decharacterant substance shall be dispersed through the product in amounts sufficient to give the product a distinctive appearance or odor.

(ii) The denatured and decharacterized product shall be labeled as required in §§57.840 and 57.860.

(3) By processing for industrial use or for animal food. Such product shall be denatured or decharacterized in accordance with §57.720(a)(2) and identified as provided in §§57.840 and 57.860, or handled in accordance with other procedures approved by the Administrator. Notwithstanding the foregoing, product which was produced under official supervision and transported for industrial use or animal food need not be denatured or decharacterized if it is shipped under Government seal and received by an inspector or grader as defined in this part.

(4) By coloring the shells of loss and inedible eggs with a sufficient amount of FD&C color to give a distinct appearance, or applying a substance that will penetrate the shell and decharacterize the egg meat. Except that, lots of eggs containing significant percentages of blood spots or meat spots, but no other types of loss or inedible eggs may be shipped directly to official egg products processing plants, provided they are conspicuously labeled with the name and address of the shipper and the wording “Spots—For Processing Only In Official USDA Egg Products Processing Plants.”

(b) Eggs which are packed for the ultimate consumer and which have been found to exceed the tolerance for restricted eggs permitted in the official standards for U.S. Consumer Grade B shall be identified as required in §§57.800 and 57.860 and shall be shipped directly or indirectly:

(1) To an official egg products processing plant for proper segregation and processing; or

(2) Be regraded so that they comply with the official standards; or

(3) Used as other than human food.

(c) Records shall be maintained as provided in §57.200 to assure proper disposition.

§57.800 Identification of restricted eggs.

The shipping container of restricted eggs shall be determined to be satisfactorily identified if such container bears the packer’s name and address, the quality of the eggs in the container (e.g., dirty, dirty, and inedible, or loss), or the statement “Restricted Eggs—For Processing Only In An Official USDA Egg Products Processing Plant.”

The shipping container of restricted eggs shall be determined to be satisfactorily identified if such container bears the packer’s name and address, the quality of the eggs in the container (e.g., dirty, dirty, and inedible, or loss), or the statement “Restricted Eggs—For Processing Only In An Official USDA Egg Products Processing Plant.”

When eggs are packed in immediate containers, e.g., cartons, sleeve packs, overwrapped 2½- or 3-dozen packs, etc., for sale to household consumers under the exemptions provided for in section 57.100 (c), or (f), they shall be deemed to be satisfactorily identified in accordance with the requirements of this part if such immediate containers bear the packer’s name and address and the quality of the eggs. Alternatively, a point of sale sign may be displayed showing the above information.

§57.801 Nest run or washed ungraded eggs.

Nest run or washed ungraded eggs are exempt from the labeling provisions in §57.800. However, when such eggs are packed and sold to consumers, they...
