reworking of any such directional well shall be considered production or drilling or reworking operations on the lease area for all purposes of the lease.

[73 FR 6442, Feb. 4, 2008]

§ 3135.1–6 Lease renewal.

(a) With a discovery—(1) At any time after the fifth year of the primary term of a lease, the BLM may approve a 10-year lease renewal for a lease on which there has been a well drilled and a discovery of hydrocarbons even if the BLM has determined that the well is not capable of producing oil or gas in paying quantities. The BLM must receive the lessee’s application for lease renewal no later than 60 days prior to the expiration of the primary term of the lease.

(2) The renewal application must provide evidence, and a certification by the lessee, that the lessee or its operator has drilled one or more wells and discovered producible hydrocarbons on the leased lands in such quantities that a prudent operator would hold the lease for potential future development.

(3) The BLM will approve the renewal application if it determines that a discovery was made and that a prudent operator would hold the lease for future development.

(4) The lease renewal will be effective on the day following the end of the primary term of the lease.

(5) The lease renewal may be approved on the condition that the lessee drills one or more additional wells or acquires and analyzes more well data, seismic data, or geochemical survey data prior to the end of the primary term.

(b) Without a discovery—(1) At any time after the fifth year of the primary term of a lease, the BLM may approve an application for a 10-year lease renewal for a lease on which there has not been a discovery of oil or gas. The BLM must receive the lessee’s application no later than 60 days prior to the expiration of the primary term of the lease.

(2) The renewal application must:

(i) Provide sufficient evidence that the lessee has diligently pursued exploration that warrants continuation of the lease with the intent of continued exploration or future potential development of the leased land. The application must show the:

(A) Lessee or its operator has drilled one or more wells or has acquired and analyzed seismic data, or geochemical survey data on a significant portion of the leased land since the lease was issued;

(B) Data collected indicates a reasonable probability of future success; and

(C) Lessee’s plans for future exploration;

(ii) Show that all or part of the lease is part of a unit agreement covering a lease that qualifies for renewal without a discovery and that the lease has not been previously contracted out of the unit.

(3) The BLM will approve the renewal application if it determines that the application satisfies the requirements of paragraph (b)(2)(i) or (ii) of this section. If the BLM approves the application for lease renewal, the applicant must submit to the BLM a fee of $100 per acre within 5 business days of receiving notification of approval.

(4) The lease renewal will be effective on the day following the end of the primary term of the lease.

(5) The lease renewal may be approved on the condition that the lessee drills one or more additional wells or acquires and analyzes more well data, seismic data or geochemical survey data prior to the end of the primary term.

(c) Renewed lease. The renewed lease will be subject to the terms and conditions applicable to new oil and gas leases issued under the Integrated Activity Plan in effect on the date that the BLM issues the decision to renew the lease.

§ 3135.1–7 Consolidation of leases.

(a) Leases may be consolidated upon written request of the lessee filed with the State Director Alaska, Bureau of Land Management. The request shall identify each lease involved by serial number and shall explain the factors which justify the consolidation. Include with each request for a consolidation of leases the processing fee found in the fee schedule in §3000.12 of this chapter.
§ 3135.2 Under what circumstances will BLM require a suspension of operations and production or approve my request for a suspension of operations and production for my lease?

(a) BLM will require a suspension of operations and production or approve your request for a suspension of operations and production for your lease(s) if BLM determines that—

1. It is in the interest of conservation of natural resources;
2. It encourages the greatest ultimate recovery of oil and gas, such as by encouraging the planning and construction of a transportation system to a new area of discovery; or
3. It mitigates reasonably foreseeable and significantly adverse effects on surface resources.

(b) BLM will suspend operations and production for your lease if it determines that, despite the exercise of due care and diligence, you can't comply with your lease requirements for reasons beyond your control.

(c) If BLM requires a suspension of operations and production or approves your request for a suspension of operations and production for your lease(s), BLM will—

1. Stop the running of your lease term and prevent it from expiring for as long as the suspension is in effect;
2. Relieve you of your obligation to pay rent, royalty, or minimum royalty during the suspension; and
3. Prohibit you from operating on or having any other beneficial use of your lease during the suspension;
