(4) The numbers and quantities of the cargo laden aboard the train as contained in the carrier’s bill of lading, either master or house, as applicable (this means the quantity of the lowest external packaging unit; containers and pallets do not constitute acceptable information; for example, a container holding 10 pallets with 200 cartons should be described as 200 cartons);

(5) A precise cargo description (or the Harmonized Tariff Schedule (HTS) number(s) to the 6-digit level under which the cargo is classified if that information is received from the shipper) and weight of the cargo; or, for a sealed container, the shipper’s description and weight of the cargo (generic descriptions, specifically those such as “FAK” (“freight of all kinds”), “general cargo,” and “STC” (“said to contain”) are not acceptable);

(6) The shipper’s complete name and address, or identification number, from the bill(s) of lading (for each house bill in a consolidated shipment, the identity of the foreign vendor, supplier, manufacturer, or other similar party is acceptable (and the address of the foreign vendor, etc., must be a foreign address); by contrast, the identity of the carrier, freight forwarder, consolidator, or broker, is not acceptable; the identification number will be a unique number to be assigned by CBP upon implementation of the Automated Commercial Environment);

(7) The complete name and address of the consignee, or identification number, from the bill(s) of lading (The consignee is the party to whom the cargo will be delivered in the United States. However, in the case of cargo shipped “to order of [a named party],” the carrier must identify this named “to order” party as the consignee; and, if there is any other commercial party listed in the bill of lading for delivery or contact purposes, the carrier must also report this other commercial party’s identity and contact information (address) in the “Notify Party” field of the advance electronic data transmission to CBP, to the extent that the CBP-approved electronic data interchange system is capable of receiving this data. The identification number will be a unique number assigned by CBP upon implementation of the Automated Commercial Environment);

(8) The place where the rail carrier takes possession of the cargo shipment;

(9) Internationally recognized hazardous material code when such materials are being shipped by rail;

(10) Container numbers (for containerized shipments) or the rail car numbers; and

(11) The seal numbers for all seals affixed to containers and/or rail cars to the extent that CBP’s data system can accept this information (for example, if a container has more than two seals, and only two seal numbers can be accepted through the system per container, the carrier’s electronic presentation of two of these seal numbers for the container would be considered as constituting full compliance with this data element).

§ 123.92 Electronic information for truck cargo required in advance of arrival.

(a) General requirement. Pursuant to section 343(a) of the Trade Act of 2002, as amended (19 U.S.C. 2071 note), for any truck required to report its arrival under §123.1(b), that will have commercial cargo aboard, Customs and Border Protection (CBP) must electronically receive from the party described in paragraph (c) of this section certain information concerning the cargo, as enumerated in paragraph (d) of this section. The CBP must receive such cargo information by means of a CBP-approved electronic data interchange system no later than either 30 minutes or 1 hour prior to the carrier’s reaching the first port of arrival in the United States, or such lesser time as authorized, based upon the CBP-approved system employed to present the information.

(1) Through cargo in transit to a foreign country. Cargo arriving by truck in transit through the United States from one foreign country to another (§123.31(a)); and cargo arriving by truck for transportation through the United States from one point to another in the same foreign country (§123.31(b);
§ 123.42 are subject to the advance electronic information filing requirement in paragraph (a) of this section.

(2) Cargo entered under bond. Cargo that is to be unladed from the arriving truck and entered, in bond, for exportation, or for transportation and exportation, in another vehicle or conveyance are also subject to the advance electronic information filing requirement in paragraph (a) of this section.

(b) Exceptions from advance reporting requirements—(1) Cargo in transit from point to point in the United States. Domestic cargo transported by truck and arriving at one port from another in the United States after transiting Canada or Mexico (§123.21; §123.41) is exempt from the advance electronic filing requirement for incoming cargo under paragraph (a) of this section.

(2) Certain informal entries. The following merchandise is exempt from the advance cargo information reporting requirements under paragraph (a) of this section, to the extent that such merchandise qualifies for informal entry pursuant to part 143, subpart C, of this chapter:

(i) Merchandise which may be informally entered on CBP Form 368 or 368A (cash collection or receipt);

(ii) Merchandise unconditionally or conditionally free, not exceeding $2,500 in value, eligible for entry on CBP Form 7523; and

(iii) Products of the United States being returned, for which entry is prescribed on CBP Form 3311.

(c) Carrier; and importer or broker—(1) Single party presentation. Except as provided in paragraph (c)(2) of this section, the incoming truck carrier must present all required information to CBP in the time and manner prescribed in paragraph (a) of this section.

(2) Dual party presentation. The United States importer, or its customs broker, may elect to present to CBP a portion of the required information that it possesses in relation to the cargo. Where the broker, or the importer (see §113.62(k)(2) of this chapter), elects to submit such data, the carrier is responsible for presenting to CBP the remainder of the information specified in paragraph (d) of this section.

(3) Party receiving information believed to be accurate. Where the party electronically presenting the cargo information required in paragraph (d) of this section receives any of this information from another party, CBP will take into consideration how, in accordance with ordinary commercial practices, the presenting party acquired such information, and whether and how the presenting party is able to verify this information. Where the presenting party is not reasonably able to verify such information, CBP will permit the party to electronically present the information on the basis of what the party reasonably believes to be true.

(d) Cargo information required. The following commodity and transportation information, as applicable, must be electronically transmitted to and received by CBP for all required incoming cargo arriving in the United States by truck, to the extent that the particular CBP-approved electronic data interchange system employed can accept this information:

(1) Conveyance number, and (if applicable) equipment number (the number of the conveyance is its Vehicle Identification Number (VIN) or its license plate number and state of issuance; the equipment number, if applicable, refers to the identification number of any trailing equipment or container attached to the power unit);

(2) Carrier identification (this is the truck carrier identification SCAC code (the unique Standard Carrier Alpha Code) assigned for each carrier by the National Motor Freight Traffic Association; see §4.7a(c)(2)(iii) of this chapter);

(3) Trip number and, if applicable, the transportation reference number for each shipment (the transportation reference number is the freight bill number, or Pro Number, if such a number has been generated by the carrier);

(4) Container number(s) (for any containerized shipment) (if different from the equipment number), and the seal numbers for all seals affixed to the equipment or container(s);

(5) The foreign location where the truck carrier takes possession of the cargo destined for the United States;
PART 125—CARTAGE AND LIGHTERAGE OF MERCHANDISE

Sec. 125.0 Scope.

Subpart A—General Provisions

125.1 Classes of cartage.
125.2 Supervision of cartage and lighterage.
125.3 Contracts for Government cartage.

Subpart B—Cartage of Packages for Examination

125.11 Cartage for examination in public stores.
125.12 Cartage for examination at importers' premises or other place.
125.13 Cartage of merchandise withdrawn from general order for regular entry.
125.14 Cartage of unclaimed merchandise.

Subpart C—Importers' Cartage

125.21 Cartage other than for examination.
125.22 Designation of cartman or lighter, or other bonded carrier.
125.23 Failure to designate.
125.24 Failure of designated cartman, lighter, or other bonded carrier to appear.

Subpart D—Delivery and Receipt

125.31 Documents used.
125.32 Merchandise delivered to a bonded store or bonded warehouse.
125.33 Procedure on receiving merchandise.
125.34 Countersigning of documents and notation of bad order or discrepancy.
125.35 Report of loss, detention, or accident.
125.36 Inability to deliver merchandise.

Subpart E—Liability

125.41 Liability for cartage.
125.42 Cancellation of liability.

Section 125.32 also issued under 5 U.S.C. 301; 19 U.S.C. 1484.
Section 125.33 also issued under 19 U.S.C. 1311, 1312, 1555, 1556, 1557, 1623, and 1646a.
Sections 125.41 and 125.42 also issued under 19 U.S.C. 1623.

§ 125.0 Scope.

This part is concerned with cartage and lighterage of merchandise and the duties and liabilities of cartmen and
