(1) The primary objective of managing cultural resources is the protection of the resource from damage or destruction. To the extent consistent with protection, cultural resources may also be managed for scientific research, public education and enjoyment. Where interpretation of these sites for public benefit and knowledge is developed, it shall be compatible with the protection of cultural resources.

(2) The authorized officer shall establish priorities for management emphasis and protection of cultural resources based, in part, on whether the appropriate State Historic Preservation Office has concurred with the Forest Service’s determination that a cultural resource is significant.

(3) Significant cultural resources are to be protected on-site, unless the authorized officer determines that off-site protection is preferable because adequate protection cannot be provided on-site, the resource is already adequately represented and protected on-site elsewhere, protection on-site is not consistent with the administration of Wilderness Lands, or for other good cause shown. Information about significant cultural resources shall be documented.

(4) The primary objective of managing paleontological resources is scientific research. Paleontological resources may only be disturbed or removed in conjunction with scientific research and only upon the issuance of prior written authorization of the disturbance or removal activity.

(b) Wilderness Lands. The following standards and guidelines apply to the use of motorized and mechanical equipment in the Wilderness Lands category of the HCNRA.

(1) The standards and guidelines for Other Lands and Wild and Scenic Rivers in paragraph (a) of this section also apply to Wilderness Lands.

(2) Public education and information activities concerning cultural resources on Wilderness Lands may not be offered or established inside Wilderness Lands.

(3) New trails and relocations of existing trails may not be developed for the sole purpose of providing public access to cultural resource sites on Wilderness Lands.

§ 292.44 Use of motorized and mechanical equipment.

The standards and guidelines of this section apply to the use of motorized and mechanical equipment in the HCNRA. These standards and guidelines shall not be construed to impair or preclude use of such equipment in the Forest Service’s administration of the HCNRA; authorized scientific and other research activities within the HCNRA; timber harvesting, mining, or grazing activities as authorized in §§292.46–292.48 of this subpart; responses by the Forest Service or any other Federal, state, or local agency to public health or safety emergencies; or access to private inholdings within the HCNRA.

(a) Other Lands. The following standards and guidelines apply to the use of motorized and mechanical equipment in the Other Lands category of the HCNRA.

(1) Motorized and mechanical equipment may be used on designated Forest Service roads, trails, and airstrips subject to terms and conditions deemed necessary by the authorized officer for the safe use of such facilities.

(2) The use of motorized and mechanical equipment is prohibited off of designated Forest Service roads, trails, and airstrips unless authorized by the authorized officer subject to terms and conditions deemed necessary by the authorized officer for the safe use of such equipment and to ensure that its use is compatible with the Act.

(b) Wild and Scenic Rivers. The following standards and guidelines apply to the use of motorized and mechanical equipment in the Wild and Scenic Rivers category in the HCNRA.

(1) The use of motorized and mechanical equipment on designated Forest Service roads, trails, and airstrips is permissible on wild and scenic river segments classified “scenic” or “recreational” subject to terms and conditions necessary for safe use of such equipment and to ensure its use is compatible with the Wild and Scenic Rivers Act.

(2) The use of motorized and mechanical equipment on designated Forest
§ 292.45 Use of motorized and non-motorized rivercraft.

Service roads, trails, and airstrips is prohibited on wild and scenic river segments classified “wild” except as provided for by the authorized officer upon a determination that such use is necessary for the administration of the river or to protect and enhance the values for which river was designated.

(c) Wilderness Lands. Except as provided for in Sections 4 (c) and (d) of the Wilderness Act and regulations at 36 CFR parts 261 and 293, the use of motorized and mechanical equipment is prohibited on Wilderness Lands.

§ 292.45 Use of motorized and non-motorized rivercraft.

The standards and guidelines of this section apply to the use of motorized and non-motorized rivercraft on rivers within the HCNRA.

(a) The use of non-motorized rivercraft may be permitted subject to restrictions on size, type of craft, numbers, duration, seasons, or other matters which may be deemed by the authorized officer to be necessary to ensure the safe use and enjoyment of the rivers: Provided, that where wild and scenic rivers are concerned, the authorized officer may impose such additional terms and conditions as may be necessary to protect and enhance the values for which the river was designated.

(b) The use of motorized rivercraft is prohibited except on the Snake River and that portion of the Salmon River in the HCNRA administered by the Forest Service where such activity may be permitted subject to restrictions on size, type of craft, numbers, noise limits, duration, seasons or other matters which may be deemed by the authorized officer necessary for the safe use and enjoyment of the rivers: Provided, that where wild and scenic rivers are involved, the authorized officer may impose such additional terms and conditions as may be necessary to protect and enhance the values for which the river was designated.

(c) The use of motorized and non-motorized rivercraft is subject to all federal and state boating registration and safety laws.

(d) The use of motorized or non-motorized rivercraft on the Snake River and that portion of the Salmon River in the HCNRA administered by the Forest Service requires prior written authorization from the authorized officer.

(e) In authorizing the use of motorized and non-motorized rivercraft on the Snake River, the authorized officer must reasonably accommodate both private and commercial users of each type of rivercraft.

(f) In authorizing the use of motorized and non-motorized rivercraft on the Snake River, the authorized officer must ensure that the carrying capacity of the river is not exceeded.

(g) In authorizing the use of motorized and non-motorized rivercraft on the Snake River, the authorized officer shall seek to minimize, where practicable, conflicts between motorized and non-motorized rivercraft users and between both types of rivercraft users and all other users of the river.

§ 292.46 Timber harvesting activities.

(a) Other Lands. The standards and guidelines of this section apply to timber harvesting activities in the Other Lands category of the HCNRA.

(1) Timber may be harvested only to protect and enhance ecosystem health, wildlife habitat, or recreational and scenic uses; to reduce the risk of harm posed by hazard trees; or to respond to natural events such as wildfire, flood, earthquake, volcanic eruption, high winds, and disease or insect infestation.

(2) Where authorized, trees may be harvested by selective cuttings. Openings created by the timber harvesting activity must be limited in size and number to the minimum necessary to accomplish the purpose of the harvest, and must blend with the natural landscape to the extent practicable.

(b) Wild and Scenic Rivers. The following standards and guidelines apply to timber harvesting activities in the Wild and Scenic Rivers category of the HCNRA.

(1) Timber may be harvested on river segments classified “scenic” or “recreational” to protect and enhance the values for which the river was designated.

(2) Timber may be harvested on river segments classified “wild” only when necessary to provide for recreational facilities such as trails, to reduce the
