Table 4 to Subpart RRRR of Part 63—Default Organic HAP Mass Fraction for Petroleum Solvent Groups

You May Use the Mass Fraction Values in the Following Table for Solvent Blends for Which You Do Not Have Test Data or Manufacturer’s Formulation Data:

<table>
<thead>
<tr>
<th>Solvent type</th>
<th>Average organic HAP mass fraction</th>
<th>Typical organic HAP, percent by mass</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aliphatic</td>
<td>0.03</td>
<td>1% Xylenes, 1% Toluene, and 1% Ethylbenzene.</td>
</tr>
<tr>
<td>Aromatic</td>
<td>0.06</td>
<td>4% Xylenes, 1% Toluene, and 1% Ethylbenzene.</td>
</tr>
</tbody>
</table>

1 Use this table only if the solvent blend does not match any of the solvent blends in Table 3 to this subpart and you only know whether the blend is aliphatic or aromatic.

Subpart SSSS—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Coil

Source: 67 FR 39812, June 10, 2002, unless otherwise noted.

What This Subpart Covers

§ 63.5080 What is in this subpart?
This subpart describes the actions you must take to reduce emissions of hazardous air pollutants (HAP) if you own or operate a facility that performs metal coil surface coating operations and is a major source of HAP. This subpart establishes emission standards and states what you must do to comply. Certain requirements apply to all who must comply with the subpart; others depend on the means you use to comply with an emission standard.

§ 63.5090 Does this subpart apply to me?
(a) The provisions of this subpart apply to each facility that is a major source of HAP, as defined in §63.2, at which a coil coating line is operated, except as provided in paragraph (b) of this section.
(b) This subpart does not apply to any coil coating line that meets the criteria of paragraph (b)(1) or (2) of this section.
1 A coil coating line that is part of research or laboratory equipment.
2 A coil coating line on which at least 85 percent of the metal coil coated, based on surface area, is less than 0.15 millimeter (0.006 inch) thick, except as provided in paragraph (c) of this section.
(c) If you operate a coating line subject to subpart JJJJ of this part that also meets the criteria in either paragraph (c)(1) or (2) of this section, and you choose to comply with the requirements of this subpart, then such compliance constitutes compliance with subpart JJJJ. The coating line for which you choose this option is, therefore, included in the affected source for this subpart as defined in §63.3110 and shall not be included in the affected source for subpart JJJJ as defined in §63.3300.
1 A coil coating line on which at least 85 percent of the metal coil coated, based on surface area, is less than 0.15 millimeter (0.006 inch) thick, regardless of the percentage of surface area of each thickness coated.
