trimming of timber, the cutting, hauling, and transportation of timber, logs, pulpwood, cordwood, lumber, and like products, the sawing of logs into lumber or the conversion of logs into ties, posts, and similar products, and similar operations. It also includes the piling, stacking, and storing of all such products. The gathering of wild plants and of wild or planted Christmas trees are included. (See the related discussion in §§780.205 through 780.209 and in part 788 of this chapter which considers the section 13(a)(13) exemption for forestry or logging operations in which not more than eight employees are employed.) “Wood working” as such is not included in “forestry” or “lumbering” operations. The manufacture of charcoal under modern methods is neither a “forestry” nor “lumbering” operation and cannot be regarded as “agriculture.”

§ 780.204 Number of employees engaged in operations not material.

The fact that the employer employs fewer than a certain number of employees in forestry and lumbering operations does not provide a basis for their being considered as agricultural employees. This is to be distinguished from the exemption provided by section 13(a)(13) (discussed in part 788 of this chapter) which is limited to employers employing not more than eight employees in the forestry or logging operations described therein.

NURSERY AND LANDSCAPING OPERATIONS

§ 780.205 Nursery activities generally.

The employees of a nursery who are engaged in the following activities are employed in “agriculture”:

(a) Sowing seeds and otherwise propagating fruit, nut, shade, vegetable, and ornamental plants or trees (but not Christmas trees), and shrubs, vines, and flowers;

(b) Handling such plants from propagating frames to the field;

(c) Planting, cultivating, watering, spraying, fertilizing, pruning, bracing, and feeding the growing crop.

§ 780.206 Planting and lawn mowing.

(a) The planting of trees and bushes is within the scope of agriculture where it constitutes a step in the production, cultivation, growing, and harvesting of agricultural or horticultural commodities, or where it constitutes a practice performed by a farmer or on a farm as an incident to or in conjunction with farming operations (as where it is part of the subordinate marketing
§ 780.207  Operations with respect to wild plants.

Nurseries frequently obtain plants growing wild in the woods or fields which are to be further cultivated by the nursery before they are sold by it. Obtaining such plants is a practice which is incidental to farming operations. The activities are therefore within the scope of agriculture if performed by a farmer or on a farm. Thus, employees of the nursery are engaged in agriculture when performing these activities. On the other hand, employees of an independent contractor performing these activities off the farm would not be engaged in agriculture. The transplanting of such wild plants in the nursery is performed “on a farm” and is an agricultural activity whether performed by employees of an independent contractor or by employees of the nursery.

§ 780.208  Forest and Christmas tree activities.

Operations in a forest tree nursery such as seeding new beds and growing and transplanting forest seedlings are not farming operations. The planting, tending, and cutting of Christmas trees do not constitute farming operations. If such operations on forest products are within section 3(f), they must qualify under the second part of the definition dealing with incidental practices. (See §780.201.)

[74 FR 26015, May 29, 2009]

§ 780.209  Packing, storage, warehousing, and sale of nursery products.

Employees of a grower of nursery stock who work in packing and storage sheds sorting the stock, grading and trimming it, racking it in bins, and packing it for shipment are employed in “agriculture” provided they handle only products grown by their employer and their activities constitute an established part of their employer’s agricultural activities and are subordinate to his farming operations. Such employees are not employed in agriculture when they handle the products of other growers (Mitchell v. Huntsville Nurseries, 267 F. 2d 286; Jordan v. Stark Bros. Nurseries & Orchards Co., 45 F. Supp. 769). Agricultural activities would typically include employees engaged in the balling and storing of shrubs and trees grown in the nursery. Where a grower of nursery stock operates, as a separate enterprise, a processing establishment or an establishment for the wholesale of retail distribution of such commodities, the employees in such separate enterprise are not engaged in agriculture (see Walling v. Rocklin, 132 F. 2d 3; Mitchell v. Huntsville Nurseries, 267 F. 2d 286). Although the handling and the sale of nursery commodities by the grower at or near the place where they were grown may be incidental to his farming operations, the character of these operations changes when they are performed in an establishment set up as a marketing point to aid the distribution of those products.
