OWCP prior to obtaining it through the automated authorization process described in §10.800. OWCP may also utilize the services of a field nurse to facilitate and coordinate medical care for the employee. OWCP may contract with a specific provider or providers to supply such services or appliances, including durable medical equipment and prescribed medications.

(b) Any qualified physician or qualified hospital may provide such services, appliances and supplies. Non-physician providers such as physicians' assistants, nurse practitioners and physical therapists may also provide authorized services for injured employees to the extent allowed by applicable Federal and State law.

(c) Where OWCP has not contracted for the provision of appliances or supplies, only a supplier of durable medical equipment that is registered in Medicare's Durable Medical Equipment, Prosthetics, Orthotics and Supplies Accreditation process may furnish such appliances and supplies. OWCP may apply a test of cost-effectiveness to appliances and supplies, may offset the cost of prior rental payments against a future purchase price, and may provide refurbished appliances where appropriate.

§10.311 What are the special rules for the services of chiropractors?

(a) The services of chiropractors that may be reimbursed are limited by the FECA to treatment to correct a spinal subluxation. The costs of physical and related laboratory tests performed by or required by a chiropractor to diagnose such a subluxation are also payable.

(b) In accordance with 5 U.S.C. 8101(3), a diagnosis of spinal ''subluxation as demonstrated by X-ray to exist'' must appear in the chiropractor's report before OWCP can consider payment of a chiropractor's bill.

(c) A chiropractor may interpret his or her x-rays to the same extent as any other physician. To be given any weight, the medical report must state that x-rays support the finding of spinal subluxation. OWCP will not necessarily require submittal of the x-ray, or a report of the x-ray, but the report must be available for submittal on request.

(d) A chiropractor may also provide services in the nature of physical therapy under the direction of, and as prescribed by, a qualified physician.

§10.312 What are the special rules for the services of clinical psychologists?

A clinical psychologist may serve as a physician only within the scope of his or her practice as defined by State law. Therefore, a clinical psychologist may not serve as a physician for conditions that include a physical component unless the applicable State law allows clinical psychologists to treat physical conditions. A clinical psychologist may also perform testing, evaluation and other services under the direction of a qualified physician.

§10.313 Will OWCP pay for preventive treatment?

The FECA does not authorize payment for preventive measures such as vaccines and inoculations, and in general, preventive treatment may be a responsibility of the employing agency under the provisions of 5 U.S.C. 7901 (see §10.303). However, OWCP can authorize treatment for the following conditions, even though such treatment is designed, in part, to prevent further injury:

(a) Complications of preventive measures which are provided or sponsored by the agency, such as an adverse reaction to prophylactic immunization.

(b) Actual or probable exposure to a known contaminant due to an injury, thereby requiring disease-specific measures against infection. Examples include the provision of tetanus antitoxin or booster toxoid injections for puncture wounds; administration of rabies vaccine for a bite from a rabid or potentially rabid animal; or appropriate measures where exposure to human immunodeficiency virus (HIV) has occurred.

(c) Conversion of tuberculin reaction from negative to positive following exposure to tuberculosis in the performance of duty. In this situation, the appropriate therapy may be authorized.

(d) Where injury to one eye has resulted in loss of vision, periodic examination of the uninjured eye to detect possible sympathetic involvement of the uninjured eye at an early stage.

§ 10.314 Will OWCP pay for the services of an attendant?

Yes, OWCP will pay for the services of an attendant where the need for such services has been medically documented. In the exercise of the discretion afforded by 5 U.S.C. 8111(a), the Director has determined that, except where attendant service payments were being made prior to January 4, 1999, direct payments to the claimant to cover such services will no longer be made. Rather, the cost of providing attendant services will be paid under section 8103 of the Act, and medical bills for these services will be considered under §10.801, so long as the personal care services have been determined to be medically necessary and are provided by a home health aide, licensed practical nurse, or similarly trained individual, subject to requirements specified by OWCP. By paying for the services under section 8103, OWCP can better determine whether the services provided are necessary, and what type of provider is most qualified to provide adequate care to meet the needs of the injured employee. In addition, a system requiring the personal care provider to submit a bill to OWCP, where the amount billed will be subject to OWCP's fee schedule, will result in greater fiscal accountability.

§ 10.315 Will OWCP pay for transportation to obtain medical treatment?

(a) The employee is entitled to reimbursement of reasonable and necessary expenses, including transportation needed to obtain authorized medical services, appliances or supplies. To determine what is a reasonable distance to travel, OWCP will consider the availability of services, the employee's condition, and the means of transportation. Generally, a roundtrip distance of up to 100 miles is considered a reasonable distance to travel. Travel should be undertaken by the shortest route, and if practical, by public conveyance. If the medical evidence shows that the employee is unable to use these means of transportation, OWCP may authorize travel by taxi or special conveyance.

(b) For non-emergency medical treatment, if roundtrip travel of more than 100 miles is contemplated, or air transportation or overnight accommodations will be needed, the employee must submit a written request to OWCP for prior authorization with information describing the circumstances and necessity for such travel expenses. OWCP will approve the request if it determines that the travel expenses are reasonable and necessary, and are incident to obtaining authorized medical services, appliances or supplies. Requests for travel expenses that are often approved include those resulting from referrals to a specialist for further medical treatment, and those involving air transportation of an employee who lives in a remote geographical area with limited local medical services.

(c) If a claimant disagrees with the decision of OWCP that requested travel expenses are either not reasonable or necessary, or are not incident to obtaining authorized medical services or supplies, he or she may utilize the appeals process described in subpart G of this part.

(d) The standard form designated for medical travel refund requests is Form OWCP–957 and must be used to seek reimbursement under this section. This form can be obtained from OWCP.

§ 10.316 After selecting a treating physician, may an employee choose to be treated by another physician instead?

(a) When the physician originally selected to provide treatment for a work-related injury refers the employee to a specialist for further medical care, the employee need not consult OWCP for approval. In all other instances, however, the employee must submit a written request to OWCP with his or her reasons for desiring a change of physician.

(b) OWCP will approve the request if it determines that the reasons submitted are sufficient. Requests that are often approved include those for transfer of care from a general practitioner
