Nuclear Regulatory Commission

Mixed oxide fuels are handled in glove boxes (or equivalent containment) until they are sealed in the cladding. In all cases the fuel is hermetically sealed inside a suitable cladding which is designed to be the primary envelope encasing the fuel so as to provide suitable performance and safety during reactor operation. Also, in all cases precise control of processes, procedures and equipment to extremely high standards is necessary in order to ensure predictable and safe fuel performance.

(a) Items that are considered especially designed or prepared for the fabrication of fuel elements include equipment that:
(1) Normally comes in direct contact with, or directly processes or controls, the production flow of nuclear material;
(2) Seals the nuclear material within the cladding;
(3) Checks the integrity of the cladding or the seal; and
(4) Checks the finished treatment of the sealed fuel.

(b) This equipment or systems of equipment may include, for example:
(1) Fully automatic pellet inspection stations especially designed or prepared for checking final dimensions and surface defects of fuel pellets;
(2) Automatic welding machines especially designed or prepared for welding end caps onto the fuel pins (or rods);
(3) Automatic test and inspection stations especially designed or prepared for checking the integrity of completed fuel pins (or rods). This item typically includes equipment for:
   (i) X-ray examination of pin (or rod) end cap welds;
   (ii) Helium leak detection from pressurized pins (or rods); and
   (iii) Gamma-ray scanning of the pins (or rods) to check for correct loading of the fuel pellets inside.

*The values to be used to determine whether a license is required are given in TBq. Ci (Ci) values are provided for practical usefulness only and are rounded after conversion.
*The limits for Pu-238 and Pu-239/Be in this table apply for imports to the U.S. The limits for exports of Pu-238 and Pu-239/Be can be found in § 11021.
*Discrete sources of radium-226.

Calculation of Shipments Containing Multiple Sources or Radionuclides

The “sum of fractions” methodology for evaluating combinations of radionuclides being transported, is to be used when import or export shipments contain multiple sources or multiple radionuclides. The threshold limit values used in a sum of the fractions calculation must be the metric values (i.e., TBq).

I. If multiple sources and/or multiple radionuclides are present in an import or export shipment, the sum of the fractions of the activity of each radionuclide must be determined to verify the shipment is less than the Category 1 or 2 limits of Table 1, as appropriate. If the calculated sum of the fractions ratio, using the following equation, is greater than or equal to 1.0, then the import or export shipment exceeds the threshold limits of Table 1 and the applicable security provisions of this part apply.

II. Use the equation below to calculate the sum of the fractions ratio by inserting the actual activity of the applicable radionuclides or of the individual sources (of the same radionuclides) in the numerator of the
equation and the corresponding threshold activity limit from the Table 1 in the denominator of the equation. Ensure the numerator and denominator values are in the same units and all calculations must be performed using the TBq (i.e., metric) values of Table 1.

\[ \frac{R_1}{AR_1} + \frac{R_2}{AR_2} + \frac{R_n}{AR_n} \geq 1 \]

[70 FR 37993, July 1, 2005, as amended at 71 FR 20339, Apr. 20, 2006]

PART 140—FINANCIAL PROTECTION REQUIREMENTS AND INDEMNITY AGREEMENTS

Subpart A—General Provisions

Sec.
140.1 Purpose.
140.2 Scope.
140.3 Definitions.
140.4 Interpretations.
140.5 Communications.
140.6 Reports.
140.7 Fees.
140.8 Specific exemptions.
140.9 Modification of indemnity agreements.
140.9a Information collection requirements: OMB approval.

Subpart B—Provisions Applicable Only to Applicants and Licensees Other Than Federal Agencies and Nonprofit Educational Institutions

140.10 Scope.
140.11 Amounts of financial protection for certain reactors.
140.12 Amount of financial protection required for other reactors.
140.13 Amount of financial protection required of certain holders of construction permits and combined licenses under 10 CFR part 52.
140.13a Amount of financial protection required for plutonium processing and fuel fabrication plants.
140.13b Amount of liability insurance required for uranium enrichment facilities.
140.14 Types of financial protection.
140.15 Proof of financial protection.
140.16 Commission review of proof of financial protection.
140.17 Special provisions applicable to licensees furnishing financial protection in whole or in part in the form of liability insurance.
140.18 Special provisions applicable to licensees furnishing financial protection in whole or in part in the form of adequate resources.
140.19 Failure by licensees to maintain financial protection.
140.20 Indemnity agreements and liens.
140.21 Licensee guarantees of payment of deferred premiums.
140.22 Commission guarantee and reimbursement agreements.

Subpart C—Provisions Applicable Only to Federal Agencies

140.51 Scope.
140.52 Indemnity agreements.

Subpart D—Provisions Applicable Only to Nonprofit Educational Institutions

140.71 Scope.
140.72 Indemnity agreements.

Subpart E—Extraordinary Nuclear Occurrences

140.81 Scope and purpose.
140.82 Procedures.
140.83 Determination of extraordinary nuclear occurrence.
140.84 Criterion I—Substantial discharge of radioactive material or substantial radiation levels offsite.
140.85 Criterion II—Substantial damages to persons offsite or property offsite.

Subpart F—Violations

140.87 Violations.
140.89 Criminal penalties.

APPENDICES TO PART 140

140.91 Appendix A—Form of nuclear energy liability policy for facilities.
140.92 Appendix B—Form of indemnity agreement with licensees furnishing insurance policies as proof of financial protection.
140.93 Appendix C—Form of indemnity agreement with licensees furnishing proof of financial protection in the form of licensee’s resources.
140.94 Appendix D—Form of indemnity agreement with Federal agencies.
140.95 Appendix E—Form of indemnity agreement with nonprofit educational institutions.
140.96 Appendix F—Indemnity locations.
