§ 636.202 When are two-phase design-build selection procedures appropriate?

You may consider the following criteria in deciding whether two-phase selection procedures are appropriate. A negative response may indicate that two-phase selection procedures are not appropriate.

(a) Are three or more offers anticipated?

(b) Will offerors be expected to perform substantial design work before developing price proposals?

(c) Will offerors incur a substantial expense in preparing proposals?

(d) Have you identified and analyzed other contributing factors, including:

1. The extent to which you have defined the project requirements?
2. The time constraints for delivery of the project?
3. The capability and experience of potential contractors?
4. Your capability to manage the two-phase selection process?
5. Other criteria that you may consider appropriate?

§ 636.203 What are the elements of two-phase selection procedures for competitive proposals?

The first phase consists of short listing based on a RFQ. The second phase consists of the receipt and evaluation of price and technical proposals in response to a RFP.

§ 636.204 What items may be included in a phase-one solicitation?

You may consider including the following items in any phase-one solicitation:

(a) The scope of work;

(b) The phase-one evaluation factors and their relative weights, including:

1. Technical approach (but not detailed design or technical information);
2. Technical qualifications, such as—
   i. Specialized experience and technical competence;
3. Other appropriate factors (excluding cost or price related factors, which are not permitted in phase-one);
4. Phase-two evaluation factors; and
5. A statement of the maximum number of offerors that will be short listed to submit phase-two proposals.

(i) Capability to perform (including key personnel); and
(ii) Past performance of the members of the offeror’s team (including the architect-engineer and construction members);
(iii) Other appropriate factors (excluding cost or price related factors, which are not permitted in phase-one);
(c) Phase-two evaluation factors; and
(d) A statement of the maximum number of offerors that will be short listed to submit phase-two proposals.

§ 636.205 Can past performance be used as an evaluation criteria?

(a) Yes, past performance information is one indicator of an offeror’s ability to perform the contract successfully. Past performance information may be used as an evaluation criteria in either phase-one or phase-two solicitations. If you elect to use past performance criteria, the currency and relevance of the information, source of the information, context of the data, and general trends in contractor’s performance may be considered.

(b) Describe your approach for evaluating past performance in the solicitation, including your policy for evaluating offerors with no relevant performance history. You should provide offerors an opportunity to identify past or current contracts (including Federal, State, and local government and private) for efforts similar to the current solicitation.

(c) If you elect to request past performance information, the solicitation should also authorize offerors to provide information on problems encountered on the identified contracts and the offeror’s corrective actions. You may consider this information, as well as information obtained from any other sources, when evaluating the offeror’s past performance. You may use your discretion in determining the relevance of similar past performance information.

(d) The evaluation should take into account past performance information regarding predecessor companies, key personnel who have relevant experience, or subcontractors that will perform major or critical aspects of the requirement when such information is relevant to the current acquisition.
