(2) Administer the pre-test to students at a uniform time, according to its State’s assessment policy; and
(3) Administer pre-tests to students in the skill areas identified in its State’s assessment policy.

(c) Post-test. A local eligible provider must—
(1) Administer a post-test to measure a student’s educational functioning level after a set time period or number of instructional hours;
(2) Administer the post-test to students at a uniform time, according to its State’s assessment policy;
(3)(i) Administer post-tests with a secure, parallel, equated form of the same test—either traditional paper and pencil or computer-administered instruments—for which forms are constructed prior to administration to examinees to pre-test and determine the initial placement of students; or
(ii) Administer post-tests with an adaptive test that uses computerized algorithms for selecting and administering items in real time; however, for such an instrument, the size of the item pool and the method of item selection must ensure negligible overlap in items across pre- and post-testing; and
(4) Administer post-tests to students in the same skill areas as the pre-test.

(d) Other requirements. (1) A local eligible provider must administer a test using only staff who have been trained to administer the test.
(2) A local eligible provider may use the results of a test in the NRS only if the test was administered in a manner that is consistent with the State’s assessment policy and the test publisher’s guidelines.

§ 462.42 How are tests used to place students at an NRS educational functioning level?

(a) A local eligible provider must use the results of the pre-test described in § 462.41(b) to initially place students at the appropriate NRS educational functioning level.

(b) A local eligible provider must use the results of the post-test described in § 462.41(c)—

(1) To determine whether students have completed one or more educational functioning levels or are progressing within the same level; and
(2) To place students at the appropriate NRS educational functioning level.

(c)(1) States and local eligible providers are not required to use all of the skill areas described in the NRS educational functioning levels to place students.
(2) States and local eligible providers must test and report on the skill areas most relevant to the students’ needs and to the programs’ curriculum.

(d)(1) If a State’s assessment policy requires a local eligible provider to test a student in multiple skill areas and the student will receive instruction in all of the skill areas, the local eligible provider must place the student in an educational functioning level that is equivalent to the student’s lowest test score for any of the skill areas tested under § 462.41(b) and (c).
(2) If a State’s assessment policy requires a local eligible provider to test a student in multiple skill areas, but the student will receive instruction in fewer than all of the skill areas, the local eligible provider must place the student in an educational functioning level that is equivalent to the student’s lowest test score for any of the skill areas—
(i) Tested under § 462.41(b) and (c); and
(ii) In which the student will receive instruction.

§ 462.43 How is educational gain measured?

(a)(1) Educational gain is measured by comparing the student’s initial educational functioning level, as measured by the pre-test described in § 462.41(b), with the student’s educational functioning level as measured by the post-test described in § 462.41(c).

Example: A State’s assessment policy requires its local eligible providers to test students in reading and numeracy. The student scores lower in reading than in numeracy. As described in § 462.42(d)(1), the local eligible provider would use the student’s reading
