Quarantined area. Any State, or any portion of a State, listed in §301.55–3(c) or otherwise designated as a quarantined area in accordance with §301.55–3(b).

Regulated article. Any article listed in §301.55–2(a) or (b), or otherwise designated as a regulated article in accordance with §301.55–2(c).

South American cactus moth. The live insect known as the South American cactus moth, Cactoblastis cactorum, in any life stage (egg, larva, pupa, adult).

State. The District of Columbia, Puerto Rico, the Northern Mariana Islands, or any State, territory, or possession of the United States.

§ 301.55–2 Regulated articles.

The following are regulated articles:

(a) The South American cactus moth, in any living stage of its development.2

(b) Cactus plants or parts thereof (excluding seeds and canned, preserved, or frozen pads or fruits) of the following genera: Consolea, Cylindropuntia, Nopalea, and Opuntia.

(c) Any other product, article, or means of conveyance not listed in paragraphs (a) or (b) of this section that an inspector determines presents a risk of spreading the South American cactus moth, after the inspector provides written notification to the person in possession of the regulated articles, that it is subject to the restrictions of this subpart.

§ 301.55–3 Quarantined areas.

(a) Except as otherwise provided in paragraph (b) of this section, the Administrator will list as a quarantined area in paragraph (c) of this section each State, or each portion of a State, in which the South American cactus moth has been found by an inspector, in which the Administrator has reason to believe that the South American cactus moth is present, or that the Administrator considers necessary to quarantine because of its inseparability for quarantine enforcement purposes from localities where South American cactus moth has been found. Less than an entire State will be designated as a quarantined area only if the Administrator determines that:

(1) The State has adopted and is enforcing restrictions on the intrastate movement of the regulated articles that are equivalent to those imposed by this subpart on the interstate movement of regulated articles; and

(2) The designation of less than the entire State as a quarantined area will be adequate to prevent the interstate spread of the South American cactus moth.

(b) The Administrator or an inspector may temporarily designate any nonquarantined area in a State as a quarantined area in accordance with the criteria specified in paragraph (a) of this section. The Administrator will give a copy of this regulation along with written notice of the temporary designation to the owner or person in possession of the nonquarantined area, or, in the case of publicly owned land, to the person responsible for the management of the nonquarantined area. Thereafter, the interstate movement of any regulated article from an area temporarily designated as a quarantined area will be subject to this subpart. As soon as practicable, the area will be added to the list in paragraph (c) of this section or the designation will be terminated by the Administrator or an inspector. The owner or person in possession of, or, in the case of publicly owned land, the person responsible for the management of, an area for which designation is terminated will be given written notice of the termination as soon as practicable.

(c) The following areas are designated as quarantined areas: The States of Alabama, Florida, Georgia, Louisiana, Mississippi, and South Carolina.

2Permit and other requirements for the interstate movement of South American cactus moths are contained in part 330 of this chapter.
