§ 194.55  

(2) Identifies the processes, events, or sequences of processes and events included in compliance assessment results provided in any compliance application; and  

(3) Documents why any processes, events, or sequences of processes and events identified pursuant to paragraph (a)(1) of this section were not included in compliance assessment results provided in any compliance application.  

(b) Compliance assessments of undisturbed performance shall include the effects on the disposal system of:  

(1) Existing boreholes in the vicinity of the disposal system, with attention to the pathways they provide for migration of radionuclides from the site; and  

(2) Any activities that occur in the vicinity of the disposal system prior to or soon after disposal. Such activities shall include, but shall not be limited to: Existing boreholes and the development of any existing leases that can be reasonably expected to be developed in the near future, including boreholes and leases that may be used for fluid injection activities.  

§ 194.55  

Results of compliance assessments.  

(a) Compliance assessments shall consider and document uncertainty in the performance of the disposal system.  

(b) Probability distributions for uncertain disposal system parameter values used in compliance assessments shall be developed and documented in any compliance application.  

(c) Computational techniques which draw random samples from across the entire range of values of each probability distribution developed pursuant to paragraph (b) of this section shall be used to generate a range of:  

(1) Estimated committed effective doses received from all pathways pursuant to §194.51 and §194.52;  

(2) Estimated radionuclide concentrations in USDWs pursuant to §194.53; and  

(3) Estimated dose equivalent received from USDWs pursuant to §194.52 and §194.53.  

(d) The number of estimates generated pursuant to paragraph (c) of this section shall be large enough such that the maximum estimates of doses and concentrations generated exceed the 99th percentile of the population of estimates with at least a 0.95 probability.  

(e) Any compliance application shall display:  

(1) The full range of estimated radiation doses; and  

(2) The full range of estimated radionuclide concentrations.  

(f) Any compliance application shall document that there is at least a 95 percent level of statistical confidence that the mean and the median of the range of estimated radiation doses and the range of estimated radionuclide concentrations meet the requirements of §191.15 and part 191, subpart C of this chapter, respectively.  

Subpart D—Public Participation  

§ 194.61  

Advance notice of proposed rulemaking for certification.  

(a) Upon receipt of a compliance application submitted pursuant to section 8(d)(1) of the WIPP LWA and §194.11, the Agency will publish in the FEDERAL REGISTER an Advance Notice of Proposed Rulemaking announcing that a compliance application has been received, soliciting comment on such application, and announcing the Agency’s intent to conduct a rulemaking to certify whether the WIPP facility will comply with the disposal regulations.  

(b) A copy of the compliance application will be made available for inspection in Agency dockets established pursuant to §194.67.  

(c) The notice will provide a public comment period of 120 days.  

(d) A public hearing concerning the notice will be held if a written request is received by the Administrator or the Administrator’s authorized representative within 30 calendar days of the date of publication pursuant to paragraph (a) of this section.  

(e) Any comments received on the notice will be made available for inspection in the dockets established pursuant to §194.67.  

(f) Any comments received on the notice will be provided to the Department and the Department may submit to the Agency written responses to the comments.
