on Flight Operations Evaluation Board.
   - Development of aircraft training documents on Flight Standardization Board.

(C) Development of Maintenance program documents on Maintenance Review Board.

(D) Providing technical assistance.

(E) Assisting legal counsel.

(F) Evaluation of technical documents.

(G) Leave (all types).

(H) Training.

(I) Administrative time.

(J) Travel for indirect work.

(k) Leave usage (total leave hours divided by total hours available for work). This is computed by using OMB guidelines of 280 average annual leave hours and 1,800 average annual hours available for work for computer manpower requirements.

(g) The hourly inspector cost, when multiplied by the indirect work factor, yields the hourly inspector billing rate and ensures full
Federal Aviation Administration, DOT

Appendix B to Part 187—Fees for FAA Services for Certain Flights

(a) Applicability. Except as provided in paragraphs (b) and (c) of this appendix, this appendix applies to any person who conducts a flight through U.S.-controlled airspace that does not include a landing or takeoff in the United States. U.S.-controlled airspace is defined as all U.S. airspace either directly owned by the United States or allocated to the United States by the International Civil Aviation Organization (ICAO) or by other countries. This is further defined, for this section only, as Enroute and Oceanic airspace. Enroute airspace is defined, for this section only, as airspace where primarily radar-based air traffic services are provided. Oceanic airspace is defined, for this section only, as airspace where primarily procedural air traffic services are provided.

(b) Governmental flights. This appendix does not apply to any military or civilian flight operated by the United States Government or by any foreign government.

(c) Canada-to-Canada flights. This appendix will not apply to any operator of a flight that takes off and lands in Canada, without an intermediate stop outside Canada, that operates in U.S.-controlled airspace.

(d) Services. Persons covered by paragraph (a) of this appendix must pay a fee for the FAA’s rendering or providing certain services, including but not limited to the following:

1. Air traffic management.
2. Communications.
4. Radar surveillance, including separation services.
5. Flight information services.
6. Procedural control.
7. Emergency services and training.

(e) Methodology for the computation of fees. The methodology for computing user fees is published in this Appendix. The User fee schedule is published in an FAA Advisory Circular entitled “Flight Standards Service Schedule of Charges Outside the United States.” A copy of this publication may be obtained from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

(f) Fees will be reviewed every year, at the beginning of the fiscal year, and adjusted either upward or downward in order to reflect the current costs of performing tests, authorizations, certifications, permits, or ratings.

(g) Notice of each change to a fee for a service described in the user fee schedule will be published in the “Notices” section of the Federal Register.

(Appmt. 187–5, 60 FR 8681, Apr. 19, 1995)

APPENDIX B TO PART 187—FEES FOR FAA SERVICES FOR CERTAIN FLIGHTS

The following schedule applies to any person who conducts a flight through U.S.-controlled airspace that does not include a landing or takeoff in the United States. U.S.-controlled airspace is defined as all U.S. airspace either directly owned by the United States or allocated to the United States by the International Civil Aviation Organization (ICAO) or by other countries.

<table>
<thead>
<tr>
<th>Time period</th>
<th>X (enroute)</th>
<th>Y (oceanic)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Through September 30</td>
<td>$33.72</td>
<td>$15.94</td>
</tr>
</tbody>
</table>

Where:

- \( R = X \times D_{enroute} + Y \times D_{oceanic} \)
- \( D_{enroute} \) is the total great circle distance traveled in each segment of U.S.-controlled Enroute airspace expressed in hundreds of nautical miles for aircraft flying between entry point \( i \) and exit point \( j \) for each segment of Enroute airspace.
- \( D_{oceanic} \) is the total great circle distance traveled in each segment of U.S.-controlled Oceanic airspace expressed in hundreds of nautical miles for aircraft flying between entry point \( i \) and exit point \( j \) for each segment of Oceanic airspace.

X and Y are the values respectively set forth in the following schedule.
