be 8 months from the date of the disaster declaration/determination/notification.

(k) United States or State. Each of the several States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

[53 FR 30384, Aug. 11, 1988, as amended at 58 FR 26681, May 5, 1993]

§§ 1945.7–1945.17 [Reserved]

§ 1945.18 United States Department of Agriculture (USDA) Food and Agriculture Council (FAC).

There is a USDA FAC established by the Secretary to serve every State and every County in the United States. The FACs are responsible for reporting the occurrence of and assessing the damage caused by potential disasters, as required to ensure that the Department’s disaster programs are implemented when and where needed; to coordinate the Department’s EM disaster programs with those of other Federal departments and agencies; and to provide personnel, as needed and requested by FEMA, to help staff disaster application centers in major disaster areas.

(a) State Food and Agriculture Council (SFAC). The SFACs are composed of representatives of the several USDA agencies having emergency program responsibilities at the State level. The vice chairpersons, Emergency Programs, of the SFACs are the ASCS State Executive Directors. FmHA or its successor agency under Public Law 103–354 State Directors are members of the SFACs.

(b) Local Food and Agriculture Council (LFAC). The LFACs are composed of representatives of the several USDA agencies having available personnel at the County level. The chairpersons of the LFACs, in most cases, are the ASCS County Executive Directors. The FmHA or its successor agency under Public Law 103–354 County Supervisors are members of the LFACs.

(c) FAC policies and procedures. These policies and procedures are set forth in the USDA Emergency Operations Handbook (EOH), available in any ASCS or FmHA or its successor agency under Public Law 103–354 Office.

§ 1945.19 Reporting potential natural disasters and initial actions.

(a) Purpose. The purpose of reporting potential natural disasters is to provide a systematic procedure for rapid reporting of the occurrence and extent of damage and loss caused by such events which may result in a natural disaster determination.

(b) Responsibility for assessing and reporting disasters. USDA SFACs and LFACs representing their members agencies are best qualified at the State and County levels to accomplish the assessment of agricultural production losses resulting from a potential natural disaster. These councils are charged with the responsibility of reporting the occurrence of and assessing the damage caused by disasters and will perform this responsibility under policies and procedures as set forth in the EOH.

(c) Actions to be taken. Immediately after the occurrence of a potential natural disaster:

(1) When physical losses only occur, the FmHA or its successor agency under Public Law 103–354 County Supervisor will report to the State Director who will advise the Administrator that there has been a potential natural disaster with physical property losses to one or more farmers. This report must be made to the Administrator within 3 months from the last day of the disaster incidence period. Upon receiving the report, the Administrator will decide whether a natural disaster has occurred. If it has, the Administrator will make EM loans available to any otherwise qualified applicant who has suffered qualifying physical losses. Notices that EM loans are available will identify the county in which the unusual and adverse weather condition, or natural phenomenon has occurred and also each contiguous county.

(2) When physical and/or production losses occur, the FmHA or its successor agency under Public Law 103–354 County Supervisor will report to the LFAC chairperson, as specified in the EOH, all substantial physical property loss, damage or injury and severe production losses that have occurred in the
