Federal Aviation Administration, DOT § 142.59

§ 142.57 Aircraft requirements.
(a) An applicant for, or holder of, a training center certificate must ensure that each aircraft used for flight instruction and solo flights meets the following requirements:
(1) Except for flight instruction and solo flights in a curriculum for agricultural aircraft operations, external load operations, and similar aerial work operations, the aircraft must have an FAA standard airworthiness certificate or a foreign equivalent of an FAA standard airworthiness certificate, acceptable to the Administrator.
(2) The aircraft must be maintained and inspected in accordance with—
   (i) The requirements of part 91, subpart E, of this chapter; and
   (ii) An approved program for maintenance and inspection.
(3) The aircraft must be equipped as provided in the training specifications for the approved course for which it is used.
(b) Except as provided in paragraph (c) of this section, an applicant for, or holder of, a training center certificate must ensure that each aircraft used for flight instruction is at least a two-place aircraft with engine power controls and flight controls that are easily reached and that operate in a conventional manner from both pilot stations.
(c) Airplanes with controls such as nose-wheel steering, switches, fuel selectors, and engine airflow controls that are not easily reached and operated in a conventional manner by both pilots may be used for flight instruction if the certificate holder determines that the flight instruction can be conducted in a safe manner considering the location of controls and their nonconventional operation, or both.

§ 142.59 Flight simulators and flight training devices.
(a) An applicant for, or holder of, a training center certificate must show that each flight simulator and flight training device used for training, testing, and checking (except AQP) will be or is specifically qualified and approved by the Administrator for—
(1) Each maneuver and procedure for the make, model, and series of aircraft, set of aircraft, or aircraft type simulated, as applicable; and
(2) Each curriculum or training course in which the flight simulator or flight training device is used, if that curriculum or course is used to satisfy any requirement of 14 CFR chapter I.
(b) The approval required by paragraph (a)(2) of this section must include—
(1) The set of aircraft, or type aircraft;
(2) If applicable, the particular variation within type, for which the training, testing, or checking is being conducted; and
(3) The particular maneuver, procedure, or crewmember function to be performed.
(c) Each qualified and approved flight simulator or flight training device used by a training center must—
(1) Be maintained to ensure the reliability of the performances, functions, and all other characteristics that were required for qualification;
(2) Be modified to conform with any modification to the aircraft being simulated if the modification results in changes to performance, function, or other characteristics required for qualification;
(3) Be given a functional preflight check each day before being used; and
(4) Have a discrepancy log in which the instructor or evaluator, at the end of each training session, enters each discrepancy.
(d) Unless otherwise authorized by the Administrator, each component on a qualified and approved flight simulator or flight training device used by a training center must be operative if the component is essential to, or involved in, the training, testing, or checking of airmen.
(e) Training centers shall not be restricted to specific—
(1) Route segments during line-oriented flight training scenarios; and
(2) Visual data bases replicating a specific customer’s bases of operation.
(f) Training centers may request evaluation, qualification, and continuing evaluation for qualification of
