§ 520.903c [Reserved]

§ 520.903d Febantel-praziquantel paste.

(a) Specifications. Each gram of paste contains 34 milligrams of febantel and 3.4 milligrams of praziquantel.

(b) Sponsor. See No. 000859 in §510.600(c) of this chapter.

(c) Conditions of use—(1) Amount—(i) Dogs and cats (over 6 months of age): 10 milligrams of febantel and 1 milligram of praziquantel per kilogram of body weight (1 gram of paste per 7.5 pounds body weight) administered by mouth or in the food once daily for 3 days.

(ii) Puppies and kittens (less than 6 months of age): 15 milligrams of febantel and 1.5 milligrams of praziquantel per kilogram of body weight (1 gram of paste per 5 pounds body weight) administered by mouth on a full stomach once daily for 3 days.

(2) Indications for use. (i) Dogs and puppies: For removal of hookworms (Ancylostoma caninum and Uncinaria stenocephala), whipworms (Trichuris vulpis), ascarids (Toxocara canis and Toxascaris leonina), and tapeworms (Dipylidium caninum and Taenia pisiformis).

(ii) Cats and kittens: For removal of hookworms (Ancylostoma tubaeforme) and ascarids (Toxocara cati) in cats and kittens.

(3) Limitations. Do not use in pregnant animals. Consider alternative therapy or use with caution in animals with pre-existing liver or kidney dysfunction. Administer to puppies and kittens on a full stomach. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 520.905 Fenbendazole oral dosage forms.

§ 520.905a Fenbendazole suspension.

(a) Specifications. Each milliliter of suspension contains 100 milligrams (mg) fenbendazole.

(b) Sponsor. See No. 000061 in §510.600(c) of this chapter.

(c) Related tolerances. See §556.275 of this chapter.

(d) Special considerations. (1) See §500.25 of this chapter.

(2) Fenbendazole suspension 10 percent and approved forms of trichlorfon, when used concomitantly for treating the indications provided in paragraph (e) of this section and for treating infections of stomach bot as provided in §520.2520, have been shown to be compatible and not to interfere with one another.

(e) Conditions of use—(1) Horses—(i) Amount. Administer orally 5 mg per kilogram (kg) (2.3 mg per pound [lb]) for the control of large strongyles, small strongyles, and pinworms; 10 mg/kg for the control of ascarids.

(ii) Indications for use. For the control of large strongyles (Strongylus edentatus, S. equinus, S. vulgaris), small strongyles, and pinworms (Cythonostomum spp., Cylicocyclus spp., Cylicostephanus spp., Triodontophorus spp.),
Indications for use. For the removal and control of lungworm (Dictyocaulus viviparus); stomach worm (adults)—brown stomach worm (Ostertagia ostertagi); stomach worms (adults and 4th-stage larvae)—barberpole worm (Haemonchus contortus and H. placei) and small stomach worm (Trichostongylus axei); intestinal worms (adults and 4th-stage larvae)—hookworm (Dunostomum phlebotomum), threadnecked intestinal worm (Nematodirus helvetianus), small intestinal worm (Cooperia punctata and C. oncophora), bankrupt worm (Trichostrongylus colubriformis), and nodular worm (Oesophagostomum radiatum).

Limitations. Cattle must not be slaughtered for food within 6 days following last treatment. Do not use in lactating goats.

Amount. Retreatment may be needed after 4 to 6 weeks. Goats must not be slaughtered for food for 6 days following last treatment. Do not use in lactating goats.

§ 520.905b Fenbendazole granules.

(a) Specifications. Each gram of granules contains 222 milligrams (mg) fenbendazole.

(b) Sponsor. See No. 000061 in §510.600(c) of this chapter.

(c) Special considerations. See §500.25 of this chapter.

(d) Conditions of use—(1) Horses—(i) Amount. 5 mg/kg (kg) for large strongyles, small strongyles, and pinworms; 10 mg/kg for ascarids.

(ii) Indications for use. For the control of infections of large strongyles (Strongylus edentatus, S. equinus, S. vulgaris), small strongyles, pinworms (Oxyuris equi), and ascarids (Parascaris equorum).

(iii) Limitations. Retreatment may be needed after 4 to 6 weeks. Goats must not be slaughtered for food within 6 days following last treatment. Do not use in lactating goats.

(2) Dogs—(i) Amount. 50 mg/kg daily for 3 consecutive days.

(ii) Indications for use. For the treatment and control of ascarids (Toxocara canis, Toxascaris leonina), hookworms (Ancylostoma caninum, Uncinaria stenocephala), whipworms (Trichuris vulpis), and tapeworms (Taenia pisiformis).

(iii) Limitations. Mix the appropriate amount of drug with a small amount of the usual food; dry dog food may require slight moistening to facilitate mixing. Medicated food must be fully consumed.
