§ 78.107 Equipment and installation.

(a) Applications for new cable television relay stations, other than fixed stations, will not be accepted unless the equipment specified therein has been certificated. In the case of fixed stations, the equipment must be authorized under the verification procedure for use pursuant to the provisions of this subpart. Transmitters designed for use in the 31.0 to 31.3 GHz band shall be authorized under the verification procedure.

(1) All transmitters first licensed or marketed shall comply with technical standards of this subpart. This paragraph (b)(1) of this section is effective October 1, 1981.

(2) Neither certification nor verification is required for the following transmitters:

(i) Those which have an output power not greater than 250 mW and which are used in a CARS pickup station operating in the 12.7–13.2 GHz band; and

(ii) Those used under a developmental authorization.

(b) Cable television relay station transmitting equipment authorized to be used pursuant to an application accepted for filing prior to October 1, 1981, may continue to be used, provided, that if operation of such equipment causes harmful interference due to its failure to comply with the technical standards set forth in this subpart, the Commission may, at its discretion, require the licensee to take such corrective action as is necessary to eliminate the interference.

(c) The installation of a CARS station shall be made by or under the immediate supervision of a qualified engineer. Any tests or adjustments requiring the radiation of signals and which could result in improper operation shall be conducted by or under the immediate supervision of a person with required knowledge and skill to perform such tasks.

(d) Simple repairs such as the replacement of tubes, fuses, or other plug-in components which require no particular skill may be made by an unskilled person. Repairs requiring replacement of attached components or the adjustment of critical circuits or corroborative measurements shall be made only by a person with required knowledge and skill to perform such tasks.

§ 78.108 Minimum path lengths for fixed links.

(a) The distance between end points of a fixed link must equal or exceed the value set forth in the table below or the EIRP must be reduced in accordance with the equation set forth below.

<table>
<thead>
<tr>
<th>Frequency band (MHz)</th>
<th>Minimum path length (km)</th>
</tr>
</thead>
<tbody>
<tr>
<td>12,200 to 13,250</td>
<td>5</td>
</tr>
<tr>
<td>Above 17,700</td>
<td>N/A</td>
</tr>
</tbody>
</table>

(b) For paths shorter than those specified in the Table, the EIRP shall not exceed the value derived from the following equation.

\[
EIRP = \text{MAXEIRP} - 40 \log(A/B) \text{ dBW}
\]

Where:

- \( EIRP \) = The new maximum EIRP (equivalent isotropically radiated power) in dBW.
- \( \text{MAXEIRP} \) = Maximum EIRP as set forth in the Table in §74.636 of this part.
- \( A \) = Minimum path length from the Table above for the frequency band in kilometers.
- \( B \) = The actual path length in kilometers.

Note to Paragraph (b): For transmitters using Automatic Transmitter Power Control, EIRP corresponds to the maximum transmitter power available, not the coordinated transmit power or the nominal transmit power.

(c) Upon an appropriate technical showing, applicants and licensees unable to meet the minimum path length requirement may be granted an exception to these requirements.

Note: Links authorized prior to April 1, 1987, are excluded from this requirement, except that, effective April 1, 1992, the Commission will require compliance with the criteria where an existing link would otherwise preclude establishment of a new link.

§ 78.109 Major and minor modifications to stations.

(a) Amendments to applications and modifications to stations are classified
as major or minor. A major modification requires a formal application. A major amendment to an application is treated as a new application.

(b) Major modifications to a station or amendments to an application include, but are not limited to:

(1) Any increase in bandwidth;
(2) Any change in the transmitting antenna system of a station, other than a CARS pickup station, including the direction of the main radiation lobe, directive pattern, antenna gain or transmission line, antenna height or location;
(3) Any change in the type of modulation;
(4) Any change in the location of a station transmitter, other than a CARS pickup station transmitter, except a move within the same building or upon the tower or mast or a change in the area of operation of a CARS pickup station;
(5) Any change in frequency assignment, including polarization;
(6) Any increase in authorized operating power;
(7) Any substantial change in ownership or control;
(8) Any addition or change in frequency, excluding removing a frequency;
(9) Any modification or amendment requiring an environmental assessment (as governed by §§1.1301 through 1319 of this chapter, including changes affecting historic preservation under §1.1307(a)(4) of this chapter and 16 U.S.C. 470 (National Historic Preservation Act));
(10) Any request requiring frequency coordination; or
(11) Any modification or amendment requiring notification to the Federal Aviation Administration as defined in 47 CFR 17, subpart B.

(c) Minor changes may be made at the discretion of the licensee, provided proper notice is given to the Commission within 30 days of implementing the change and provided further, that the changes are appropriately reflected in the next application for renewal of the license for the station.

(d) For applications and modifications, the following changes are considered minor:

(1) Any name change not involving change in ownership or control of the license;
(2) Any change to administrative information, e.g., address, telephone number, or contact person;
(3) Any change in ownership that does not affect the identity or controlling interest of the licensee;
(4) Lowering power;
(5) Removing one or more channels; or
(6) Deleting a path.

§ 78.111 Frequency tolerance.

Stations in this service shall maintain the carrier frequency of each authorized transmitter to within the following percentage of the assigned frequency.

<table>
<thead>
<tr>
<th>Frequency band (MHz)</th>
<th>Fixed (percent)</th>
<th>Mobile (percent)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1,990 to 2,110</td>
<td>0.005</td>
<td></td>
</tr>
<tr>
<td>6,425 to 6,525</td>
<td>0.005</td>
<td></td>
</tr>
<tr>
<td>6,875 to 7,125</td>
<td>0.005</td>
<td></td>
</tr>
<tr>
<td>12,700 to 13,250</td>
<td>0.005</td>
<td>0.005</td>
</tr>
<tr>
<td>17,700 to 18,820</td>
<td>0.003</td>
<td></td>
</tr>
<tr>
<td>18,820 to 19,920</td>
<td>0.001</td>
<td></td>
</tr>
<tr>
<td>18,920 to 19,700</td>
<td>0.003</td>
<td></td>
</tr>
</tbody>
</table>

* Stations that employing vestigal sideband AM transmissions shall maintain their operating frequency within 0.0005% the visual carrier, and the aural carrier shall be 4.5 MHz ±1 kHz above the visual carrier frequency.

[52 FR 7145, Mar. 9, 1987, as amended at 68 FR 12776, Mar. 17, 2003]

§ 78.113 Frequency monitors and measurements.

(a) The licensee of each CARS station shall employ a suitable procedure to determine that the carrier frequency of each transmitter is maintained within the tolerance prescribed in §78.111 at all times. The determination shall be made, and the results thereof entered in the station records: when a transmitter is initially installed; when any change is made in a transmitter which may affect the carrier frequency or the stability thereof; or in any case at intervals not exceeding one year.

(b) The choice of apparatus to measure the operating frequency is left to the discretion of the licensee. However, failure of the apparatus to detect departures of the operating frequency in excess of the prescribed tolerance will
