providers (public agency or private sector).

(d) Statement of priorities and implementation strategies. Description of the priorities set by the local government as related to the deficiencies outlined above, and the strategies used to allocate available resources over time. Included should be a brief discussion of the relationship of the Preliminary Action Program to other related community development, historic preservation and urban revitalization efforts underway in the jurisdiction.

(e) Evidence of public participation. A description of the means by which citizens and public officials will be included early in the decision process for project selection, the setting of priorities and schedules, and the development of implementation strategies. Existing public participation efforts within the jurisdiction should be used.

§ 72.17 Preliminary Action Program—commitments to be included.

Local governments may submit a Preliminary Action Program during the initial interim period in lieu of a full Action Program. The Preliminary Action Program must include a firm commitment by the local government to complete and adopt a full Action Program by October 1, 1980. This commitment must include a schedule for the development of the full Recovery Action Program. The schedule should outline the activities which will be undertaken, the anticipated time frame for the development and completion of these activities, and the resources of people, money and support services necessary for the development and completion of the Recovery Action Program. Notwithstanding the foregoing provisions concerning the use of the Preliminary Action Program, local governments are encouraged to prepare, adopt and submit as soon as possible a full Action Program which complies with the provisions of §§72.11, 72.12, and 72.13. Local governments which have already made a commitment to park and recreation systems by establishing ongoing planning, rehabilitation, service, operation and maintenance programs may use these as a starting point for the meeting Action Program requirements.

§ 72.18—72.29 [Reserved]

Subpart C—Grants for Recovery Action Program Development, Rehabilitation and Innovation

§ 72.30 General requirements.

Applicants must have an approved Recovery Action Program on file with the appropriate NPS Regional Office prior to applying for Rehabilitation or Innovation grants. Rehabilitation and Innovation proposals must be based on priorities identified in the applicant jurisdiction’s Recovery Action Program. Once NPS has indicated that a Rehabilitation or Innovation proposal is fundable, the applicant must meet all documentation requirements imposed by OMB Circulars A–102, A–95 and FMC 74–4. Regional offices of NPS will provide technical assistance to grantees in complying with these requirements.

§ 72.31 [Reserved]

§ 72.32 Funding and matching share.

(a) Recovery Action Program Grant Matching. Up to 50 percent matching grants are authorized for the preparation of Recovery Action Programs (RAP). State, local and private in-kind donations of assistance (salaries, supplies, printing, etc.) for the preparation of a RAP may be used as all or part of the 50 percent local match. Such in-kind contributions for the UPARR Program may not be used as the matching share for other federally-assisted programs. In addition, Section 1009 of the Act provides that reasonable local costs of Recovery Action Program development may be used as part of a local match for Innovation or Rehabilitation grants only when the applicant has not received a Recovery Action Program grant. Reasonable costs means costs for supplies, salaries, etc., which are not excessive in relation to the normal market value within a geographic area. These costs must be well documented and included in the preapplication for the proposal in which they are to be used as a match.
The match can only be used once, and allowed only after the RAP Has been approved by the respective NPS Regional Office.

(b) Rehabilitation and Innovation grant matching. The program provides for a 70 percent Federal match for rehabilitating existing recreation facilities and areas. Seventy percent matching funds are also authorized to local governments for innovation grants which will address systemwide coordination, management and community resource problems through innovative and cost-effective approaches.

(c) Sources of Matching Share—(1) State Incentive. As an incentive for State involvement in the recovery or urban recreation systems, the Federal government will match, dollar for dollar, State contributions to the local share of an Innovation or Rehabilitation grant; up to 15 percent of the approved grant. The Federal share will not exceed 85 percent of the approved grant. The Director shall also encourage States and private interests to contribute to the non-Federal share of project costs. State and local government shares may be derived from any State or local government source of revenue.

(2) Cash. State, local and private funds may be used as the non-Federal share of project costs. In addition, two types of Federal funds may be used as part of a local match: General Revenue Sharing (Treasury Department) and Community Development Block Grant (CDBG) program funds (Department of Housing and Urban Development) [See also §72.56(b)]. Section 1009 of the UPARR Act prohibits use of any other type of Federal grant to match UPARR grants.

(3) Non-Cash—(i) Material goods. NPS encourages in-kind contributions including real property, buildings or building materials, and equipment to applicants by the State, other public agencies, private organizations or individuals. The value of the contributions may be used as all or part of the matching share of project costs, but must be appraised and approved by the Service prior to grant approval. Details regarding these types of donations are covered in OMB Circular A-102. In-kind contributions for the UPARR Program may not be used as the matching share for other Federally-assisted programs.

(ii) Services. Any type of service or assistance which relates directly to a grant and the provision of a recreation opportunity, can be used as a matching share; e.g., technical and planning services, construction labor, playground supervision or management services.

§72.33 Timing and duration of projects.

(a) Construction components of projects must be initiated during the first full construction season following grant approval. The time for completing construction components of either Rehabilitation or Innovation proposals will be limited to three years or three construction seasons, whichever is greater, unless in the opinion of the Director an extension of time not to exceed a designated period will assure that completion of the grant objectives will be cost-effective within funding currently available, in accord with established goals of the UPARR Program, and of benefit to the federal government. Any component of an Innovation proposal which is to provide services or programs, must be started within one year from grant approval. The grant project term and expiration date for Rehabilitation and Innovation proposals will be established by NPS at the time of grant approval.

(b) When an applicant wishes to complete a project in a number of stages, the applicant may request UPARR assistance for all the stages in a single application or proposal. In such cases, the three year limit on construction still applies. If an applicant wishes to request funding for only a single stage at time, each stage must be structured in such a manner that it will increase the recreation utility of the property, or provide direct recreation opportunities, independent of subsequent stages. Funding of one stage of a multi-staged proposal in no way implies that subsequent stages will also be funded.
