(n) Public value refers to an asset held by, or a service performed for, or a benefit accruing to the people at large.

(o) Multiple use means the management of the various surface and subsurface resources so that they are utilized in the combination that will best meet the present and future needs of the American people; the most judicious use of the land for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some land for less than all of the resources; and harmonious and coordinated management of the various resources, each with the other, without impairment of the productivity of the land, with consideration being given to the relative values of the various resources, and not necessarily the combination of uses that will give the greatest dollar return or the greatest unit output.

(p) Sustained yield of the several products and services means the achievement and maintenance of a high-level annual or regular periodic output of the various renewable resources of land without impairment of the productivity of the land.

43 CFR Ch. II (10–1–12 Edition)

PART 2410—CRITERIA FOR ALL LAND CLASSIFICATIONS

Subpart 2410—General Criteria

Sec.
2410.1 All classifications.
2410.2 Relative value, disposal or retention.

SOURCE: 35 FR 9560, June 13, 1970, unless otherwise noted.

§ 2410.2 Relative value, disposal or retention.

When, under the criteria of this part, a tract of land has potential for either retention for multiple use management or for some form of disposal, or for more than one form of disposal, the relative scarcity of the values involved and the availability of alternative means and sites for realization of those values will be considered. Long-term public benefits will be weighed against more immediate or local benefits. The tract will then be classified in a manner which will best promote the public interests.
