§ 51.911

(2) [Reserved]

(f) Step 5. Beginning July 1, 2016, notwithstanding any other provision of the Commission’s rules, each Rate-of-Return Carrier shall establish interstate and intrastate per minute terminating End Office Access Service rates such that its Composite Terminating End Office Access Service rate does not exceed $0.005 per minute. Nothing in this section obligates or allows a Rate-of-Return Carrier that has intrastate rates lower than its functionally equivalent interstate rates to make any intrastate tariff filing or intrastate tariff revisions raising such rates.

(g) Step 6. Beginning July 1, 2017, notwithstanding any other provision of the Commission’s rules:

(1) Each Rate-of-Return Carrier shall establish rates for terminating End Office Access Service using the following methodology:

(i) Each Rate-of-Return Carrier shall calculate its 2017 interstate Target Composite Terminating End Office Access Rate. The 2017 interstate Target Composite Terminating End Office Access Rate means $0.0007 per minute plus two-thirds of any difference between that carrier’s Terminating End Office Access Service Rate as of July 1, 2016 and $0.0007 per minute.

(ii) Beginning July 1, 2017, no Rate-of-Return Carrier’s interstate or intrastate Composite Terminating End Office Access Service rate shall exceed its 2017 interstate Target Composite Terminating End Office Access Rate. In the alternative, any Rate-of-Return Carrier may elect to implement a single per minute rate element for terminating End Office Access Service no greater than the 2017 interstate Target Composite Terminating End Office Access Rate.

(h) Step 7. Beginning July 1, 2018, notwithstanding any other provision of the Commission’s rules:

(1) Each Rate-of-Return Carrier shall establish rates for terminating End Office Access Service that do not exceed $0.0007 per minute.

(i) Step 8. Beginning July 1, 2019, notwithstanding any other provision of the Commission’s rules, each Rate-of-Return Carrier shall establish interstate and intrastate rates for terminating End Office Access Service in accordance with a bill-and-keep methodology, revise and refile its federal access tariffs and any state tariffs to remove any intercarrier charges for terminating End Office Access Service.

(k) As set forth in FCC 11–161, states will facilitate implementation of changes to intrastate access rates to ensure compliance with the Order. Nothing in this section shall alter the authority of a state to monitor and oversee filing of intrastate tariffs.

§ 51.911 Access reciprocal compensation rates for competitive LECs.

(a) Caps on Access Reciprocal Compensation and switched access rates. Notwithstanding any other provision of the Commission’s rules:

(1) In the case of Competitive LECs operating in an area served by a Price
§ 51.911

Cap Carrier, no such Competitive LEC may increase the rate for any originating or terminating intrastate switched access service above the rate for such service in effect on December 29, 2011.

(2) In the case of Competitive LEC operating in an area served by an incumbent local exchange carrier that is a Rate-of-Return Carrier or Competitive LECs that are subject to the rural exemption in § 61.26(e) of this chapter, no such Competitive LEC may increase the rate for any originating or terminating intrastate switched access service above the rate for such service in effect on December 29, 2011, with the exception of intrastate originating access service. For such Competitive LECs, intrastate originating access service subject to this subpart shall remain subject to the same state rate regulation in effect December 31, 2011, as may be modified by the state thereafter.

(b) Except as provided in paragraph (b)(7) of this section, beginning July 3, 2012, notwithstanding any other provision of the Commission’s rules, each Competitive LEC that has tariffs on file with state regulatory authorities shall file intrastate access tariff provisions, in accordance with § 51.505(b)(2), that set forth the rates applicable to Transitional Intrastate Access Service in each state in which it provides Transitional Intrastate Access Service. Each Competitive Local Exchange Carrier shall establish the rates for Transitional Intrastate Access Service using the following methodology.

(1) Calculate total revenue from Transitional Intrastate Access Service at the carrier’s interstate access rates in effect on December 29, 2011, using Fiscal Year 2011 intrastate switched access demand for each rate element.

(2) Calculate total revenue from Transitional Intrastate Access Service at the carrier’s intrastate access rates in effect on December 29, 2011, using Fiscal Year 2011 intrastate switched access demand for each rate element.

(3) Calculate the Step 1 Access Revenue Reduction. The Step 1 Access Revenue Reduction is equal to one-half of the difference between the amount calculated in (b)(1) of this section and the amount calculated in (b)(2) of this section.

(4) A Competitive Local Exchange Carrier may elect to establish rates for Transitional Intrastate Access Service using its intrastate access rate structure. Carriers using this option shall establish rates for Transitional Intrastate Access Service revenue at the proposed rates is no greater than Transitional Intrastate Access Service revenue at the intrastate rates in effect as of December 29, 2011 less the Step 1 Access Revenue Reduction, using Fiscal year 2011 intrastate switched access demand.

(5) In the alternative, a Competitive Local Exchange Carrier may elect to apply its interstate access rate structure and interstate rates to Transitional Intrastate Access Service. In addition to applicable interstate access rates, the carrier may assess a transitional per-minute charge on Transitional Intrastate Access Service end office switching minutes (previously billed as intrastate access). The transitional charge shall be no greater than the Step 1 Access Revenue Reduction divided by Fiscal year 2011 intrastate switched access demand.

(6) Except as provided in paragraph (b)(7) of this section, nothing in this section obligates or allows a Competitive LEC that has intrastate rates lower than its functionally equivalent interstate rates to make any intrastate tariff filing or intrastate tariff revisions raising such rates.

(7) If a Competitive LEC must make an intrastate switched access rate reduction pursuant to paragraph (b) of this section, and that Competitive LEC has an intrastate rate for a rate element that is below the comparable interstate rate for that element, the Competitive LEC may increase the rate for any intrastate rate element that is below the comparable interstate rate for that element to the interstate rate no later than July 1, 2013;

(c) Beginning July 1, 2013, notwithstanding any other provision of the Commission’s rules, all Competitive Local Exchange Carrier Access Reciprocal Compensation rates for switched exchange access services subject to this 

73
subpart shall be no higher than the Access Reciprocal Compensation rates charged by the competing incumbent local exchange carrier, in accordance with the same procedures specified in §61.26 of this chapter.

§ 51.913 Transition for VoIP-PSTN traffic.

(a)(1) Terminating Access Reciprocal Compensation subject to this subpart exchanged between a local exchange carrier and another telecommunications carrier in Time Division Multiplexing (TDM) format that originates and/or terminates in IP format shall be subject to a rate equal to the relevant interstate terminating access charges specified by this subpart. Interstate originating Access Reciprocal Compensation subject to this subpart exchanged between a local exchange carrier and another telecommunications carrier in Time Division Multiplexing (TDM) format that originates and/or terminates in IP format shall be subject to a rate equal to the relevant interstate originating access charges specified by this subpart.

(2) Until June 30, 2014, intrastate originating Access Reciprocal Compensation subject to this subpart exchanged between a local exchange carrier and another telecommunications carrier in Time Division Multiplexing (TDM) format that originates and/or terminates in IP format shall be subject to a rate equal to the relevant intrastate originating access charges specified by this subpart. Effective July 1, 2014, originating Access Reciprocal Compensation subject to this subpart exchanged between a local exchange carrier and another telecommunications carrier in Time Division Multiplexing (TDM) format that originates and/or terminates in IP format shall be subject to a rate equal to the relevant interstate originating access charges specified by this subpart.

(b) Notwithstanding any other provision of the Commission’s rules, a local exchange carrier shall be entitled to assess and collect the full Access Reciprocal Compensation charges prescribed by this subpart that are set forth in a local exchange carrier’s interstate or intrastate tariff for the access services defined in §51.903 regardless of whether the local exchange carrier itself delivers such traffic to the called party’s premises or delivers the call to the called party’s premises via contractual or other arrangements with an affiliated or unaffiliated provider of interconnected VoIP service, as defined in 47 U.S.C. 153(25), or a non-interconnected VoIP service, as defined in 47 U.S.C. 153(36), that does not itself seek to collect Access Reciprocal Compensation charge prescribed by this subpart for that traffic. This rule does not permit a local exchange carrier to charge for functions not performed by the local exchange carrier itself or the affiliated or unaffiliated provider of interconnected VoIP service or non-interconnected VoIP service. For purposes of this provision, functions provided by a LEC as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of the incumbent local exchange carrier access service.

[76 FR 73856, Nov. 29, 2011, as amended at 77 FR 31536, May 29, 2012]

(a) Access Reciprocal Compensation subject to this subpart exchanged between a local exchange carrier and another telecommunications carrier in Time Division Multiplexing (TDM) format that originates and/or terminates in IP format shall be subject to a rate equal to the relevant interstate access charges specified by this subpart. Telecommunications traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol-compatible customer premises equipment.

(b) Notwithstanding any other provision of the Commission’s rules, a local exchange carrier shall be entitled to
