(e) *Effective/applicability date.* This section applies on and after May 1, 2009.

[T.D. 8540, 59 FR 30152, June 10, 1994, as amended by T.D. 8819, 64 FR 23212, Apr. 30, 1999; T.D. 8886, 65 FR 36929, June 12, 2000; T.D. 9448, 74 FR 21484, May 7, 2009; T.D. 9540, 76 FR 49612, Aug. 10, 2011]

§ 20.2031-8 Valuation of certain life insurance and annuity contracts; valuation of shares in an open-end investment company.

(a) *Valuation of certain life insurance and annuity contracts.* (1) The value of a contract for the payment of an annuity, or an insurance policy on the life of a person other than the decedent, issued by a company regularly engaged in the selling of contracts of that character is established through the sale by that company of comparable contracts. An annuity payable under a combination annuity contract and life insurance policy on the decedent's life (e.g., a "retirement income" policy with death benefit) under which there was no insurance element at the time of the decedent's death (see paragraph (d) of § 20.2039-1) is treated like a contract for the payment of an annuity for purposes of this section.

(2) As valuation of an insurance policy through sale of comparable contracts is not readily ascertainable when, at the date of the decedent's death, the contract has been in force for some time and further premium payments are to be made, the value may be approximated by adding to the interpolated terminal reserve at the date of the decedent's death the proportionate part of the gross premium last paid before the date of the decedent's death which covers the period extending beyond that date. If, however, because of the unusual nature of the contract such an approximation is not reasonably close to the full value of the contract, this method may not be used.

(3) The application of this section may be illustrated by the following examples. In each case involving an insurance contract, it is assumed that

there are no accrued dividends or outstanding indebtedness on the contract.

Example (1). X purchased from a life insurance company a joint and survivor annuity contract under the terms of which X was to receive payments of \$1,200 annually for his life and, upon X's death, his wife was to receive payments of \$1,200 annually for her life. Five years after such purchase, when his wife was 50 years of age, X died. The value of the annuity contract at the date of X's death is the amount which the company would charge for an annuity providing for the payment of \$1,200 annually for the life of a female 50 years of age.

Example (2). Y died holding the incidents of ownership in a life insurance policy on the life of his wife. The policy was one on which no further payments were to be made to the company (e.g., a single premium policy or a paid-up policy). The value of the insurance policy at the date of Y's death is the amount which the company would charge for a single premium contract of the same specified amount on the life of a person of the age of the insured.

Example (3). Z died holding the incidents of ownership in a life insurance policy on the life of his wife. The policy was an ordinary life policy issued nine years and four months prior to Z's death and at a time when Z's wife was 35 years of age. The gross annual premium is \$2,811 and the decedent died four months after the last premium due date. The value of the insurance policy at the date of Z's death is computed as follows:

Terminal reserve at end of tenth year	\$14,601.00
Terminal reserve at end of ninth year	12,965.00
Increase	1,636.00
One-third of such increase (Z having died four months following the last preceding premium date) is	545.33
Terminal reserve at end of ninth year	12,965.00
Interpolated terminal reserve at date of Z's death	13,510.33
Two-thirds of gross premium (2/3 x \$2,811)	1,874.00
Value of the insurance policy	15,384.33

(b) *Valuation of shares in an open-end investment company.* (1) The fair market value of a share in an open-end investment company (commonly known as a "mutual fund") is the public redemption price of a share. In the absence of an affirmative showing of the public redemption price in effect at the time of death, the last public redemption price quoted by the company for the date of death shall be presumed to be the applicable public redemption price. If the alternate valuation method under 2032 is elected, the last public redemption

price quoted by the company for the alternate valuation date shall be the applicable redemption price. If there is no public redemption price quoted by the company for the applicable valuation date (e.g., the valuation date is a Saturday, Sunday, or holiday), the fair market value of the mutual fund share is the last public redemption price quoted by the company for the first day preceding the applicable valuation date for which there is a quotation. In any case where a dividend is declared on a share in an open-end investment company before the decedent's death but payable to shareholders of record on a date after his death and the share is quoted "exdividend" on the date of the decedent's death, the amount of the dividend is added to the ex-dividend quotation in determining the fair market value of the share as of the date of the decedent's death. As used in this paragraph, the term "open-end investment company" includes only a company which on the applicable valuation date was engaged in offering its shares to the public in the capacity of an open-end investment company.

(2) The provisions of this paragraph shall apply with respect to estates of decedents dying after August 16, 1954.

[T.D. 6680, 28 FR 10872, Oct. 10, 1963, as amended by T.D. 7319, 39 FR 26723, July 23, 1974]

§ 20.2031-9 Valuation of other property.

The valuation of any property not specifically described in §§ 20.2031-2 to 20.2031-8 is made in accordance with the general principles set forth in § 20.2031-1. For example, a future interest in property not subject to valuation in accordance with the actuarial principles set forth in § 20.2031-7 is to be valued in accordance with the general principles set forth in § 20.2031-1.

§ 20.2032-1 Alternate valuation.

(a) *In general.* In general, section 2032 provides for the valuation of a decedent's gross estate at a date other than the date of the decedent's death. More specifically, if an executor elects the alternate valuation method under section 2032, the property included in the decedent's gross estate on the date of

his death is valued as of whichever of the following dates is applicable:

(1) Any property distributed, sold, exchanged, or otherwise disposed of within 6 months (1 year, if the decedent died on or before December 31, 1970) after the decedent's death is valued as of the date on which it is first distributed, sold, exchanged, or otherwise disposed of;

(2) Any property not distributed, sold, exchanged, or otherwise disposed of within 6 months (1 year, if the decedent died on or before December 31, 1970) after the decedent's death is valued as of the date 6 months (1 year, if the decedent died on or before December 31, 1970) after the date of the decedent's death;

(3) Any property, interest, or estate which is affected by mere lapse of time is valued as of the date of the decedent's death, but adjusted for any difference in its value not due to mere lapse of time as of the date 6 months (1 year, if the decedent died on or before December 31, 1970) after the decedent's death, or as of the date of its distribution, sale, exchange, or other disposition, whichever date first occurs.

(b) *Method and effect of election*—(1) *In general.* The election to use the alternate valuation method is made on the return of tax imposed by section 2001. For purposes of this paragraph (b), the term *return of tax imposed by section 2001* means the last estate tax return filed by the executor on or before the due date of the return (including extensions of time to file actually granted) or, if a timely return is not filed, the first estate tax return filed by the executor after the due date, provided the return is filed no later than 1 year after the due date (including extensions of time to file actually granted). Once the election is made, it is irrevocable, provided that an election may be revoked on a subsequent return filed on or before the due date of the return (including extensions of time to file actually granted). The election may be made only if it will decrease both the value of the gross estate and the sum (reduced by allowable credits) of the estate tax and the generation-skipping transfer tax payable by reason of the decedent's death with respect to the property includible in the decedent's
