§ 18.125 What criteria does the Service use to evaluate Letter of Authorization requests?

(a) We will evaluate each request for a Letter of Authorization based on the specific activity and the specific geographic location. We will determine whether the level of activity identified in the request exceeds that analyzed by us in considering the number of animals likely to be taken and evaluating whether there will be a negligible impact on the species or an adverse impact on the availability of the species for subsistence uses. If the level of activity is greater, we will reevaluate our findings to determine if those findings continue to be appropriate based on the greater level of activity that you have requested. Depending on the results of the evaluation, we may grant the authorization, add further conditions, or deny the authorization.

(b) In accordance with §18.27(f)(5) of subpart C of this part, we will make decisions concerning withdrawals of Letters of Authorization, either on an individual or class basis, only after notice and opportunity for public comment.

§ 18.126 What does a Letter of Authorization allow?

(a) Your Letter of Authorization may allow the nonlethal incidental, but not intentional, take of polar bears and Pacific walruses when you are carrying out one or more of the following activities:

1. Conducting geological and geophysical surveys and associated activities;
2. Drilling exploratory wells and associated activities;
3. Developing oil fields and associated activities;
4. Drilling production wells and performing production support operations;
5. Conducting environmental monitoring activities associated with exploration, development, and production activities to determine specific impacts of each activity;
6. Conducting restoration, remediation, demobilization programs, and associated activities.

(b) Each Letter of Authorization will identify conditions or methods that are specific to the activity and location.
