the Chattanooga, Tennessee, nonattainment area has attaining data for the 1997 annual PM$_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM$_{2.5}$ NAAQS.

(d) Determination of attaining data. EPA has determined the Knoxville, Tennessee, nonattainment area has attaining data for the 1997 annual PM$_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM$_{2.5}$ NAAQS.

(e) Determination of attaining data. EPA has determined Knoxville-Sevierville-La Follette, Tennessee, nonattainment area has attaining data for the 2006 24-hour PM$_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 2006 24-hour PM$_{2.5}$ NAAQS.

§ 52.2233 Significant deterioration of air quality.

(a)(1) Paragraph 1200–3–9–01(4–)(0–)2. of Tennessee’s regulations is disapproved because it does not require that the consent of the Governor(s) of affected states be obtained when innovative technology waivers are granted. EPA retains permitting authority for sources requesting innovative technology waivers which would significantly impact air quality in adjacent states.

(2) Tennessee’s definition of stationary source specifically excludes the activities of any Vessel. This exclusion is not currently approvable and EPA is deferring action on it pending final rulemaking on the issue. EPA retains authority for permits which involve vessel emissions where a source is not willing to include all vessel emissions in the definition of source.

(b) The requirements of §52.21 except paragraph (a)(1) are hereby incorporated and made part of the applicable SIP for the State of Tennessee for the following purposes:

(1) Permitting of sources requesting innovative technology waivers which would significantly impact air quality in adjacent states.

(2) Permitting of sources involving vessel emissions where the source is unwilling to include all vessel emissions in the definition of source.

(c)(1) All applications and other information required pursuant to §52.21 of this part from sources located or to be located in the State of Tennessee shall be submitted to the State agency, Tennessee Department of Environment and Conservation, Division of Air Pollution Control, 401 Church Street, 9th Floor, L&C Annex, Nashville, Tennessee 37243–1531, or local agencies, Knox County Air Quality Management Department of Public Health, 140 Dameron Avenue, Knoxville, Tennessee.
§ 52.2234 Visibility protection.

(a) Regional Haze. The requirements of section 169A of the Clean Air Act are not met because the regional haze plan submitted by Tennessee on April 4, 2008, does not include fully approvable measures for meeting the requirements of 40 CFR 51.308(d)(3) and 51.308(e) with respect to emissions of NO\textsubscript{X} and SO\textsubscript{2} from electric generating units. EPA has given limited approval and limited disapproval to the plan provisions addressing these requirements.

(b) [Reserved]

(c) Measures Addressing Limited Disapproval Associated with NO\textsubscript{X}. The deficiencies associated with NO\textsubscript{X} identified in EPA’s limited disapproval of the regional haze plan submitted by Tennessee on April 4, 2008, do not include fully approvable measures for meeting the requirements of 40 CFR 51.308(d)(3) and 51.308(e) with respect to emissions of NO\textsubscript{X} and SO\textsubscript{2} from electric generating units. EPA has given limited approval and limited disapproval to the plan provisions addressing these requirements.

(d) Measures Addressing Limited Disapproval Associated with SO\textsubscript{2}. The deficiencies associated with SO\textsubscript{2} identified in EPA’s limited disapproval of the regional haze plan submitted by Tennessee on April 4, 2008, are satisfied by §52.2241.

§ 52.2235 Control strategy: Ozone.

(a) Determination—EPA is determining that, as of August 8, 1995, the Nashville ozone nonattainment area has attained the ozone standard and that the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and related requirements of section 172(c)(9) of the Clean Air Act do not apply to the area for so long as the area does not monitor any violations of the ozone standard. If a violation of the ozone NAAQS is monitored in the Nashville ozone nonattainment area, these determinations shall no longer apply.

(b) Nonregulatory provisions for the implementation of a basic I/M program in Rutherford, Sumner, Williamson, and Wilson Counties, submitted on July 13, 1994, were approved by EPA on September 26, 1995.

(c) Determination of Attaining Data. EPA has determined, as of October 12, 2010, the Knoxville, Tennessee nonattainment area has attaining data for the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standards for as long as this area continues to meet the 1997 8-hour ozone NAAQS.

§ 52.2236 Control strategy: lead.

(a) The Tennessee Department of Environment and Conservation has submitted revisions to the Tennessee SIP on October 6, 1994. These revisions address the requirements necessary to change a lead nonattainment area to attainment. The maintenance plan for the Fayette County area near Rossville, Tennessee is comprised of a maintenance demonstration and NSR/PSD program. For areas where the only lead source has shut down, these components are sufficient for an approvable maintenance plan. The State’s maintenance plan is complete and satisfies all of the requirements of section 175(A) of the CAA.

(b) Determination of attaining data. EPA has determined the Bristol, Tennessee, nonattainment area has attaining data for the 2008 lead (Pb) NAAQS. This clear data determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures,
