§ 80.1502 What are the survey requirements related to gasoline-ethanol blends?

Any gasoline refiner, gasoline importer, ethanol blender, ethanol producer, or ethanol importer who manufactures, introduces into commerce, sells or offers for sale E15, gasoline, blendstock for oxygenate blending, ethanol, or gasoline-ethanol blend that is intended for use in or as E15 shall comply with the survey program requirements in either paragraph (a) or paragraph (b) of this section. These same parties are also subject to paragraphs (c), (d) and (e) of this section regardless of whether they choose the survey program requirements in paragraph (a) or paragraph (b) of this section. In the case of ethanol producers and ethanol importers, the ethanol that is produced or imported shall be deemed as intended for use in E15 unless an ethanol producer or an ethanol importer demonstrates that it was not intended for such use.

(a) Survey option 1. In order to satisfy the survey program requirements, any gasoline refiner, gasoline importer, ethanol blender, ethanol producer, or ethanol importer who manufactures, introduces into commerce, sells or offers for sale E15, gasoline, blendstock for oxygenate blending, ethanol, or gasoline-ethanol blend intended for use in or as E15 shall properly conduct a program of compliance surveys in accordance with a survey program plan which has been approved by EPA in all areas which may be reasonably expected to be supplied with their gasoline, blendstock for oxygenate blending, ethanol, or gasoline-ethanol blend if these may be used to manufacture E15 or as E15 at any time during the year. Such approval shall be based upon the survey program plan meeting the following criteria:

(1) The survey program shall consist of at least quarterly surveys which shall occur during the following time periods in every year during which the gasoline refiner, gasoline importer, ethanol blender, ethanol producer, or ethanol importer introduces E15 into commerce:

(i) One survey during the period January 1 through March 31;
(ii) One survey during the period April 1 through June 30;
(iii) One survey during the period July 1 through September 30; and
(iv) One survey during the period October 1 through December 31.

(2) The survey program plan shall meet all of the requirements of paragraph (b), except paragraphs (b)(4)(ii) and (b)(4)(v) of this section. The survey program plan shall specify the sampling strata, clusters and area, and number of samples to be included. Notwithstanding paragraph (b)(2) of this section, in order to comply with this paragraph the survey plan need not be conducted by a consortium.

(b) Survey option 2. (1) To comply with the requirements under this paragraph (b), any gasoline refiner, gasoline importer, ethanol blender, ethanol producer, or ethanol importer who manufactures, introduces into commerce, sells or offers for sale E15, gasoline, blendstock for oxygenate blending, ethanol, or gasoline-ethanol blend intended for use in or as E15 must participate in a consortium which arranges to have an independent survey association conduct a statistically valid program of compliance surveys pursuant to a survey program plan which has been approved by EPA, in accordance with the requirements of paragraphs (b)(2) through (b)(4) and (b)(6) of this section.

(2) The consortium survey program under this paragraph (b) must be:

(i) Planned and conducted by a survey association that is independent of the ethanol blenders, ethanol producers, ethanol importers, gasoline refiners, and/or gasoline importers that...
arrange to have the survey conducted. In order to be considered independent:

(A) Representatives of the survey association shall not be an employee of any ethanol blender, ethanol producer, gasoline refiner, or gasoline importer;

(B) The survey association shall be free from any obligation to or interest in any ethanol blender, ethanol producer, gasoline refiner, or gasoline importer; and

(C) The ethanol blenders, ethanol producers, gasoline refiners, and/or gasoline importers that arrange to have the survey conducted shall be free from any obligation to or interest in the survey association.

(ii) Conducted at retail outlets that sell gasoline; and

(iii) Represent all gasoline dispensed nationwide.

(3) Independent Survey Association Requirements. The consortium described in paragraph (b)(1) of this section shall require the independent survey association conducting the surveys to:

(i) Submit to EPA for approval each calendar year a proposed survey program plan in accordance with the requirements of paragraph (b)(4) of this section.

(ii) Obtain samples of gasoline offered for sale at gasoline retail outlets in accordance with the survey program plan approved under this paragraph (b), or immediately notify EPA of any refusal of retail outlets to allow samples to be taken.

(iii) Test, or arrange to be tested, the samples required under paragraph (b)(3)(ii) of this section for Reid vapor pressure (RVP), and oxygenate content as follows:

(A) Samples collected at retail outlets shall be shipped the same day the samples are collected via ground service to the laboratory and analyzed for oxygenate content. Samples collected at a dispenser labeled E15 in any manner, or at a tank serving such a dispenser, shall also be analyzed for RVP. Such analysis shall be completed within 10 days after receipt of the sample in the laboratory. Nothing in this section shall be interpreted to require RVP testing of a sample from any dispenser or tank serving it unless the dispenser is labeled E15 in any manner.

(B) Any laboratory to be used by the independent survey association for oxygenate or RVP testing shall be approved by EPA and its test method for determining oxygenate content shall be a method permitted under §80.46(g), and its test method for determining RVP shall be the method permitted under §80.46(b).

(iv) In the case of any test that yields a result that does not match the label affixed to the product (e.g., a sample greater than 15.0 volume percent ethanol dispensed from a fuel dispenser labeled as “E15” or a sample containing greater than 10.0 volume percent ethanol and not more than 15.0 volume percent ethanol dispensed from a fuel dispenser not labeled as “E15”), or the RVP standard of §80.27(a)(2), the independent survey association shall, within 24 hours after the laboratory receives the sample, send notification of the test result as follows:

(A) In the case of a sample collected at a retail outlet at which the brand name of a gasoline refiner or gasoline importer is displayed, to the gasoline refiner or gasoline importer, and EPA. This initial notification to a gasoline refiner or gasoline importer shall include specific information concerning the name and address of the retail outlet, contact information, the brand, and the ethanol content, and the RVP if required, of the sample.

(B) In the case of a sample collected at other retail outlets, to the retailer and EPA, and such notice shall contain the same information as in paragraph (b)(3)(iv)(A) of this section.

(C) The independent survey association shall provide notice to the identified contact person or persons for each party in writing (which includes e-mail or facsimile) and, if requested by the identified contact person, by telephone.

(v) Confirm that each fuel dispenser sampled is labeled as required in §80.1501 by confirming that:

(A) The label meets the appearance and content requirements of §80.1501.

(B) The label is located on the fuel dispenser according to the requirements in §80.1501.

(vi) In the case of a fuel dispenser that is improperly labeled, or whose fuel does not meet the RVP standards of §80.27(a)(2) the survey association
shall provide notice as provided in paragraphs (b)(2)(iv)(A) through (C) of this section.

(vii) Provide to EPA quarterly and annual summary survey reports which include the information specified in paragraph (b)(5) of this section.

(viii) Maintain all records relating to the surveys conducted under this paragraph (b) for a period of at least five (5) years.

(ix) Permit any representative of EPA to monitor at any time the conducting of the surveys, including sample collection, transportation, storage, and analysis.

(4) Survey Plan Design Requirements. The proposed survey program plan required under paragraph (b)(3)(i) of this section shall, at a minimum, include the following:

(i) Number of Surveys. The survey program plan shall include four quarterly surveys each calendar year. The four quarterly surveys collectively are called the survey series as defined in §80.1500.

(ii) Sampling Areas. The survey program plan shall include sampling in all sampling strata, as defined in §80.1500, during each survey. These sampling strata shall be further divided into discrete sampling areas or clusters. Each survey shall include sampling in at least 40 sampling areas in each stratum which are randomly selected.

(iii) No advance notice of surveys. The survey plan shall include procedures to keep the identification of the sampling areas that are included in any survey plan confidential from any regulated party prior to the beginning of a survey in an area. However, this information shall not be kept confidential from EPA.

(iv) Retail outlet selection. (A) The retail outlets to be sampled in a sampling area shall be selected from among all retail outlets in the sampling area that sell gasoline, with the probability of selection proportionate to the volume of gasoline sold at the retail outlets; the sample should also include retail outlets with different brand names as well as those retail outlets that are unbranded.

(B) In the case of any retail outlet from which a sample of gasoline was collected during a survey and determined to have an ethanol content that does not match the fuel dispenser label (e.g., a sample greater than 15.0 volume percent ethanol dispensed from a fuel dispenser labeled as “E15” or a sample with greater than 10.0 volume percent ethanol and not more than 15.0 volume percent ethanol dispensed from a fuel dispenser not labeled as “E15”) or determined to have a dispenser containing fuel whose RVP does not comply with §80.27(a)(2), that retail outlet shall be included in the subsequent survey.

(C) One sample of each product dispensed as gasoline shall be collected at each retail outlet, and separate samples shall be taken that represent the gasoline contained in each gasoline storage tank unless collection of separate samples is not practicable.

(v) Number of samples. (A) The minimum number of samples to be included in the survey plan for each calendar year shall be calculated as follows:

\[
n = \frac{\left(Z_\alpha + Z_\beta \right)^2}{4 \left( \text{arc} \sin \left( \sqrt{\phi} \right) - \text{arc} \sin \left( \sqrt{\phi_b} \right) \right)^2} \times S_t \times F_o \times F_b \times S_u
\]

Where:

- \( n \) = minimum number of samples in a year-long survey series. However, in no case shall \( n \) be smaller than 7,500.
- \( Z_\alpha \) = upper percentile point from the normal distribution to achieve a one-tailed 95% confidence level (5% \( \alpha \)-level). Thus, \( Z_\alpha \) equals 1.645.
- \( Z_\beta \) = upper percentile point to achieve 95% power. Thus, \( Z_\beta \) equals 1.645.

1 = the maximum proportion of non-compliant stations for a region to be deemed compliant. In this test, the parameter needs to be 5% or greater, i.e., 5% or more of the stations, within a stratum such that the region is considered non-compliant. For this survey, \( 1 \) will be 5%.

\( \phi \) = the underlying proportion of non-compliant stations in a sample. For the first
survey plan, \( o \) = will be 2.3%. For subsequent survey plans, \( o \) = will be the average of the proportion of stations found to be non-compliant over the previous four surveys.

\[ St_n = \text{number of sampling strata. For purposes of this survey program, } St_n \text{ equals 3.} \]

\[ F_s = \text{adjustment factor for the number of extra samples required to compensate for collected samples that cannot be included in the survey, based on the number of additional samples required during the previous four surveys. However, in no case shall the value of } F_s \text{ be smaller than 1.1.} \]

\[ F_a = \text{adjustment factor for the number of samples required to resample each retail outlet with test results exceeding the labeled amount (e.g., a sample greater than 15.0 volume percent ethanol dispensed from a fuel dispenser labeled as "E15", a sample with greater than 10.0 volume percent ethanol and not more than 15.0 volume percent ethanol dispensed from a fuel dispenser not labeled as "E15"), or a sample dispensed from a fuel dispenser labeled as "E15" with greater than the applicable seasonal and geographic RVP pursuant to } \S 80.27, \text{ based on the rate of resampling required during the previous four surveys. However, in no case shall the value of } F_a \text{ be smaller than 1.1.} \]

\[ Su_n = \text{number of surveys per year. For purposes of this survey program, } Su_n \text{ equals 4.} \]

(B) The number of samples determined pursuant to paragraph (b)(4)(v)(A) of this section, after being incremented as necessary to allocate whole numbers of samples to each cluster, shall be distributed approximately equally for the quarterly surveys conducted during the calendar year.

(5) Summary survey reports. The quarterly and annual summary survey reports required under paragraph (b) of this section must be submitted to EPA in an electronic spreadsheet.

(c) Procedures for obtaining approval of survey plan and providing required notices. The first year in which a survey program is conducted may consist of only a portion of a calendar year ending on December 31 (i.e., in the initial year, a survey program may begin on a date after January 1, but would still end on December 31). Subsequent survey programs shall be conducted on a calendar year basis. The procedure for obtaining EPA approval of a survey program plan under paragraph (b) or paragraph (c) of this section is as follows:

(1) For the first year in which a survey will be conducted, a survey program plan that complies with the requirements of paragraph (a) or paragraph (b) of this section must be submitted to EPA no later than 60 days prior to the date on which the survey program is to begin.

(2) For subsequent years in which a survey will be conducted, a survey program plan that complies with the requirements of paragraph (a) or paragraph (b) of this section must be submitted to EPA no later than November 1 of the year preceding the calendar year in which the survey will be conducted.

(3) The survey program plan must be signed by a responsible officer of the
§ 80.1503 40 CFR Ch. 1 (7–1–12 Edition)

What are the product transfer document requirements for gasoline-ethanol blends, gasolines, and conventional blendstocks for oxygenate blending subject to this subpart?

(a) Product transfer documentation for conventional blendstock for oxygenate blending, or gasoline transferred upstream of an ethanol blending facility.

§ 80.1503  What are the product transfer document requirements for gasoline-ethanol blends, gasolines, and conventional blendstocks for oxygenate blending subject to this subpart?

(a) Product transfer documentation for conventional blendstock for oxygenate blending, or gasoline transferred upstream of an ethanol blending facility.

(1) In addition to any other product transfer document requirements under 40 CFR part 80, on each occasion after October 31, 2011, when any person transfers custody or title to any conventional blendstock for oxygenate blending subject to this subpart, the transferor must submit the following documentation:

(1) A signed copy of the agreement between the transferor and the transferee, which includes the following:

(a) The name of the transferor and the transferee;

(b) The dates of the transfer; and

(c) The amount of the transfer.

(2) The transferor must maintain the signed copy of the agreement in a manner that ensures its availability for review by the Environmental Protection Agency (EPA) for a period of at least 5 years after the date of the transfer.

(3) The transferor must provide EPA with a copy of the signed copy of the agreement within 15 days after the date of the transfer.

(4) The transferor must maintain a record of all transfers of conventional blendstocks for oxygenate blending subject to this subpart, which includes the following:

(a) The name of the transferor and the transferee;

(b) The dates of the transfer; and

(c) The amount of the transfer.

(5) The transferor must provide EPA with a copy of the record of all transfers within 15 days after the date of the transfer.

(6) The transferor must maintain the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(7) The transferor must provide EPA with a copy of the signed copy of the agreement and the record of all transfers within 15 days after the date of the transfer.

(8) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(9) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(10) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(11) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(12) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(13) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(14) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(15) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(16) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(17) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(18) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(19) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(20) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(21) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(22) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(23) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(24) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(25) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(26) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(27) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(28) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(29) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.

(30) The transferor must maintain the signed copy of the agreement and the record of all transfers in a manner that ensures its availability for review by the EPA for a period of at least 5 years after the date of the transfer.
