(c) The dealer shall display the booklet applicable to each model year automobile offered for sale at the location.
[71 FR 77954, Dec. 27, 2006]

§ 600.407–08 Booklets displayed by dealers.

(a) Booklets displayed by dealers in order to fulfill the obligations of § 600.405 may be either
(1) The printed copy of the annual Fuel Economy Guide published by the Department of Energy, or;
(2) Optionally, dealers may display the Fuel Economy Guide on a computer that is linked to the electronic version of the Fuel Economy Guide (available at http://www.fueleconomy.gov), or;
(3) A booklet approved by the Administrator of EPA containing the same information, format, and order as the Fuel Economy Guide published by the Department of Energy. Such a booklet may highlight the dealer’s product line by contrasting color of ink or boldface type and may include other supplemental information regarding the dealer’s product line subject to approval by the Administrator.

(b) A manufacturer’s name and logo or a dealer’s name and address or both may appear on the back cover of the hard copies of the Fuel Economy Guide.

Subpart F—Procedures for Determining Manufacturer’s Average Fuel Economy and Manufacturer’s Average Carbon-Related Exhaust Emissions

SOURCE: 42 FR 45662, Sept. 12, 1977, unless otherwise noted.

§ 600.502 Definitions.

The following definitions apply to this subpart in addition to those in § 600.002:
(a) The Declared value of imported components shall be:
(1) The value at which components are declared by the importer to the U.S. Customs Service at the date of entry into the customs territory of the United States; or
(2) With respect to imports into Canada, the declared value of such components as if they were declared as imports into the United States at the date of entry into Canada; or
(3) With respect to imports into Mexico, the declared value of such components as if they were declared as imports into the United States at the date of entry into Mexico.
(c) Equivalent petroleum-based fuel economy value means a number representing the average number of miles traveled by an electric vehicle per gallon of gasoline.

§ 600.507–08 Running change data requirements.

(a) Except as specified in paragraph (d) of this section, the manufacturer shall submit additional running change fuel economy data as specified in paragraph (b) of this section for any running change approved or implemented under §§ 86.079–32, 86.079–33, or 86.082–34 or 86.1842–01 as applicable, which:
(1) Creates a new base level or,
(2) Affects an existing base level by:
(i) Adding an axle ratio which is at least 10 percent larger (or, optionally, 10 percent smaller) than the largest axle ratio tested.
(ii) Increasing (or, optionally, decreasing) the road-load horsepower for a subconfiguration by 10 percent or more for the individual running change or, when considered cumulatively, since original certification (for each cumulative 10 percent increase using the originally certified road-load horsepower as a base),
(iii) Adding a new subconfiguration by increasing (or, optionally, decreasing) the equivalent test weight for any...
Environmental Protection Agency § 600.507–12

(a) Except as specified in paragraph (d) of this section, the manufacturer shall submit additional running change fuel economy and carbon-related exhaust emissions data as specified in paragraph (b) of this section for any running change approved or implemented under §86.1842 of this chapter, which:
(1) Creates a new base level or;
(2) Affects an existing base level by:
(i) Adding an axle ratio which is at least 10 percent larger (or, optionally, 10 percent smaller) than the largest axle ratio tested.
(ii) Increasing (or, optionally, decreasing) the road-load horsepower for a subconfiguration by 10 percent or more for the individual running change or, when considered cumulatively, since original certification (for each cumulative 10 percent increase using the originally certified road-load horsepower as a base).
(iii) Adding a new subconfiguration by increasing (or, optionally, decreasing) the equivalent test weight for any previously tested subconfiguration in the base level.
(iv) Revising the calibration of an electric vehicle, fuel cell vehicle, hybrid electric vehicle, plug-in hybrid electric vehicle or other advanced technology vehicle in such a way that the city or highway fuel economy of the vehicle (or the energy consumption of the vehicle, as may be applicable) is expected to become less fuel efficient (or optionally, more fuel efficient) by 4.0 percent or more as compared to the original fuel economy label values for fuel economy and/or energy consumption, as applicable.

(b) The additional running change fuel economy and carbon-related exhaust emissions data requirement in paragraph (a) of this section will be determined based on the sales of the vehicle configuration created or affected by the running change which has the highest total model year sales. The test vehicle shall be of the subconfiguration created by the running change which has the highest projected total model year sales within the applicable vehicle configuration.

(c) The manufacturer shall submit the fuel economy data required by this section to the Administrator in accordance with §600.314(b).

(d) For those model types created under §600.208–08(a)(2), the manufacturer shall submit data for each subconfiguration added by a running change.
