(1) Is patterned after the model certificate of the International Plant Protection Convention (IPPC), a multilateral convention on plant protection under the authority of the Food and Agriculture Organization of the United Nations (FAO);

(2) Is issued by an official of a foreign national plant protection organization in one of the five official languages of the FAO;

(3) Is addressed to the plant protection service of the United States (Animal and Plant Health Inspection Service);

(4) Describes the consignment;

(5) Certifies the place of origin for all contents of the consignment;

(6) Certifies that the consignment has been inspected and/or tested according to appropriate official procedures and is considered to be free from quarantine pests of the United States;

(7) Contains any additional declarations required by this subpart; and

(8) Certifies that the consignment conforms with the phytosanitary requirements of the United States and is considered eligible for importation pursuant to the laws and regulations of the United States.

Phytosanitary measure. Any legislation, regulation, or official procedure having the purpose to prevent the introduction and/or spread of quarantine pests, or to limit the economic impact of regulated non-quarantine pests.

Place of production. Any premises or collection of fields operated as a single production or farming unit. This may include a production site that is separately managed for phytosanitary purposes.

Plant litter and debris. Discarded or decaying organic matter; detached leaves, twigs, or stems that do not add commercial value to the product.

Port of first arrival. The first port within the United States where a consignment is offered for consumption entry or offered for entry for immediate transportation in bond.

Portions of plants. Stalks or stems, including the pediculus, pedicel, peduncle, raceme, or panicle, that are normally attached to fruits or vegetables.

Production site. A defined portion of a place of production utilized for the production of a commodity that is managed separately for phytosanitary purposes. This may include the entire place of production or portions of it. Examples of portions of places of production are a defined orchard, grove, field, or premises.

Quarantine pest. A pest of potential economic importance to the area endangered by it and not yet present there, or present but not widely distributed there and being officially controlled.

United States. All of the States of the United States, the Commonwealth of Northern Mariana Islands, the Commonwealth of Puerto Rico, the District of Columbia, Guam, the Virgin Islands of the United States, and any other territory or possession of the United States.

West Indies. The foreign islands lying between North and South America, the Caribbean Sea, and the Atlantic Ocean, divided into the Bahamas, the Greater Antilles (including Hispaniola), and the Lesser Antilles (including the Leeward Islands, the Windward Islands, and the islands north of Venezuela).

§ 319.56–3 General requirements for all imported fruits and vegetables.

All fruits and vegetables that are allowed importation under this subpart must be imported in accordance with the following requirements, except as specifically provided otherwise in this subpart.

(a) Freedom from unauthorized plant parts. All fruits and vegetables imported under this subpart, whether in commercial or noncommercial consignments, must be free from plant litter or debris and free of any portions of plants that are specifically prohibited in the regulations in this subpart.

(b) Permit. (1) All fruits and vegetables imported under this subpart, whether commercial or noncommercial consignments, must be imported under a permit issued by APHIS, must be imported under the conditions specified in the permit, and must be imported in accordance with all applicable regulations in this part; except for:

(i) Dried, cured, or processed fruits and vegetables (except frozen fruits and
vegetables), including cured figs and dates, raisins, nuts, and dried beans and peas, except certain acorns and chestnuts subject to §319.56–11 of this subpart;

(ii) Fruits and vegetables grown in Canada (except potatoes from Newfoundland and that portion of the Municipality of Central Saanich in the Province of British Columbia east of the West Saanich Road, which are prohibited importation into the United States); and

(iii) Fruits and vegetables, except mangoes, grown in the British Virgin Islands that are imported into the U.S. Virgin Islands.

(2) Applying for a permit. Permit applications must be submitted in writing or electronically as provided in this paragraph and must be submitted in advance of the proposed importation. Applications must state the country or locality of origin of the fruits or vegetables, the anticipated port of first arrival, the name and address of the importer in the United States, and the identity (scientific name preferred) and quantity of the fruit or vegetable. Use of PPQ Form 587 or Internet application is preferred.

(i) By mail. Persons who wish to apply by mail for a permit to import fruits or vegetables into the United States must submit their application to the Animal and Plant Health Inspection Service, Permit Services, 4700 River Road Unit 136, Riverdale, MD 20737–1236.

(ii) Via the Internet. Persons who wish to apply for a permit to import fruits or vegetables into the United States via the Internet must do so using APHIS Plant Protection and Quarantine’s permit Web site at http://www.aphis.usda.gov/plant_health/permits/index.shtml.

(iii) By fax. Persons who wish to apply by fax for a permit to import fruits or vegetables into the United States must do so by faxing their application to: Animal and Plant Health Inspection Service, Plant Protection and Quarantine, Permit Services, (301) 734–5786.

(3) Issuance of permits. If APHIS approves a permit application, APHIS will issue a permit specifying the conditions applicable to the importation of the fruit or vegetable.

(4) Issuance of oral permits. Oral permits may be issued at ports of entry for noncommercial consignments if the commodity is admissible with inspection only. Oral permits may be issued for commercial consignments of fruits and vegetables that are not accompanied by a written permit upon arrival in the United States if all applicable entry requirements are met and proof of application for a written permit is supplied to an inspector.

(5) Amendment, denial, or withdrawal of permits. The Administrator may amend, deny, or withdraw a permit at any time if he or she determines that conditions exist that present an unacceptable risk of the fruit or vegetable introducing quarantine pests or noxious weeds into the United States. If the withdrawal is oral, the withdrawal of the permit and the reasons for the withdrawal will be confirmed in writing as promptly as circumstances allow.

(6) Appeals. Any person whose permit has been amended, denied, or withdrawn may appeal the decision in writing to the Administrator within 10 days after receiving the written notification of the decision. The appeal must state all of the facts and reasons upon which the person relies to show that the permit was wrongfully amended, denied, or withdrawn. The Administrator will grant or deny the appeal, in writing, stating the reasons for granting or denying the appeal, as promptly as circumstances permit. If there is a conflict as to any material fact and the person who has filed an appeal requests a hearing, a hearing will be held to resolve the conflict. Rules of practice concerning the hearing will be adopted by the Administrator. The permit withdrawal will remain in effect pending resolution of the appeal or the hearing.

(c) Ports of entry. (1) Fruits and vegetables must be imported into specific ports if so required by this subpart or by part 305 of this chapter, or if so required by a permit issued under paragraph (b) of this section for the importation of the particular fruit or vegetable. If a permit issued for the importation of fruits or vegetables names
specific port(s) where the fruits or vegetables must be imported, the fruits and vegetables may only be imported into the port(s) named in the permit. If a permit issued for the importation of fruits or vegetables does not name specific port(s) where the fruits or vegetables must be imported, the fruits and vegetables may be imported into any port referenced in paragraph (c)(2) of this section.

(2) Fruits and vegetables imported under this subpart may be imported into any port listed in 19 CFR 101.3(b)(1), except as otherwise provided by part 319 or by a permit issued in accordance with part 319, and except as provided in §330.104 of this chapter. Fruits and vegetables that are to be cold treated at ports in the United States may only be imported into specific ports as provided in part 305 of this chapter.

(d) Inspection, treatment, and other requirements. All imported fruits or vegetables are subject to inspection, are subject to such disinfection at the port of first arrival as may be required by an inspector, and are subject to reinspection at other locations at the option of an inspector. If an inspector finds plants or portions of plants, or a plant pest or noxious weed, or evidence of a plant pest or noxious weed on or in any fruit or vegetable or its container, or finds that the fruit or vegetable may have been associated with other articles infested with plant pests or noxious weeds, the owner or agent of the owner of the fruit or vegetable must clean or treat the fruit or vegetable and its container as required by an inspector, and the fruit or vegetable is also subject to reinspection, cleaning, and treatment at the option of an inspector at any time and place until all applicable requirements of this subpart have been accomplished.

(1) Notice of arrival; assembly for inspection. Any person importing fruits and vegetables into the United States must offer those agricultural products for inspection and entry at the port of first arrival. The owner or agent must assemble the fruits and vegetables for inspection at the port of first arrival, or at any other place designated by an inspector, and in a manner designated by the inspector. All fruits and vegetables must be accurately disclosed and made available to an inspector for examination. The owner or the agent must provide an inspector with the name and address of the consignee and must make full disclosure of the type, quantity, and country and locality of origin of all fruits and vegetables in the consignment, either orally for non-commercial consignments or on an invoice or similar document for commercial consignments.

(2) Refusal of entry. If an inspector finds that an imported fruit or vegetable is prohibited, or is not accompanied by required documentation, or is so infested with a plant pest or noxious weed that, in the judgment of the inspector, it cannot be cleaned or treated, or contains soil or other prohibited contaminants, the entire lot or consignment may be refused entry into the United States.

(3) Release for movement. No person may move a fruit or vegetable from the port of first arrival unless an inspector has either:

(i) Released it;
(ii) Ordered treatment at the port of first arrival and, after treatment, released the fruit or vegetable;
(iii) Authorized movement of the fruit or vegetable to another location for treatment, further inspection, or destruction; or
(iv) Ordered the fruit or vegetable to be reexported.

(4) Notice to owner of actions ordered by inspector. If an inspector orders any disinfection, cleaning, treatment, reexportation, recall, destruction, or other action with regard to imported fruits or vegetables while the consignment is in foreign commerce, the inspector will issue an emergency action notification (PPQ Form 523) to the owner of the fruits or vegetables or to the owner's agent. The owner must, within the time and in the manner specified in the PPQ Form 523, destroy the fruits and vegetables, ship them to a point outside the United States, move them to an authorized site, and/or apply treatments or other safeguards to the fruits and vegetables as prescribed to prevent the introduction of plant pests or noxious weeds into the United States.
(e) Costs and charges. APHIS will be responsible only for the costs of providing the services of an inspector during regularly assigned hours of duty and at the usual places of duty.¹ The owner of imported fruits or vegetables is responsible for all additional costs of inspection, treatment, movement, storage, destruction, or other measures ordered by an inspector under this subpart, including any labor, chemicals, packing materials, or other supplies required. APHIS will not be responsible for any costs or charges, other than those identified in this section.

(f) APHIS not responsible for damage. APHIS assumes no responsibility for any damage to fruits or vegetables that results from the application of treatments or other measures required under this subpart (or under part 305 of this chapter) to protect against the introduction of plant pests into the United States.

(Approved by the Office of Management and Budget under control number 0579–0049)

§ 319.56–4 Approval of certain fruits and vegetables for importation.

(a) Determination by the Administrator. The Administrator has determined that the application of one or more of the designated phytosanitary measures cited in paragraph (b) of this section to certain imported fruits and vegetables mitigates the risk posed by those commodities, and that such fruits and vegetables may be imported into the United States subject to one or more of those measures, as provided in paragraphs (c) and (d) of this section. The name and origin of all fruits and vegetables authorized importation under this section, as well as the applicable requirements for their importation, may be found on the Internet at http://www.aphis.usda.gov/import_export/plants/manuals/ports/downloads/fv.pdf.

Commodities that require phytosanitary measures other than one or more of the designated phytosanitary measures cited in paragraph (b) of this section may only be imported in accordance with applicable requirements in §319.56–3 and commodity-specific requirements contained elsewhere in this subpart.

(b) Designated phytosanitary measures. (1) Fruits or vegetables are subject to inspection upon arrival in the United States and comply with all applicable provisions of §319.56–3.

(2) The fruits or vegetables are imported from a pest-free area in the country of origin and are accompanied by a phytosanitary certificate stating that the fruits or vegetables originated in a pest-free area in the country of origin.

(3) The fruits or vegetables are treated in accordance with part 305 of this chapter.

(4) The fruits or vegetables are inspected in the country of origin by an inspector or an official of the national plant protection organization of the exporting country, and have been found free of one or more specific quarantine pests identified by risk analysis as likely to follow the import pathway.

(5) The fruits or vegetables are imported as commercial consignments only.

(c) Fruits and vegetables authorized importation under this section. (1) Previously approved fruits and vegetables. Fruits and vegetables that were authorized importation under this subpart either directly by permit or by specific regulation as of August 17, 2007 and that were subject only to one or more of the designated phytosanitary measures cited in paragraph (b) of this section and the general requirements of §319.56–3, may continue to be imported into the United States under the same requirements that applied before August 17, 2007, except as provided in paragraph (d) of this section.

(2) Other fruits and vegetables. Fruits and vegetables that do not meet the criteria in paragraph (c)(1) of this section may be authorized importation under this section as follows:

(i) Pest risk analysis. The risk posed by the particular fruit or vegetable from a specified country or other region has been evaluated and publicly communicated as follows:

¹Provisions relating to costs for other services of an inspector are contained in part 354 of this chapter.
