§ 160.028–5 Marking.
(a) General. Each signal pistol shall be permanently and legibly marked with its serial number, Coast Guard approval number, and the name and address of the manufacturer.
(b) [Reserved]

§ 160.028–6 Container.
(a) General. Containers for the stowage of signal pistols and pistol projected parachute red flare distress signals in lifeboats and life rafts on merchant vessels are not required to have specific approval or to be of specific design except for certain material, marking, and test requirements, which requirements are contained in § 160.024–6 of subpart 160.024.
(b) [Reserved]

§ 160.028–7 Procedure for approval.
(a) Signals are approved by the Coast Guard under the procedures in subpart 159.005 of this chapter.
(b) [Reserved]

Subpart 160.031—Line-Throwing Appliance, Shoulder Gun Type (and Equipment)

SOURCE: CGD 76–048a and 76–048b, 44 FR 73080, Dec. 17, 1979, unless otherwise noted.

§ 160.031–1 Incorporation by reference.
(a) The following Federal specification is incorporated by reference into this subpart:
(b) The Federal specification may be obtained from Customer Service, Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA. 19120 (tel: (215)697–2000). This specification is also on file in the Federal Register library.
(c) Approval to incorporate by reference the material listed in this section was obtained from the Director of the Federal Register on September 24, 1979.

§ 160.031–2 Type and size.
(a) The shoulder gun type line-throwing appliance shall be breech-loading for the cartridge and muzzle-loading for the projectile, of not more than 13 mm (0.50 in.) caliber, chambered for blank rifle cartridges, smooth bored, and properly stocked, with shot line canister attached in a position below the barrel.
(b) [Reserved]

§ 160.031–3 Materials, construction, workmanship, and performance requirements.
(a) All materials used in the construction of shoulder gun type line-throwing appliances and equipment shall be of good quality, suitable for the purpose intended, and shall conform to the requirements of this specification. The choice of materials shall be such that resistance to corrosion by salt water or spray, shock, temperature change, and wear will be obtained. The use of dissimilar metals in combination shall be avoided wherever possible, but when such contacts are necessary, provision shall be made to prevent such deleterious effects as galvanic corrosion, freezing or buckling of moving parts, and loosening or tightening of joints due to difference in coefficients of thermal expansion.
(b) The design and construction shall be proper and substantial for effective and safe operation aboard ship.
(c) The workmanship shall be first class and free from any imperfections of manufacture affecting appearance or serviceability of the gun.
(d) The gun, when loaded and fired in accordance with the manufacturer’s instructions, shall be capable of propelling through relatively still air, the service projectile with service line attached, for a distance of not less than 75 m (250 ft.) with deviation from the target not to exceed 4.5 m (15 ft.) either side.

§ 160.031–4 Equipment for shoulder gun type line-throwing appliance.
(a) Ten service projectiles, each machined from steel or bronze, weighing about 225 g (8 oz.), and having a shank of sufficient length to project slightly beyond the muzzle, with an eye at the upper end for securing the service line.
(b) Four service lines, each not less than 180 m (600 ft.) in length, of 1.5 mm (1⁄16-in.) or more in diameter, woven or braided nylon, very flexible, and having
