standard of decent, safe, sanitary housing in good repair (DSS/GR), as this standard is defined in 24 CFR 5.703.

(b) Method of assessment. The physical condition assessment is based on an independent physical inspection of a PHA’s projects provided by HUD and performed by contract inspectors, and conducted using HUD’s Uniform Physical Condition Standards (UPCS) under 24 CFR part 5, subpart G.

(c) Method of transmission. After the inspection is completed, the inspector transmits the results to HUD, where the results are verified for accuracy and then scored in accordance with the procedures in this subpart B.

(d) PHA physical inspection requirements. The physical inspections conducted under this part do not relieve the PHA of the responsibility to inspect public housing units, as provided in section 6(f)(3) of the Act (42 U.S.C. 1437d(f)(3)).

(e) Compliance with state and local codes. The physical condition standards in this part do not supersede or preempt state and local building and maintenance codes with which the PHA’s public housing must comply. PHAs must continue to adhere to these codes.

(f) HUD access to PHA projects. All PHAs are required by the ACC to provide HUD or its representative with full and free access to all facilities in its projects. All PHAs are required to provide HUD or its representative with access to its projects and to all units and appurtenances in order to permit physical inspections, monitoring reviews, and quality assurance reviews under this part. Access to the units shall be provided whether or not the resident is home or has installed additional locks for which the PHA did not obtain keys. In the event that the PHA fails to provide access as required by HUD or its representative, the PHA shall be given a physical condition score of zero for the project or projects involved. This score of zero shall be used to calculate the physical condition indicator score and the overall PHAS score.

§ 902.21 Physical condition standards for public housing—decent, safe, and sanitary housing in good repair (DSS/GR).

(a) General. Public housing must be maintained in a manner that meets the physical condition standards set forth in this part in order to be considered DSS/GR (standards that constitute acceptable basic housing conditions). These standards address the major physical areas of public housing: Site, building exterior, building systems, dwelling units, and common areas (see paragraph (b) of this section). These standards also identify health and safety considerations (see paragraph (c) of this section). These standards address acceptable basic housing conditions, not the adornment, décor, or other cosmetic appearance of the housing.

(b) Major inspectable areas. (1) Site. The site includes the components and must meet the requirements of 24 CFR 5.703(a).

(2) Building exterior. The building exterior includes the components and must meet the standards stated in 24 CFR 5.703(b).

(3) Building systems. The building’s systems include components such as domestic water, electrical system, elevators, emergency power, fire protection, heating/ventilation/air conditioning (HVAC), and sanitary system. Each building’s systems must meet the standards of 24 CFR 5.703(c).

(4) Dwelling units. Each dwelling unit within a building must meet the standards of 24 CFR 5.703(d).

(5) Common areas. Each common area must meet the standards of 24 CFR 5.703(e).

(c) Health and safety concerns. All areas and components of the housing must be free of health and safety hazards, as provided in 24 CFR 5.703(f).

§ 902.22 Physical inspection of PHA projects.

(a) The inspection, generally. The PHA’s score for the physical condition indicator is based on an independent physical inspection of a PHA’s project(s) provided by HUD and using HUD’s Uniform Physical Condition Standard (UPCS) inspection protocols to ensure projects meet DSS/GR standards that constitute acceptable basic
