any mint acreage to another use before a determination can be made if there is an adequate stand on the acreage. We will inspect the acreage and you must agree in writing no payment or indemnity will be made for the acreage put to another use. The total production to be counted for acreage put to another use with our consent in accordance with this section will not be less than the approved yield.

(j) In addition to section 11(a) of these Crop Provisions we will make a Winter Coverage Option payment only on acreage that had an adequate stand on the date that insurance attached if the adequate stand was lost due to an insured cause of loss occurring within the Winter Coverage Option insurance period and the acreage consists of at least 20 acres or 20 percent of the insurable planted acres in the unit.

(k) In lieu of section 11(b) of these Crop Provisions, we may defer appraisals until the date coverage ends under this option.

(l) In lieu of section 11(c) of these Crop Provisions, in the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying 60 percent by your production guarantee per acre;

(2) Multiplying the result in section 13(l)(1) by the number of acres that do not have an adequate stand;

(3) Multiplying the result in section 13(l)(2) by the price election; and

(4) Multiplying the result in section 13(l)(3) by your share.

For example:

Assume that you have a 100 percent share in 100 acres of mint with a production guarantee of 50 pounds of oil per acre and a price election of $12 per pound. Also assume that you do not have an adequate stand on 50 acres by the date coverage ends for this option because an insured cause has damaged the stand. Your Winter Coverage Option payment would be calculated as follows:

(1) 60 percent \( \times \) 50 pound production guarantee per acre = 30 pound production guarantee per acre;

(2) 30 pound production guarantee per acre \( \times \) 50 acres without an adequate stand = 1,500 pounds;

(3) 1,500 pounds \( \times \) $12 price election = $18,000; and

(4) $18,000 \( \times \) 100 percent share = $18,000 Winter Coverage Option payment.

(m) In lieu of section 11(d) of these Crop Provisions, the population of live mint plants to be counted from insurable acreage on the unit will be not less than the population of live mint plants in an adequate stand for acreage:

(1) That is abandoned;

(2) That is put to another use without our consent;

(3) For which you fail to meet the requirements contained in section 13(h); or

(4) That is damaged solely by uninsured causes.

(n) Acreage for which a Winter Coverage Option payment has been made is no longer insurable under the Crop Provisions for the current crop year. Any mint production subsequently harvested from uninsured acreage for the crop year and not kept separate from production from insured acreage will be considered production to count.

(o) Acreage for which a Winter Coverage Option payment has been made will receive an amount of production of zero when computing subsequent year’s approved yield.

(p) Sections 11(e), (f), and (g) of these Crop Provisions do not apply to this option.

§457.170 Cultivated wild rice crop insurance provisions.

The Cultivated Wild Rice Crop Insurance Provisions for the 2009 and succeeding crop years are as follows:

Reinsured policies: (Appropriate title for insurance provider).

Both FCIC and reinsured policies: Cultivated Wild Rice Crop Provisions.

1. Definitions

Approved laboratory. A testing facility approved by us to determine the recovery percentage from samples of cultivated wild rice.

Cultivated Wild Rice. A member of the grass family Zizania palustris L., adapted for growing in man-made flood irrigated fields known as paddies.

Finished weight. (a) The green weight delivered to a processor multiplied by the determined recovery percentage;

(b) The green weight stored for seed multiplied by either the determined recovery percentage or the standard recovery percentage in accordance with section 11(d); or

c) The appraised green weight multiplied by either the determined recovery percentage or the standard recovery percentage in accordance with section 11(d).

Flood irrigation. Intentionally covering the planted acreage with water and maintaining it at a proper depth throughout the growing season.

Green weight. The total weight in pounds of the green cultivated wild rice production that was appraised, delivered to a processor, or stored for seed.

Harvest. Combining or threshing the cultivated wild rice for grain or seed.

Initially planted. The first occurrence of planting the insured crop on insurable acreage for the crop year.
Planted acreage. In addition to the definition contained in the Basic Provisions, land on which an adequate amount of seed is initially spread onto the soil surface by any appropriate method (including shattering for the second and succeeding years) and subsequently is mechanically incorporated into the soil at the proper depth, will be considered planted, unless otherwise provided by the Special Provisions or actuarial documents.

Processor. A business that converts green weight to a product ready for commercial sale using appropriate equipment and methods such as separating immature kernels, fermenting or curing, parching, de-hulling, and scarifying.

Recovery percentage. The ratio of finished weight to green weight of the cultivated wild rice. As specified in section 11(d), the recovery percentage is either:

(a) The determined recovery percentage for a sample as determined by an approved laboratory; or
(b) The standard recovery percentage provided in the Special Provisions.

Shatter. The act of mature seeds naturally falling to the ground from a cultivated wild rice plant.

</tr>
</tbody>
</table>

6. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the cultivated wild rice in the county grown on insurable acreage for which premium rates are provided by the actuarial documents:

(1) In which you have a share;
(2) That is planted for harvest as grain; and
(3) That is grown in man-made flood irrigated fields.

(b) Section 8(b)(3) of the Basic Provisions is not applicable to the cultivated wild rice seed that naturally shatters and is subsequently mechanically incorporated into the soil.

7. Insurance Period

In accordance with section 11 of the Basic Provisions, the calendar date for the end of the insurance period is:

(a) For Minnesota, September 30 of the calendar year the crop is normally harvested;
(b) For California, October 15 of the calendar year the crop is normally harvested; and
(c) For all other states, the date provided in the Special Provisions.

8. Causes of Loss

(a) In accordance with section 12 of the Basic Provisions, insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions;
(2) Fire;
(3) Insects, but not damage due to insufficient or improper application of pest control measures;
(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption; or
(8) Failure of the irrigation water supply, if caused by a cause of loss specified in sections 8(a)(1) through (7) that occur during the insurance period, drought, or the intrusion of saline water.

(b) In addition to the causes not insured against in section 12 of the Basic Provisions,
§ 457.170
we will not insure against any loss of production due to:

(1) The crop not being timely harvested unless such delay in harvesting is solely and directly due to adverse weather conditions which preclude harvesting equipment from entering and moving about the field; or
(2) The application of saline water, except as specified in section 8(a) of these crop provisions.

9. Replanting Payments
The provisions of section 13 of the Basic Provisions are not applicable.

10. Duties in the Event of Damage or Loss
Representative samples are required in accordance with section 14 of the Basic Provisions.

11. Settlement of Claim
(a) We will determine your loss on a unit basis. In the event you are unable to provide records of production that are acceptable to us for any:
(1) Optional unit, we will combine all optional units for which such production records were not provided; or
(2) Basic unit, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for each unit.
(b) In the event of loss or damage covered by this policy, we will settle your claim by:
(1) Multiplying the insured acreage by its respective production guarantee;
(2) Multiplying the result in section 11(b)(1) by the respective price election;
(3) Totaling the results of section 11(b)(2);
(4) Multiplying the total production to be counted, (see section 11(c) through (d)) by the respective price election;
(5) Totaling the results of section 11(b)(4);
(6) Subtracting the result of section 11(b)(5) from the result of section 11(b)(3); and
(7) Multiplying the result of section 11(b)(6) by your share.
For example:
You have a 100 percent share in 100 acres of cultivated wild rice in the unit, with a guarantee of 400 pounds per acre and a price election of $1.00 per pound. You are only able to harvest 20,000 pounds. Your indemnity would be calculated as follows:
(1) 100 acres \times 400 pounds = 40,000 pound guarantee;
(2) 40,000 pounds \times $1.00 per pound price election = $40,000 value of guarantee;
(3) 20,000 pounds \times $1.00 per pound price election = $20,000 value of production to count;
(4) $40,000 - $20,000 = $20,000 loss; and
(5) $20,000 \times 100 percent share = $20,000 indemnity payment.
(c) The total production to count (finished weight) from all insurable acreage on the unit will include:
(1) All appraised production as follows:
(A) That is abandoned;
(B) Put to another use without our consent;
(C) Damaged solely by uninsured causes; or
(D) For which you fail to provide records of production that are acceptable to us;
(ii) Production lost due to uninsured causes;
(iii) Unharvested production (mature unharvested green weight production must be adjusted in accordance with section 11(d)); and
(iv) Potential production on insured acreage that you intend to put to another use or abandon. If you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:
(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or
(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and
(2) All harvested production from the insurable acreage.
(d) Mature green weight will be multiplied by the recovery percentage subject to the following:
(1) We may obtain samples of the production to determine the recovery percentage.
(2) The determined recovery percentage will be used to calculate your loss only if:
(i) All determined recovery percentages are established using samples of green weight production obtained by us or by the processor for sold or processed production; and
(ii) The samples are analyzed by an approved laboratory.
(3) If the conditions of section 11(d)(2) are not met, the standard recovery percentage will be used.

7 CFR Ch. IV (1–1–12 Edition)
Federal Crop Insurance Corporation, USDA

§ 457.171 Cabbage crop insurance provisions.

The Cabbage Crop Insurance Provisions for the 2011 and succeeding crop years are as follows:

Reinsured policies: (Appropriate title for insurance provider).

Both FCIC and reinsured policies: Cabbage Crop Insurance Provisions.

1. Definitions

Cabbage. Plants of the family Brassicaceae and the genus Brassica, grown for their compact heads and used for human consumption.

Crop Year. In lieu of the definition contained in section 1 of the Basic Provisions, a period of time that begins on the first day of the earliest planting period and continues through the last day of the insurance period for the latest planting period. The crop year is designated by the calendar year in which the cabbage planted in the latest planting period is normally harvested.

Damaged cabbage production. Fresh market cabbage that fails to grade U.S. Commercial or better in accordance with the United States Standards for Grades of Cabbage for Processing due to an insurable cause of loss.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Harvest. Cutting of the cabbage plant to sever the head from the stalk.

Hundredweight. One hundred pounds avoirdupois.

Inspected transplants. Cabbage plants that have been found to meet the standards of the public agency responsible for the inspection process within the State in which they are grown.

 Marketable cabbage. Cabbage that is sold or grades at least:

(a) U.S. Commercial for fresh market cabbage; or
(b) U.S. No. 2 for processing cabbage.

Planted acreage. In addition to the definition contained in section 1 of the Basic Provisions, cabbage plants and seeds must initially be planted in rows wide enough to permit mechanical cultivation. Cabbage planted or seeds planted in any other manner will not be insurable unless otherwise provided by the Special Provisions, actuarial documents, or by written agreement.

Processor. Any business enterprise regularly engaged in processing cabbage for human consumption, that possesses all licenses and permits for processing cabbage required by the State in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process the contracted cabbage within a reasonable amount of time after harvest.

Processor contract. A written contract between the producer and the processor, containing at a minimum:

(a) The producer’s commitment to plant and grow cabbage, and to sell and deliver the cabbage production to the processor;
(b) The processor’s commitment to purchase all the production stated in the processor contract; and
(c) A price per hundredweight that will be paid for the production.

Timely planted. In lieu of the definition contained in section 1 of the Basic Provisions, cabbage planted during a planting period designated in the Special Provisions.

Type. A category of cabbage as designated in the Special Provisions.

2. Unit Division

(a) A basic unit, as defined in section 1 of the Basic Provisions, will also be divided into additional basic units by planting period if separate planting periods are designated in the Special Provisions.
(b) In addition to the requirements of section 34 of the Basic Provisions, optional units may also be established by type if separate types are designated in the Special Provisions.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election for all the cabbage in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each cabbage type designated in the Special Provisions.
