Consumer Product Safety Commission

§ 1501.3 Exemptions.

The following articles are exempt from this regulation (§§ 1500.18(a)(9) and 1501.4 below):
(a) Balloons;
(b) Books and other articles made of paper;
(c) Writing materials such as crayons, chalk, pencils, and pens;
(d) Children's clothing and accessories, such as shoe lace holders and buttons;
(e) Grooming, feeding, and hygiene products, such as diaper pins and clips, barrettes, toothbrushes, drinking glasses, dishes and eating utensils;
(f) Phonograph records;
(g) Modeling clay and similar products;
(h) Fingerpaints, watercolors, and other paint sets;
(i) Rattles (as defined at 16 CFR 1510.2); and
(j) Pacifiers (as defined at 16 CFR 1511.2(a)).

§ 1501.4 Size requirements and test procedure.

(a) No toy or other children's article subject to §1500.18(a)(9) and to this part 1501 shall be small enough to fit entirely within a cylinder with the dimensions shown in Figure 1, when tested in accordance with the procedure in paragraph (b) of this section. In testing to ensure compliance with this regulation, the dimensions of the Commission's test cylinder will be no greater than those shown in Figure 1. (In addition, for compliance purposes, the English dimensions shall be used. The metric approximations are included only for convenience.)

(b)(1) Place the article, without compressing it, into the cylinder. If the article fits entirely within the cylinder, in any orientation, it fails to comply with the test procedure. (Test any detached components of the article the same way.)

(2) If the article does not fit entirely within the cylinder, subject it to the appropriate "use and abuse" tests of 16 CFR 1500.51 and 1500.52 (excluding the bite tests of §§1500.51(c) and 1500.52(c)). Any components or pieces (excluding paper, fabric, yarn, fuzz, elastic, and string) which have become detached from the article as a result of the use and abuse testing shall be placed into the cylinder, one at a time. If any such components or pieces fit entirely within the cylinder, in any orientation and without being compressed, the article fails to comply with the test procedure.
