permit may retain, possess, land, or sell no more than 15 swordfish per trip in or from the Atlantic Ocean north of 5° N. lat. A vessel is considered to be in the squid trawl fishery when it has no commercial fishing gear other than trawls on board and when squid constitute not less than 75 percent by weight of the total fish on board or offloaded from the vessel.

§ 635.24 Commercial retention limits for sharks, swordfish, and BAYS tunas.

(a) * * *

(iv) A person who owns or operates a vessel that has been issued an HMS Commercial Caribbean Small Boat permit may retain, possess, or land any LCS, SCS or pelagic sharks only when the HMS Commercial Caribbean Small Boat permit trip limit is set above zero. The current shark trip limit for HMS Commercial Caribbean Small Boat permit holders is set at zero.

(b) * * *

(3) Persons aboard a vessel that has been issued an HMS Commercial Caribbean Small Boat vessel permit may retain, possess, land, or sell no more than 2 swordfish per trip in or from the Atlantic Ocean north of 5° N. lat. (c) BAYS tunas. Persons aboard a vessel that has been issued an HMS Commercial Caribbean Small Boat permit under § 635.4 may retain, possess, land, or sell no more than 10 BAYS tunas per vessel per trip.

§ 635.25 Fishing areas.

(a) General. Persons on board fishing vessels subject to the jurisdiction of the United States are authorized to fish for, catch, retain, or land species governed by an international catch sharing agreement implemented under this part only in or from those management areas for which the United States has received an allocation.

(b) Exemptions. Persons and vessels subject to the jurisdiction of the United States intending to fish for regulated species in fishing areas not otherwise authorized under this part, whether for the purposes of scientific research or commercial fishing under a chartering arrangement, must have a permit from NMFS issued under § 635.32.

(c) Atlantic bluefin tuna. No person aboard a U.S. fishing vessel shall fish for bluefin tuna in, or possess on board that fishing vessel a bluefin tuna taken from, the Mediterranean Sea.

§ 635.26 Catch and release.

(a) BFT. (1) Notwithstanding the other provisions of this part, a person aboard a vessel issued a permit under this part, other than a person aboard a vessel permitted in the General category on a designated RFD, may fish under a catch-and-release or tag-and-release program. When fishing under a tag-and-release program, vessel owner/operators should use tags issued or approved by NMFS. If a BFT is tagged, the tag information, including information on any previously applied tag remaining on the fish, must be reported to NMFS. All BFT caught under the catch-and-release or tag-and-release programs must be returned to the sea immediately with a minimum of injury.

(2) Persons may obtain NMFS-issued conventional tags, reporting cards, and detailed instructions for their use from the NMFS Cooperative Tagging Center. Persons may use a conventional tag obtained from a source other than NMFS to tag BFT, provided the use of such tags is registered each year with the Cooperative Tagging Center and the NMFS program manager has approved the use of a conventional tag from that source. An angler using an alternative source of tags wishing to tag BFT may contact the NMFS Cooperative Tagging Center at the Southeast Fishery Science Center.
§ 635.27  Quotas.

(a) BFT. Consistent with ICCAT recommendations, and with paragraph (a)(10)(iv) of this section, NMFS may subtract the most recent, complete, and available estimate of dead discards from the annual U.S. BFT quota, and make the remainder available to be retained, possessed, or landed by persons and vessels subject to U.S. jurisdiction. The remaining baseline annual U.S. BFT quota will be allocated among the General, Angling, Harpoon, Purse Seine, Longline, Trap, and Reserve categories. BFT may be taken by persons aboard vessels issued Atlantic Tunas permits, HMS Angling permits, or HMS Charter/Headboat permits. The baseline annual U.S. BFT quota is 923.7 mt, not including an additional annual 25 mt allocation provided in paragraph (a)(3) of this section. The baseline annual U.S. BFT quota is divided among the categories as follows: General—47.1 percent (435.1 mt); Angling—19.7 percent (182.0 mt), which includes the school BFT held in reserve as described under paragraph (a)(7)(ii) of this section; Harpoon—3.9 percent (36.0 mt); Purse Seine—18.6 percent (171.8 mt); Longline—8.1 percent (74.8 mt), which does not include the additional annual 25 mt allocation provided in paragraph (a)(3) of this section; and Trap—0.1 percent (0.9 mt). The remaining 2.5 percent (23.1 mt) of the baseline annual U.S. BFT quota will be held in reserve for inseason or annual adjustments based on the criteria in paragraph (a)(8) of this section. NMFS may apportion a quota allocated to any category to specified fishing periods or to geographic areas and will make annual adjustments to quotas, as specified in paragraph (a)(10) of this section. BFT quotas are specified in whole weight.

(i) General category quota. In accordance with the framework procedures of the HMS FMP, NMFS will publish in the FEDERAL REGISTER, prior to the beginning of each fishing year or as early as feasible, the General category effort control schedule, including daily retention limits and restricted-fishing days.

(ii) Catches from vessels for which General category Atlantic Tunas permits have been issued and certain catches from vessels for which an HMS Charter/Headboat permit has been issued are counted against the General category quota in accordance with § 635.23(c)(3). The amount of large medium and giant BFT that may be caught, retained, possessed, landed, or sold under the General category quota is 47.1 percent (435.1 mt) of the baseline annual U.S. BFT quota, and is apportioned as follows:

(A) January 1 through the effective date of a closure notice filed by NMFS announcing that the January subquota is reached, or projected to be reached under § 635.28(a)(1), or until March 31, whichever comes first—5.3 percent (25.2 mt);
(B) June 1 through August 31—50 percent (217.6 mt);
(C) September 1 through September 30—26.5 percent (115.3 mt);
(D) October 1 through November 30—13 percent (56.6 mt); and
(E) December 1 through December 31—5.2 percent (22.6 mt).

(ii) NMFS will adjust each period’s apportionment based on overharvest or underharvest in the prior period.

(iii) When the coastwide General category fishery has been closed in any quota period specified under paragraph (a)(1)(i) of this section, NMFS will publish a closure action as specified in § 635.28. The subsequent time-period subquota will automatically open in accordance with the dates specified.
