Centers for Medicare & Medicaid Services, HHS § 482.92

Survival rate and graft survival rate; and
(ii) All three of the following thresholds are crossed over:
(A) The one-sided p-value is less than 0.05,
(B) The number of observed events (patient deaths or graft failures) minus the number of expected events is greater than 3, and
(C) The number of observed events divided by the number of expected events is greater than 1.5.

(d) Exceptions. (1) A heart-lung transplant center is not required to comply with the clinical experience requirements in paragraph (b) of this section or the outcome requirements in paragraph (c) of this section for heart-lung transplants performed at the center.
(2) An intestine transplant center is not required to comply with the outcome requirements in paragraph (c) of this section for intestine, combined liver-intestine, and multivisceral transplants performed at the center.
(3) A pancreas transplant center is not required to comply with the clinical experience requirements in paragraph (b) of this section or the outcome requirements in paragraph (c) of this section for pancreas transplants performed at the center.
(4) A center that is approved to perform pediatric transplants is not required to comply with the clinical experience requirements in paragraph (b) of this section to be re-approved.

TRANSPLANT CENTER PROCESS REQUIREMENTS

§ 482.90 Condition of participation: Patient and living donor selection.

The transplant center must use written patient selection criteria in determining a patient’s suitability for placement on the waiting list or a patient’s suitability for transplantation. If a center performs living donor transplants, the center also must use written donor selection criteria in determining the suitability of candidates for donation.

(a) Standard: Patient selection. Patient selection criteria must ensure fair and non-discriminatory distribution of organs.
(1) Prior to placement on the center’s waiting list, a prospective transplant candidate must receive a psychosocial evaluation, if possible.
(2) Before a transplant center places a transplant candidate on its waiting list, the candidate’s medical record must contain documentation that the candidate’s blood type has been determined.
(3) When a patient is placed on a center’s waiting list or is selected to receive a transplant, the center must document in the patient’s medical record the patient selection criteria used.
(4) A transplant center must provide a copy of its patient selection criteria to a transplant patient, or a dialysis facility, as requested by a patient or a dialysis facility.

(b) Standard: Living donor selection. The living donor selection criteria must be consistent with the general principles of medical ethics. Transplant centers must:
(1) Ensure that a prospective living donor receives a medical and psychosocial evaluation prior to donation,
(2) Document in the living donor’s medical records the living donor’s suitability for donation, and
(3) Document that the living donor has given informed consent, as required under § 482.102.

§ 482.92 Condition of participation: Organ recovery and receipt.

Transplant centers must have written protocols for validation of donor-beneficiary blood type and other vital data for the deceased organ recovery, organ receipt, and living donor organ transplantation processes. The transplanting surgeon at the transplant center is responsible for ensuring the medical suitability of donor organs for transplantation into the intended recipient.

(a) Standard: Organ receipt. After an organ arrives at a transplant center, prior to transplantation, the transplanting surgeon and another licensed health care professional must verify that the donor’s blood type and other vital data are compatible with transplantation of the intended beneficia

(b) Standard: Living donor transplantation. If a center performs living donor transplants, the transplanting surgeon
