§ 19.184 Scale tank minimum graduations.

(a) The beams or dials on scale tanks used for tax determination must have minimum graduations not greater than the following:

<table>
<thead>
<tr>
<th>Quantity to be weighed</th>
<th>Minimum graduation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 2,000 pounds</td>
<td>½ pound</td>
</tr>
<tr>
<td>Between 2,000 and 6,000 pounds</td>
<td>1 pound</td>
</tr>
<tr>
<td>Between 6,000 and 20,000 pounds</td>
<td>2 pounds</td>
</tr>
<tr>
<td>Between 20,000 and 50,000 pounds</td>
<td>5 pounds</td>
</tr>
<tr>
<td>Over 50,000 pounds</td>
<td>10 pounds</td>
</tr>
</tbody>
</table>

(b) For scales having a capacity greater than 2,000 pounds, the minimum quantity which may be entered onto the weighing tank scale for gauging for tax determination will be the greater of:

(1) 1,000 times the minimum graduation of the scale, or
(2) 5 percent of the total capacity of the weighing tank scale.

(c) The weighing of lesser quantities for determination of tax may be authorized by the appropriate TTB officer where the beam of the scale is calibrated in ½ pound or 1 pound graduations and it is found by actual test that the scales are accurate at each graduation.

(d) Lots of spirits weighing 1,000 pounds or less shall be weighed on scales having ½ pound graduations.

(26 U.S.C. 5006, 5204, 5505)

§ 19.185 Testing scale tanks for accuracy.

(a) A proprietor who uses a scale tank for tax determination must ensure the accuracy of the scale through periodic testing. Testing of the scale must be conducted at least every 6 months and whenever the scale is adjusted or repaired.

(b) A proprietor also must test, at least once a month, the gallonage represented to be in a scale tank against the gallonage indicated by volumetric determination of the contents of the tank. However, if the scale is not used during a month, it is only necessary to verify against the volumetric determination when the scale is next used. The proprietor must make the volumetric determination in accordance with part 30 of this chapter. If the variation exceeds 0.5 percent of the quantity shown in the tank, the proprietor must take appropriate action to verify the accuracy of the scale.

(c) If the appropriate TTB officer determines that a scale may be inaccurate, the proprietor must test the accuracy of the scale.

(26 U.S.C. 5006, 5204, 5505)

PACKAGE SCALE AND PIPELINE REQUIREMENTS

§ 19.186 Package scales.

Proprietors must ensure that scales used to weigh packages are tested at least every 6 months and whenever they are adjusted or repaired. However, if a scale is not used during a 6-month period, it is only necessary to test the scale prior to its next use. Scales used to weigh packages that hold 10 wine gallons or less must indicate weight in ounces or hundredths of a pound.

(26 U.S.C. 5204)

§ 19.187 Pipelines.

All pipelines, including flexible hoses, that are used to transfer spirits, denatured spirits, articles, and wines must be constructed, arranged, and secured so as to ensure protection of the revenue and permit ready examination. The appropriate TTB officer may approve pipelines that cannot be readily examined if they pose no jeopardy to the revenue.

(26 U.S.C. 5178)

MEASURING AND PROOFING EQUIPMENT REQUIREMENTS

§ 19.188 Measuring devices and proofing instruments.

(a) General. A proprietor of a distilled spirits plant must have accurate instruments and equipment at the plant for determining the proof and volume of spirits.

(b) Instruments. The hydrometers and thermometers that a proprietor uses to gauge spirits must show subdivisions or graduations of proof and temperature as specified in part 30 of this chapter. Proprietors must frequently test their hydrometers and thermometers to ensure their accuracy. If an instrument appears to be in error, the proprietor may not use the instrument until
