§ 870.1370  Catheter tip occluder.
(a) Identification. A catheter tip occluder is a device that is inserted into certain catheters to prevent flow through one or more orifices.
(b) Classification. Class II (performance standards).

§ 870.1380  Catheter stylet.
(a) Identification. A catheter stylet is a wire that is run through a catheter or cannula to render it stiff.
(b) Classification. Class II (performance standards).

§ 870.1390  Trocar.
(a) Identification. A trocar is a sharp-pointed instrument used with a cannula for piercing a vessel or chamber to facilitate insertion of the cannula.
(b) Classification. Class II (performance standards).

§ 870.1425  Programmable diagnostic computer.
(a) Identification. A programmable diagnostic computer is a device that can be programmed to compute various physiologic or blood flow parameters based on the output from one or more electrodes, transducers, or measuring devices; this device includes any associated commercially supplied programs.
(b) Classification. Class II (performance standards).

§ 870.1435  Single-function, preprogrammed diagnostic computer.
(a) Identification. A single-function, preprogrammed diagnostic computer is a hard-wired computer that calculates a specific physiological or blood-flow parameter based on information obtained from one or more electrodes, transducers, or measuring devices.
(b) Classification. Class II (performance standards).

§ 870.1450  Densitometer.
(a) Identification. A densitometer is a device used to measure the transmission of light through an indicator in a sample of blood.
(b) Classification. Class II (performance standards).

§ 870.1650  Angiographic injector and syringe.
(a) Identification. An angiographic injector and syringe is a device that consists of a syringe and a high-pressure injector which are used to inject contrast material into the heart, great vessels, and coronary arteries to study the heart and vessels by x-ray photography.
(b) Classification. Class II (performance standards).

§ 870.1660  Indicator injector.
(a) Identification. An indicator injector is an electrically or gas-powered device designed to inject accurately an indicator solution into the bloodstream. This device may be used in conjunction with a densitometer or thermodilution device to determine cardiac output.
(b) Classification. Class II (performance standards).

§ 870.1670  Syringe actuator for an injector.
(a) Identification. A syringe actuator for an injector is an electrical device that controls the timing of an injection by an angiographic or indicator injector and synchronizes the injection with the electrocardiograph signal.
(b) Classification. Class II (performance standards).

§ 870.1750  External programmable pacemaker pulse generator.
(a) Identification. An external programmable pacemaker pulse generators is a device that can be programmed to produce one or more pulses at preselected intervals; this device is used in electrophysiological studies.
