or waive the compliance tests for a hydrographic product. This alternative may be used, for example, when there is no qualified entity to perform the compliance tests, where the compliance tests are simple, or when self-certification of compliance would be appropriate.

(c) Items failing the compliance tests may be changed by the applicant and retested. Items passing the compliance test upon retest shall be deemed compliant as if they had passed said tests initially.

§ 996.22 Certification.

(a) A hydrographic product that has passed the compliance tests shall automatically be considered for certification by NOAA. NOAA shall make its certification determination, if its other obligations permit, within 60 calendar days following receipt of the compliance test results. NOAA shall make a certification determination based upon the following criteria:

1. The results of the compliance tests;
2. The potential for the hydrographic product to impair public safety;
3. Successful completion of any administrative requirements, including the payment of required fees, as may be specified by NOAA;
4. The potential for certification to cause embarrassment to the Agency or the Department;
5. Other relevant criteria as they become apparent.

(b) Hydrographic products receiving a certification determination in the affirmative shall be designated as "certified" by NOAA. NOAA shall provide a written document to the sponsor indicating such, and shall announce its determination in the Federal Register or by other appropriate means. Certification shall mean that the hydrographic product has been found to be in compliance with the NOAA-adopted standard for that hydrographic product or class. Certification conveys no automatic, direct or indirect NOAA endorsement of any product or service.

(c) Certification shall be for a term of 3 years unless otherwise specified by the Administrator.

(d) A certification may be renewed, at the request of sponsor and the option of NOAA, for a period of 2 years. Sponsors may request the renewal of a certification by writing to the Quality Assurance Program address at least 120 calendar days before the expiration of an existing certification. The request shall include:

1. Identifying and contact information for the sponsor;
2. Identifying information for the relevant hydrographic product(s) and the standard(s) under which they were certified;
3. Evidence sufficient to assure NOAA that the hydrographic product still meets the standard under which it was certified; and
4. Other information as may be requested by NOAA.

(e) NOAA shall decide within 60 calendar days, if its other obligations permit, whether to renew a certification. NOAA’s decision shall be based on whether the hydrographic product continues to meet the applicable standard, and other relevant criteria as they become apparent.

(f) The sponsor shall have an opportunity to request reconsideration of NOAA’s decision. Said request shall be submitted in writing, to the Quality Assurance Program address, postmarked within 30 days of NOAA’s announcement of its decision, and shall contain written material supporting the requestor’s position. NOAA shall have, if its other obligations permit, 30 calendar days from the receipt of a request for reconsideration to either deny the request, or to reconsider and announce its decision.

(g) NOAA’s decision, either the original decision if unappealed within 30 days, or the decision after the request for reconsideration, shall be considered final.

§ 996.23 Audit and decertification of hydrographic products.

(a) NOAA may audit hydrographic products it has certified. NOAA may
