date, then you need only to submit a
statement indicating that no softwood
species were dried. In addition, submit
with the Notification of Compliance
Status a signed statement by a respon-
sible official that certifies with truth,
accuracy, and completeness that the
veneer dryer will be used to process
less than 30 percent softwood
species in the future.

§ 63.2265 Initial compliance dem-
onstration for a softwood veneer
dryer.

If you operate a softwood veneer
dryer, you must develop a plan for re-
view and approval for minimizing fugi-
tive emissions from the veneer dryer
heated zones, and you must submit the
plan with your Notification of Compli-
ance Status.

§ 63.2266 Initial compliance dem-
onstration for a veneer redryer.

If you operate a veneer redryer, you
must record the inlet moisture content
of the veneer processed in the redryer
according to § 63.2269(a) and (c) and
§ 63.2270 for a minimum of 30 calendar
days. You must designate and clearly
identify each veneer redryer. You must
submit the highest recorded 24-hour av-
erage inlet veneer moisture content
with your Notification of Compliance
Status to show that your veneer
redryer processes veneer with an inlet
moisture content of less than or equal
to 25 percent (by weight, dry basis). In
addition, submit with the Notification
of Compliance Status a signed state-
ment by a responsible official that cer-
tifies with truth, accuracy, and com-
pleteness that the veneer redryer will
dry veneer with a moisture content
less than 25 percent (by weight, dry
basis) in the future.

§ 63.2267 Initial compliance dem-
onstration for a reconstituted wood
product press or board cooler.

If you operate a reconstituted wood
product press at a new or existing af-
fected source or a reconstituted wood
product board cooler at a new affected
source, then you must either use a
wood products enclosure as defined in
§ 63.2292 or measure the capture effi-
ciency of the capture device for the
press or board cooler using Methods 204
and 204A through 204F of 40 CFR part
51, appendix M (as appropriate), or
using the alternative tracer gas meth-

od contained in appendix A to this sub-
part. You must submit documentation
that the wood products enclosure
meets the press enclosure design cri-
teria in § 63.2292 or the results of the
capture efficiency verification with
your Notification of Compliance Status.

§ 63.2268 Initial compliance dem-
onstration for a wet control device.

If you use a wet control device as the
sole means of reducing HAP emissions,
you must develop and implement a
plan for review and approval to address
how organic HAP captured in the
wastewater from the wet control device
is contained or destroyed to minimize
re-release to the atmosphere such that
the desired emissions reductions are
obtained. You must submit the plan
with your Notification of Compliance
Status.

§ 63.2269 What are my monitoring in-
stallation, operation, and mainte-
nance requirements?

(a) General continuous parameter moni-
toring requirements. You must install,
operate, and maintain each continuous
parameter monitoring system (CPMS) ac-
cording to paragraphs (a)(1) through
(3) of this section.

(1) The CPMS must be capable of
completing a minimum of one cycle of
operation (sampling, analyzing, and re-
cording) for each successive 15-minute
period.

(2) At all times, you must maintain
the monitoring equipment including,
but not limited to, maintaining nec-

essary parts for routine repairs of the
monitoring equipment.

(3) Record the results of each inspec-
tion, calibration, and validation check.

(b) Temperature monitoring. For each
temperature monitoring device, you
must meet the requirements in para-
graphs (a) and (b)(1) through (6) of this
section.

(1) Locate the temperature sensor in
a position that provides a representa-
tive temperature.
