Provided, that all reasonable measures
have been taken (i) to prevent, reduce
and control such contact to the max-
imum extent feasible; and (ii) to miti-
gate the effects of such contact once it
has occurred.

§ 415.312 Effluent limitations guide-
lines representing the degree of ef-
fluent reduction attainable by the
application of the best practicable
control technology currently avail-
able (BPT).

Except as provided in 40 CFR 125.30
through 125.32, any existing point
source subject to this subpart must
achieve the following effluent limita-
tions representing the degree of efflu-
ent reduction attainable by the appli-
cation of the best practicable control
technology currently available (BPT):
There shall be no discharge of process
wastewater pollutants to navigable
waters.

§§ 415.313–415.315 [Reserved]

§ 415.316 Pretreatment standards for
new sources (PSNS).

Except as provided in 40 CFR 403.7,
any new source subject to this subpart
which introduces pollutants into a pub-
licly owned treatment works must
comply with 40 CFR part 403 and
achieve the following pretreatment
standards for new sources (PSNS): The
limitations are the same as specified in
§ 415.312.

[49 FR 33421, Aug. 22, 1984]

Subpart AF—Carbon Dioxide Pro-
duction Subcategory [Re-
served]

Subpart AG—Carbon Monoxide
and By-Product Hydrogen
Production Subcategory

§ 415.330 Applicability; description of
the carbon monoxide and by-prod-
uct hydrogen production sub-
category.

The provisions of this subpart are ap-
plicable to discharges resulting from
the production of carbon monoxide and
by-product hydrogen by the reforming
process.

§ 415.331 Specialized definitions.

For the purpose of this subpart:
(a) Except as provided below, the gen-
eral definitions, abbreviations and
methods of analysis set forth in 40 CFR
part 401 shall apply to this subpart.

(b) The term product shall mean car-
bon monoxide plus hydrogen.

(c) The term process wastewater
means any water which, during manu-
facturing or processing, comes into di-
rect contact with or results from the
production or use of any raw material,
intermediate product, finished product,
by-product, or waste product. The term
“process wastewater” does not include
contaminated nonprocess wastewater,
as defined below.

(d) The term process wastewater pol-
lutants means pollutants present in
process wastewater.

(e) The term contaminated nonprocess
wastewater shall mean any water
which, during manufacturing or pro-
cessing, comes into incidental contact
with any raw material, intermediate
product, finished product, by-product
or waste product by means of (1) rain-
fall runoff; (2) accidental spills; (3) ac-
cidental leaks caused by the failure of
process equipment, which are repaired
within the shortest reasonable time
not to exceed 24 hours after discovery;
and (4) discharges from safety showers
and related personal safety equipment:
Provided, that all reasonable measures
have been taken (i) to prevent, reduce
and control such contact to the max-
imum extent feasible; and (ii) to miti-
gate the effects of such contact once it
has occurred.

§ 415.332 Effluent limitations guide-
lines representing the degree of ef-
fluent reduction attainable by the
application of the best practicable
control technology currently avail-
able (BPT).

Except as provided in 40 CFR 125.30
through 125.32, any existing point
source subject to this subpart must
achieve the following effluent limita-
tions representing the degree of efflu-
ent reduction attainable by the appli-
cation of the best practicable control
technology currently available (BPT):
