§ 23.69 How can I trade internationally in fur skins and fur skin products of bobcat, river otter, Canada lynx, gray wolf, and brown bear?

(a) U.S. and foreign general provisions. For purposes of this section, CITES furbearers means bobcat (Lynx rufus), river otter (Lontra canadensis), and Canada lynx (Lynx canadensis), and the Alaskan populations of gray wolf (Canis lupus), and brown bear (Ursus arctos). These species are included in Appendix II based on Article II(2)(b) of the Treaty (see § 23.89). The import, export, or re-export of fur skins and fur skin products must meet the requirements of this section and the other requirements of this part (see subparts B and C for prohibitions and application procedures). For specimens that were harvested from a State or Tribe without an approved CITES export program, see § 23.36 for export permits and § 23.37 for re-export certificates.

(b) Export approval of State and tribal programs. States and Tribes set up and maintain management and harvest programs designed to monitor and protect CITES furbearers from over-harvest. When a State or Tribe with a management program provides us with the

50 CFR Ch. I (10–1–12 Edition)
necessary information, we make programmatic findings and have specific requirements that allow export under CITES. A State or Tribe must provide sufficient information for us to determine that its management program and harvest controls are appropriate to ensure that CITES furbearers harvested within its jurisdiction are legally acquired and that export will not be detrimental to the survival of the species in the wild.

(1) A State or Tribe seeking initial CITES export program approval must submit the following information to the U.S. Management Authority, except as provided in paragraph (b)(2) of this section:

(i) An assessment of the condition of the population and a description of the types of information on which the assessment is based, such as an analysis of carcass demographics, population models, analysis of past harvest levels as a function of fur prices or trapper effort, or indices of abundance independent of harvest information, such as scent station surveys, archer surveys, camera traps, track or scat surveys, or road kill counts.

(ii) Current harvest control measures, including laws regulating harvest seasons and methods.

(iii) Total allowable harvest of the species.

(iv) Distribution of harvest.

(v) Indication of how frequently harvest levels are evaluated.

(vi) Tagging or marking requirements for fur skins.

(vii) Habitat evaluation.

(viii) If available, copies of any furbearer management plans or other relevant reports that the State or Tribe has prepared as part of its existing management program.

(2) If the U.S. Scientific Authority has made a range-wide non-detriment finding for a species, a State or Tribe with an approved export program for that species should include, at a minimum, a statement indicating whether or not the status of the species has changed and the information in paragraph (b)(3)(iii) and (iv) of this section. Range-wide non-detriment findings will be re-evaluated at least every 5 years, or sooner if information indicates that there has been a change in the status or management of the species that might lead to different treatment of the species. When a range-wide non-detriment finding is re-evaluated, States and Tribes with an approved export program for the species must submit information that allows us to determine whether our finding remains valid.

(c) CITES tags. Unless an alternative method has been approved, each CITES fur skin to be exported or re-exported must have a U.S. CITES tag permanently attached.

(1) The tag must be inserted through the skin and permanently locked in
§ 23.70 How can I trade internationally in American alligator and other crocodilian skins, parts, and products?

(a) U.S. and foreign general provisions.

For the purposes of this section, crocodilian means all species of alligator, caiman, crocodile, and gavial of the order Crocodylia. The import, export, or re-export of any crocodilian skins, parts, or products must meet the requirements of this section and the other requirements of this part (see subparts B and C for prohibitions and application procedures). For American alligator (Alligator mississippiensis) specimens harvested from a State or Tribe without an approved CITES export program, see §23.36 for export permits and §23.37 for re-export certificates.

(b) Definitions. Terms used in this section are defined as follows:

(1) Crocodilian skins means whole or partial skins, flanks, chalecos, and bellies (including those that are salted, crusted, tanned, partially tanned, or otherwise processed), including skins of sport-hunted trophies.

(2) Crocodilian parts means body parts with or without skin attached (including tails, throats, feet, meat, skulls, and other parts) and small cut skin pieces.

(c) Export approval of State and tribal programs for American alligator. States and Tribes set up and maintain management and harvest programs designed to monitor and protect American alligators from over-harvest. When a State or Tribe with a management program provides us with the necessary information, we make programmatic findings and have specific requirements that allow export under CITES. A State or Tribe must provide sufficient information for us to determine that its management program and harvest controls are appropriate to
