§ 223.61 Establishing minimum stumpage rates.

The Chief, Forest Service, shall establish minimum stumpage rates, i.e., "base rates," for species and products on individual National Forests, or groups of National Forests. Timber shall be sold for appraised value or minimum stumpage rates, whichever is higher. No timber may be sold or cut under timber sale contracts for less than minimum stumpage rates except to provide for the removal of insect-infested, diseased, dead or distressed timber or in accordance with contract provisions specifically providing for catastrophically-affected timber and incidental amounts of material not meeting utilization standards of the timber sale contract. For any timber sale offering where deposits are to be required for reforestation under the Act of June 9, 1930, as amended (46 Stat. 527; 16 U.S.C. 576–576b) which exceed the value of the established minimum stumpage rates, the minimum rates may be increased by the approving officer as necessary to the amount of such required reforestation deposits and a minimum deposit to the Treasury. Minimum rates in timber sale contracts will not be set higher than established minimum rates for purposes other than assuring adequate funds for reforestation.

§ 223.63 Advertised rates.

Timber shall be advertised for sale at its appraised value. The road construction cost used to develop appraised value means the total estimated cost of constructing all permanent roads specified in the timber sale contract estimated as if construction is to be accomplished by the timber purchaser. The advertised rates shall be not less than minimum stumpage rates, except that sales of insect-infested, diseased, dead, or distressed timber may be sold at less than minimum rates when harvest of such timber is necessary to protect or improve the forest or prevent waste of usable wood fiber.

§ 223.64 Appraisal on a lump-sum value or rate per unit of measure basis.

Timber may be appraised and sold at a lump-sum value or at a rate per unit of measure which rate may be adjusted during the period of the contract and as therein specified in accordance with formulas or other equivalent specifications for the following reasons:

(a) Variations in lumber or other product value indices between the price index base specified in the contract and the price index actually experienced during the cutting of the timber;

(b) Variance between advertised rates and rates redetermined by appraisal at dates specified in the contract;
