§ 41.25 Additional conditions for trading for security futures products.

(a) Common provisions—(1) Reporting of data. The designated contract market or registered derivatives transaction execution facility shall comply with chapter 16 of this title requiring the daily reporting of market data.

(2) Regulatory trading halts. The rules of a designated contract market or registered derivatives transaction execution facility that lists or trades one or more security futures products must include the following provisions:

(i) Trading of a security futures product based on a single security shall be halted at all times that a regulatory halt has been instituted for the underlying security; and

(ii) Trading of a security futures product based on a narrow-based security index shall be halted at all times that a regulatory halt has been instituted for one or more underlying securities that constitute 50 percent or more of the market capitalization of the narrow-based security index.

(3) Speculative position limits. The designated contract market or registered derivatives transaction execution facility shall have rules in place establishing position limits or position accountability procedures for the expiring futures contract month. The designated contract market or registered derivatives transaction execution facility shall,

(A) Adopt a net position limit no greater than 13,500 (100-share) contracts applicable to positions held during the last five trading days of an expiring contract month; or

(B) For security futures products where the average daily trading volume in the underlying security exceeds 20 million shares and there are more than 40 million shares of the underlying security outstanding, the designated contract market or registered derivatives transaction execution facility may adopt a position accountability rule. Upon request by the designated contract market or registered derivatives transaction execution facility, traders who hold net positions greater than 22,500 (100-share) contracts, or such lower level specified by exchange rules, must provide information to the exchange and consent to halt increasing their positions when so ordered by the exchange.

(ii) For a security futures product comprised of more than one security, the criteria in paragraphs (a)(3)(i)(A) and (a)(3)(i)(B) of this section must apply to the security in the index with the lowest average daily trading volume.

(iii) Exchanges may approve exemptions from these position limits pursuant to rules that are consistent with §150.3 of this chapter.

(iv) For purposes of this section, average daily trading volume shall be calculated monthly, using data for the most recent six-month period. If the data justify a higher or lower speculative limit for a security future, the designated contract market or registered derivatives transaction execution facility may raise or lower the position limit for that security future effective no earlier than the day after it has provided notification to the Commission and to the public under the submission requirements of §41.24. If the data require imposition of a reduced position limit for a security future, the designated contract market or registered derivatives transaction execution facility may permit any trader holding a position in compliance with the previous position limit, but in excess of the reduced limit, to maintain such position through the expiration of the security futures contract; provided that
the designated contract market or registered derivatives transaction execution facility does not find that the position poses a threat to the orderly expiration of such contract.

(b) **Final settlement prices for security futures products.** (1) The final settlement price of a cash-settled security futures product must fairly reflect the opening price of the underlying security or securities;

(2) Notwithstanding paragraph (b)(1) of this section, if an opening price for one or more securities underlying a security futures product is not readily available, the final settlement price of the security futures product shall fairly reflect:

(i) The price of the underlying security or securities during the most recent regular trading session for such security or securities; or

(ii) The next available opening price of the underlying security or securities.

(3) Notwithstanding paragraphs (b)(1) or (b)(2) of this section, if a derivatives clearing organization registered under Section 5b of the Act or a clearing agency exempt from registration pursuant to Section 5(b)(2) of the Act, to which the final settlement price of a security futures product is or would be reported determines, pursuant to its rules, that such final settlement price is not consistent with the protection of customers and the public interest, taking into account such factors as fairness to buyers and sellers of the affected security futures product, the maintenance of a fair and orderly market in such security futures product, the consistency of interpretation and practice, the clearing organization shall have the authority to determine, under its rules, a final settlement price for such security futures product.

(c) **Special requirements for physical delivery contracts.** For security futures products settled by actual delivery of the underlying security or securities, payment and delivery of the underlying security or securities must be effected through a clearing agency that is registered pursuant to section 17A of the Securities Exchange Act of 1934.

(d) The Commission may exempt from the provisions of paragraphs (a)(2) and (b) of this section, either unconditionally or on specified terms and conditions, any designated contract market or registered derivatives transaction execution facility, if the Commission determines that such exemption is consistent with the public interest and the protection of customers. An exemption granted pursuant to this paragraph shall not operate as an exemption from any Securities and Exchange Commission rules. Any exemption that may be required from such rules must be obtained separately from the Securities and Exchange Commission.

§ 41.27 Prohibition of dual trading in security futures products by floor brokers.

(a) **Definitions.** For purposes of this section:

(1) Trading session means hours during which a designated contract market or registered derivatives transaction execution facility is scheduled to trade continuously during a trading day, as set forth in its rules, including any related post settlement trading session. A designated contract market or registered derivatives transaction execution facility may have more than one trading session during a trading day.

(2) Member shall have the meaning set forth in section 1a(24) of the Act.

(3) Broker association includes two or more designated contract market or registered derivatives transaction execution facility members with floor trading privileges of whom at least one is acting as a floor broker who:

(i) Engage in floor brokerage activity on behalf of the same employer;

(ii) Have an employer and employee relationship which relates to floor brokerage activity;

(iii) Share profits and losses associated with their brokerage or trading activity; or

(iv) Regularly share a deck of orders.

(4) Customer means an account owner for which a trade is executed other than:

(i) An account in which such floor broker has any interest;

(ii) An account for which a floor broker has discretion;
