§ 40.10 Special certification procedures for submission of rules by systemically important derivatives clearing organizations.

(a) Advance notice. A registered derivatives clearing organization that has been designated by the Financial Stability Oversight Council as a systemically important derivatives clearing organization shall provide notice to the Commission not less than 60 days in advance of any proposed change to its rules, procedures, or operations that could materially affect the nature or level of risks presented by the systemically important derivatives clearing organization. A notice submitted under this section shall be subject to the filing requirements of § 40.6(a)(1) and the Web site publication requirements of § 40.6(a)(2).

(1) The notice of a proposed change shall provide the information required to be submitted under § 40.6(a)(7) and shall specifically describe:

those designated financial market utilities for which it is the Supervisory Agency pursuant to section 803(3) of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(3) The systemically important derivatives clearing organization may request that the Commission expedite the review on the grounds that the change would materially decrease risk. The Commission, in its discretion, may expedite the review and, pursuant to paragraph (g) of this section, notify the systemically important derivatives clearing organization in less than 60 days from the date the Commission receives the notice of proposed change in writing that it does not object to the proposed change and authorizes implementation of the change on an earlier date.

(b) Materiality. The term “materially affect the nature or level of risks presented,” when used to qualify determinations on a change to rules, procedures, or operations of a systemically important derivatives clearing organization, means matters as to which there is a reasonable possibility that the change could affect the performance of essential clearing and settlement functions or the overall nature or level of risk presented by the systemically important derivatives clearing organization. Such changes may include, but are not limited to, changes that materially affect financial resources, participant and product eligibility, risk management (including matters relating to margin and stress testing), daily or intraday settlement procedures, default procedures, system safeguards (business continuity and disaster recovery), and governance. If a systemically important derivatives clearing organization determines that a proposed change is not material and therefore does not file an advance notice under this §40.10, but the Commission determines that the change is material, the Commission may require the systemically important derivatives clearing organization to withdraw the proposed change and provide notice pursuant to this section.

(c) Further information. The Commission may require the systemically important derivatives clearing organization to provide any further information necessary to assess the effect the proposed change would have on the nature or level of risks associated with the systemically important derivatives clearing organization’s payment, clearing, or settlement activities and the sufficiency of any proposed risk management techniques.

(d) Notice of objection. A systemically important derivatives clearing organization shall not implement a change to which the Commission has an objection on the grounds that the proposed change is not consistent with the Act or the Commission’s regulations, or the purposes of the Dodd-Frank Act or any applicable rules, orders, or standards prescribed under Section 805(a) of the Dodd-Frank Act. The Commission will notify the systemically important derivatives clearing organization in writing of any objection regarding the proposed change within 60 days from the later of:

(1) The date that the notice of the proposed change was received; or

(2) The date the Commission received any further information it had requested for consideration of the notice.

(e) Implementation of change absent Commission objection. A systemically important derivatives clearing organization may implement a change if it has not received an objection to the proposed change within 60 days from the later of:

(1) The date that the Commission received the notice of proposed change; or

(2) The date the Commission received any further information it had requested for consideration of the notice.

(f) Extended review. The Commission may, during the 60-day review period, extend the review period if the proposed change raises novel or complex issues. A notification by the Commission pursuant to this paragraph will extend the review for an additional 60 days. Any extension under this paragraph will extend the time periods under paragraphs (d) and (e) of this section for an additional 60 days.

(g) Change allowed earlier if notified of no objection. A systemically important derivatives clearing organization may implement a change in less than 60 days from the date the Commission receives the notice of proposed change or
