

is made on a Form 709. A late allocation of GST exemption by an executor, other than an allocation that is deemed to be made under section 2632(b)(1) or (c)(1), with respect to a lifetime transfer of property is made on Form 706, Form 706NA, or Form 709 (filed on or before the due date of the transferor's estate tax return) and applies as of the date the allocation is filed. An allocation of GST exemption to a trust (whether or not funded at the time the Form 706 or Form 706NA is filed) is effective if the notice of allocation clearly identifies the trust and the amount of the decedent's GST exemption allocated to the trust. An executor may allocate the decedent's GST exemption by use of a formula. For purposes of this section, an allocation is void if the allocation is made for a trust that has no GST potential with respect to the transferor for whom the allocation is being made, as of the date of the transferor's death. For this purpose, a trust has GST potential even if the possibility of a GST is so remote as to be negligible.

(2) *Automatic allocation after death.* A decedent's unused GST exemption is automatically allocated on the due date for filing Form 706 or Form 706NA to the extent not otherwise allocated by the decedent's executor on or before that date. The automatic allocation occurs whether or not a return is actually required to be filed. Unused GST exemption is allocated pro rata (subject to the rules of § 26.2642-2(b)), on the basis of the value of the property as finally determined for purposes of chapter 11 (chapter 11 value), first to direct skips treated as occurring at the transferor's death. The balance, if any, of unused GST exemption is allocated pro rata (subject to the rules of § 26.2642-2(b)) on the basis of the chapter 11 value of the nonexempt portion of the trust property (or in the case of trusts that are not included in the gross estate, on the basis of the date of death value of the trust) to trusts with respect to which a taxable termination may occur or from which a taxable distribution may be made. The automatic allocation of GST exemption is irrevocable, and an allocation made by the executor after the automatic allocation is made is ineffective. No auto-

matic allocation of GST exemption is made to a trust that will have a new transferor with respect to the entire trust prior to the occurrence of any GST with respect to the trust. In addition, no automatic allocation of GST exemption is made to a trust if, during the nine month period ending immediately after the death of the transferor—

- (i) No GST has occurred with respect to the trust; and
- (ii) At the end of such period no future GST can occur with respect to the trust.

(e) *Effective dates.* This section is applicable as provided in § 26.2601-1(c), with the following exceptions:

(1) Paragraphs (b)(2) and (b)(3), the third sentence of paragraph (b)(4)(i), the fourth sentence of paragraph (b)(4)(ii)(A)(I), paragraphs (b)(4)(iii) and (b)(4)(iv), and the fourth sentence of paragraph (d)(1) of this section, which will apply to elections made on or after July 13, 2004; and

(2) Paragraph (c)(1), and *Example 5* of paragraph (c)(5), which will apply to elections made on or after June 29, 2005.

[T.D. 8644, 60 FR 66903, Dec. 27, 1995; 61 FR 29654, June 12, 1996, as amended by T.D. 9208, 70 FR 37260, June 29, 2005]

§ 26.2641-1 Applicable rate of tax.

The rate of tax applicable to any GST (applicable rate) is determined by multiplying the maximum Federal estate tax rate in effect at the time of the GST by the inclusion ratio (as defined in § 26.2642-1). For this purpose, the maximum Federal estate tax rate is the maximum rate set forth under section 2001(c) (without regard to section 2001(c)(2)).

§ 26.2642-1 Inclusion ratio.

(a) *In general.* Except as otherwise provided in this section, the inclusion ratio is determined by subtracting the applicable fraction (rounded to the nearest one-thousandth (.001)) from 1. In rounding the applicable fraction to the nearest one-thousandth, any amount that is midway between one one-thousandth and another one-thousandth is rounded up to the higher of those two amounts.

(b) *Numerator of applicable fraction*—
 (1) *In general.* Except as otherwise provided in this paragraph (b), and in §§ 26.2642-3 (providing a special rule for charitable lead annuity trusts) and 26.2642-4 (providing rules for the re-determination of the applicable fraction), the numerator of the applicable fraction is the amount of GST exemption allocated to the trust (or to the transferred property in the case of a direct skip not in trust).

(2) *GSTs occurring during an ETIP*—(i) *In general.* For purposes of determining the inclusion ratio with respect to a taxable termination or a taxable distribution that occurs during an ETIP, the numerator of the applicable fraction is the sum of—

(A) The GST exemption previously allocated to the trust (including any allocation made to the trust prior to any taxable termination or distribution) reduced (but not below zero) by the nontax amount of any prior GSTs with respect to the trust; and

(B) Any GST exemption allocated to the trust on a timely ETIP return filed after the termination of the ETIP. See § 26.2632-1(c)(5) *Example 2*.

(ii) *Nontax amount of a prior GST.* (1) The nontax amount of a prior GST with respect to the trust is the amount of the GST multiplied by the applicable fraction attributable to the trust at the time of the prior GST.

(2) For rules regarding the allocation of GST exemption to property during an ETIP, see § 26.2632-1(c).

(c) *Denominator of applicable fraction*—
 (1) *In general.* Except as otherwise provided in this paragraph (c) and in §§ 26.2642-3 and 26.2642-4, the denominator of the applicable fraction is the value of the property transferred to the trust (or transferred in a direct skip not in trust) (as determined under § 26.2642-2) reduced by the sum of—

(i) Any Federal estate tax and any State death tax incurred by reason of the transfer that is chargeable to the trust and is actually recovered from the trust;

(ii) The amount of any charitable deduction allowed under section 2055, 2106, or 2522 with respect to the transfer; and

(iii) In the case of a direct skip, the value of the portion of the transfer

that is a nontaxable gift. See paragraph (c)(3) of this section for the definition of nontaxable gift.

(2) *Zero denominator.* If the denominator of the applicable fraction is zero, the inclusion ratio is zero.

(3) *Nontaxable gifts.* Generally, for purposes of chapter 13, a transfer is a nontaxable gift to the extent the transfer is excluded from taxable gifts by reason of section 2503(b) (after application of section 2513) or section 2503(e). However, a transfer to a trust for the benefit of an individual is not a nontaxable gift for purposes of this section unless—

(i) Trust principal or income may, during the individual's lifetime, be distributed only to or for the benefit of the individual; and

(ii) The assets of the trust will be includible in the gross estate of the individual if the individual dies before the trust terminates.

(d) *Examples.* The following examples illustrate the provisions of this section. See § 26.2652-2(d) *Examples 2 and 3* for illustrations of the computation of the inclusion ratio where the special (reverse QTIP) election may be applicable.

Example 1. Computation of the inclusion ratio. T transfers \$100,000 to a newly-created irrevocable trust providing that income is to be accumulated for 10 years. At the end of 10 years, the accumulated income is to be distributed to T's child, C, and the trust principal is to be paid to T's grandchild. T allocates \$40,000 of T's GST exemption to the trust on a timely-filed gift tax return. The applicable fraction with respect to the trust is .40 (\$40,000 (the amount of GST exemption allocated to the trust) over \$100,000 (the value of the property transferred to the trust)). The inclusion ratio is .60 (1 - .40). If the maximum Federal estate tax rate is 55 percent at the time of a GST, the rate of tax applicable to the transfer (applicable rate) will be .333 (55 percent (the maximum estate tax rate) × .60 (the inclusion ratio)).

Example 2. Gift entirely nontaxable. On December 1, 1996, T transfers \$10,000 to an irrevocable trust for the benefit of T's grandchild, GC. GC possesses a right to withdraw any contributions to the trust such that the entire transfer qualifies for the annual exclusion under section 2503(b). Under the terms of the trust, the income is to be paid to GC for 10 years or until GC's prior death. Upon the expiration of GC's income interest, the trust principal is payable to GC or GC's estate. The transfer to the trust is a direct

skip. T made no prior gifts to or for the benefit of GC during 1996. The entire \$10,000 transfer is a nontaxable transfer. For purposes of computing the tax on the direct skip, the denominator of the applicable fraction is zero, and thus, the inclusion ratio is zero.

Example 3. Gift nontaxable in part. T transfers \$12,000 to an irrevocable trust for the benefit of T's grandchild, GC. Under the terms of the trust, the income is to be paid to GC for 10 years or until GC's prior death. Upon the expiration of GC's income interest, the trust principal is payable to GC or GC's estate. Further, GC has the right to withdraw \$10,000 of any contribution to the trust such that \$10,000 of the transfer qualifies for the annual exclusion under section 2503(b). The amount of the nontaxable transfer is \$10,000. Solely for purposes of computing the tax on the direct skip, T's transfer is divided into two portions. One portion is equal to the amount of the nontaxable transfer (\$10,000) and has a zero inclusion ratio; the other portion is \$2,000 (\$12,000 - \$10,000). With respect to the \$2,000 portion, the denominator of the applicable fraction is \$2,000. Assuming that T has sufficient GST exemption available, the numerator of the applicable fraction is \$2,000 (unless T elects to have the automatic allocation provisions not apply). Thus, assuming T does not elect to have the automatic allocation not apply, the applicable fraction is one ($\$2,000/\$2,000 = 1$) and the inclusion ratio is zero ($1 - 1 = 0$).

Example 4. Gift nontaxable in part. Assume the same facts as in *Example 3*, except T files a timely Form 709 electing that the automatic allocation of GST exemption not apply to the \$12,000 transferred in the direct skip. T's transfer is divided into two portions, a \$10,000 portion with a zero inclusion ratio and a \$2,000 portion with an applicable fraction of zero ($0/\$2,000 = 0$) and an inclusion ratio of one ($1 - 0 = 1$).

§ 26.2642-2 Valuation.

(a) *Lifetime transfers—(1) In general.* For purposes of determining the denominator of the applicable fraction, the value of property transferred during life is its fair market value on the effective date of the allocation of GST exemption. In the case of a timely allocation under § 26.2632-1(b)(2)(ii), the denominator of the applicable fraction is the fair market value of the property as finally determined for purposes of chapter 12.

(2) *Special rule for late allocations during life.* If a transferor makes a late allocation of GST exemption to a trust, the value of the property transferred to the trust is the fair market value of

the trust assets determined on the effective date of the allocation of GST exemption. Except as otherwise provided in this paragraph (a)(2), if a transferor makes a late allocation of GST exemption to a trust, the transferor may, solely for purposes of determining the fair market value of the trust assets, elect to treat the allocation as having been made on the first day of the month during which the late allocation is made (valuation date). An election under this paragraph (a)(2) is not effective with respect to a life insurance policy or a trust holding a life insurance policy, if the insured individual has died. An allocation subject to the election contained in this paragraph (a)(2) is not effective until it is actually filed with the Internal Revenue Service. The election is made by stating on the Form 709 on which the allocation is made—

- (i) That the election is being made;
- (ii) The applicable valuation date; and
- (iii) The fair market value of the trust assets on the valuation date.

(b) *Transfers at death—(1) In general.* Except as provided in paragraphs (b) (2) and (3) of this section, in determining the denominator of the applicable fraction, the value of property included in the decedent's gross estate is its value for purposes of chapter 11. In the case of qualified real property with respect to which the election under section 2032A is made, the value of the property is the value determined under section 2032A provided the recapture agreement described in section 2032A(d)(2) filed with the Internal Revenue Service specifically provides for the signatories' consent to the imposition of, and personal liability for, additional GST tax in the event an additional estate tax is imposed under section 2032A(c). See § 26.2642-4(a)(4). If the recapture agreement does not contain these provisions, the value of qualified real property as to which the election under section 2032A is made is the fair market value of the property determined without regard to the provisions of section 2032A.

(2) *Special rule for pecuniary payments—(i) In general.* If a pecuniary payment is satisfied with cash, the denominator of the applicable fraction is
