§ 10.177 Cost or value of materials produced in the beneficiary developing country.

(a) "Produced in the beneficiary developing country" defined. For purposes of §§10.171 through 10.178, the words "produced in the beneficiary developing country" refer to the constituent materials of which the eligible article is composed which are either:

(1) Wholly the growth, product, or manufacture of the beneficiary developing country; or

(2) Substantially transformed in the beneficiary developing country into a new and different article of commerce.

(b) Questionable origin. When the origin of an article either is not ascertainable or not satisfactorily demonstrated to the port director, the article shall not be considered to have been produced in the beneficiary developing country.

(c) Determination of cost or value of materials produced in the beneficiary developing country. (1) The cost or value of materials produced in the beneficiary developing country includes:

(i) The manufacturer’s actual cost for the materials;

(ii) When not included in the manufacturer’s actual cost for the materials, the freight, insurance, packing, and all other costs incurred in transporting the materials to the manufacturer’s plant;

(iii) The fact that an article has undergone more than a simple combining or packaging operation or mere dilution is not necessarily dispositive of the question of whether that processing constitutes a substantial transformation for purposes of determining the country of origin of the article.

(b) [Reserved]

(c) Merchandise grown, produced, or manufactured in a beneficiary developing country. Merchandise which is wholly the growth, product, or manufacture of a beneficiary developing country, or an association of countries treated as one country under section 507(2) of the Trade Act of 1974 (19 U.S.C. 2467(2)) and §10.171(b), and manufactured products consisting of materials produced only in such country or countries, shall normally be presumed to meet the requirements set forth in this section.

§ 10.178 Direct costs of processing operations performed in the beneficiary developing country.

(a) Items included in the direct costs of processing operations. As used in §10.176, the words “direct costs of processing operations” means those costs either directly incurred in, or which can be reasonably allocated to, the growth, production, manufacture, or assembly of the specific merchandise under consideration. Such costs include, but are not limited to:

(1) All actual labor costs involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training, and the cost of engineering, supervisory, quality control, and similar personnel;

(2) Dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise;

(3) Research, development, design, engineering, and blueprint costs insofar as they are allocable to the specific merchandise; and

(4) Costs of inspecting and testing the specific merchandise.

(b) Items not included in the direct costs of processing operations. Those items which are not included within the meaning of the words “direct costs of processing operations” are those which are not directly attributable to the merchandise under consideration or are not “costs” of manufacturing the product. These include, but are not limited to:

(1) Profit; and

(2) General expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen’s salaries, commissions, or expenses.
