§ 429.34  
(b) Certification reports. (1) The requirements of § 429.12 are applicable to ceiling fan light kits; and
(2) Pursuant to § 429.12(b)(13), a certification report shall include the following public product-specific information:
(i) Ceiling fan light kits with sockets for medium screw base lamps: the rated wattage in watts (W) and the system’s efficacy in lumens per watt (lm/W).
(ii) Ceiling fan light kits with pin-based sockets for fluorescent lamps: the rated wattage in watts (W), the system’s efficacy in lumens per watt (lm/W), and the length of the lamp in inches (in).
(iii) Ceiling fan light kits with any other socket type: the rated wattage in watts (W) and the number of individual sockets.
(3) Pursuant to § 429.12(b)(13), a certification report shall include the following additional product-specific information: Ceiling fan light kits with any other socket type: a declaration that the basic model meets the applicable design requirement and the features that have been incorporated into the ceiling fan light kit to meet the applicable design requirement (e.g., circuit breaker, fuse, ballast).

§ 429.35  
(b) Certification reports. (1) The requirements of § 429.12 are applicable to torchieres; and
(2) Pursuant to § 429.12(b)(13), a certification report shall include the following additional product-specific information: A declaration that the basic model meets the applicable design requirement and the features that have been incorporated into the torchiere to meet the applicable design requirement (e.g., circuit breaker, fuse, ballast).

§ 429.34  
(a) Sampling plan for selection of units for testing. (1) The requirements of § 429.11 are applicable to torchieres; and
(2) For each basic model of bare or covered (no reflector) medium base compact fluorescent lamp
(i) No less than five units per basic model must be used when testing for the efficacy, 1,000-hour lumen maintenance, and the lumen maintenance. Each unit must be tested in the base-up position unless the product is labeled restricted by the manufacturer, in which case the unit should be tested in the manufacturer specified position. Any represented value of efficacy, 1,000-hour lumen maintenance, and lumen maintenance shall be based on a sample randomly selected and tested to ensure that the represented value is less than or equal to the lower of:
(A) The mean of the sample, where:
\[
\bar{x} = \frac{1}{n} \sum_{i=1}^{n} x_i 
\]
and, \(\bar{x}\) is the sample mean; \(n\) is the number of samples; and \(x_i\) is the \(i^{th}\) sample;
Or,
(B) The lower 97.5 percent confidence limit (LCL) of the true mean divided by 0.95, where:
§ 429.36 Dehumidifiers.

(a) Sampling plan for selection of units for testing. (1) The requirements of §429.11 are applicable to dehumidifiers; and

to §429.12(b)(13), a certification report shall include the following public product-specific information: The testing laboratory’s NVLAP identification number or other NVLAP-approved accreditation identification, the minimum initial efficacy in lumens per watt (lm/W), the lumen maintenance at 1,000 hours in percent (%), the lumen maintenance at 40 percent of rated life in percent (%), the rapid cycle stress test in number of units passed, and the lamp life in hours (h).

(b) Certification reports. (1) The requirements of §429.12 are applicable to bare or covered medium base compact fluorescent lamps; and

(2) Pursuant to §429.12(b)(13), a certification report shall include the following public product-specific information: The testing laboratory’s NVLAP identification number or other NVLAP-approved accreditation identification, the minimum initial efficacy in lumens per watt (lm/W), the lumen maintenance at 1,000 hours in percent (%), the lumen maintenance at 40 percent of rated life in percent (%), the rapid cycle stress test in number of units passed, and the lamp life in hours (h).

§ 429.36 Dehumidifiers.

(a) Sampling plan for selection of units for testing. (1) The requirements of §429.11 are applicable to dehumidifiers; and

(b) Certification reports. (1) The requirements of §429.12 are applicable to dehumidifiers; and

(2) Pursuant to §429.12(b)(13), a certification report shall include the following public product-specific information: The testing laboratory’s NVLAP identification number or other NVLAP-approved accreditation identification, the minimum initial efficacy in lumens per watt (lm/W), the lumen maintenance at 1,000 hours in percent (%), the lumen maintenance at 40 percent of rated life in percent (%), the rapid cycle stress test in number of units passed, and the lamp life in hours (h).
